The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

FOREWORD

The 2014 edition of the *Digest of Education Statistics* is the 50th in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Funds for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Technology. Each chapter is divided into a number of topical subsections. Preceding the seven chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to providing updated versions of many statistics that have appeared in previous years, this edition incorporates new material on the following topics:

- Number and percentage distribution of children under age 18 and under age 6, by living arrangements, race/ethnicity, and selected racial/ethnic subgroups (table 102.20)
- Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012, and socioeconomic status and selected student characteristics while in high school (table 104.91)
- Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012, socioeconomic status and educational expectations while in high school, and college enrollment status 2 years after high school (table 104.92)
- Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed through 2012 and socioeconomic status while in high school (table 104.93)
- Primary child care arrangements of 4- and 5-year-old children who are not yet enrolled in kindergarten, by selected child and family characteristics (table 202.35)
- Public school students participating in programs for English language learners, by race/ethnicity (table 204.25)
- Percentage distribution of students enrolled in grades 1 through 12, by public school type and charter status, private school type, and selected household characteristics (table 206.30)
- Percentage of students enrolled in grades 1 through 12 whose parents reported having public school choice, considered other schools, reported current school was their first choice, or moved to their current neighborhood for the public school, by school type and selected child and household characteristics (table 206.40)
- Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied with various aspects of their children's schools, by public and private school type (table 206.50)
- Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics (table 212.08)
- Mobility of public elementary and secondary principals, by selected principal and school characteristics (table 212.20)
- Number and percentage distribution of public and private school principals who left the profession during the past year, by total years of experience as a principal and occupational status (table 212.30)
- Among 18- to 24-year-olds who are not enrolled in high school, percentage who are high school completers (status completion rate), by sex and race/ethnicity (table 219.65)
- Among 18- to 24-year-olds who are not enrolled in high school, number and percentage who are high school com-

pleters (status completers), and percentage distribution, by selected characteristics (table 219.67)
- Average National Assessment of Educational Progress (NAEP) mathematics scale score of 12th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student characteristics (table 222.35)
- Percentage of public school students in grades 9–12 who reported having been bullied on school property or electronically bullied during the previous 12 months, by state (table 230.62)
- Number of incidents of students bringing firearms to or possessing firearms at a public school and ratio of incidents per 100,000 students, by state (table 231.65)
- Number and percentage of undergraduate students taking distance education or online classes and degree programs, by selected characteristics (table 311.22)
- Number and percentage of graduate students taking distance education or online classes and degree programs, by selected characteristics (table 311.32)
- On-campus hate crimes at degree-granting postsecondary institutions, by level and control of institution, type of crime, and category of bias motivating the crime (table 329.30)
- Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics (table 331.35)
- Percentage of part-time or part-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics (table 331.37)
- Percentage of 3- and 4-year-olds and 5- to 14-year-olds enrolled in school, by country (table 601.35)

The *Digest* can be accessed from http://nces.ed.gov/programs/digest.

List of Figures

Figure		Page
1.	The structure of education in the United States	14
2.	Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2013–14	15
3.	Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2014	16
4.	Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2014	16
5.	Highest level of education attained by persons 25 through 29 years old: 2014	17
6.	Percentage of persons 25 through 29 years old, by selected levels of educational attainment and race/ethnicity: 2004 and 2014	17
7.	Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public elementary and secondary schools: 1960–61 through 2012–13	75
8.	Percentage change in public elementary and secondary enrollment, by state: Fall 2007 to fall 2012	76
9.	Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2013	76
10.	Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2011–12	77
11.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2011–12	77
12.	Enrollment, degrees conferred, and expenditures in degree-granting postsecondary institutions: 1960–61 through 2013–14	412
13.	Percentage change in total enrollment in degree-granting postsecondary institutions, by state: Fall 2008 to fall 2013	413
14.	Enrollment in degree-granting postsecondary institutions, by age: Fall 1970 through fall 2024	413
15.	Ratio of full-time-equivalent (FTE) students to total FTE staff and to FTE faculty in degree-granting postsecondary institutions, by control of institution: 1993, 2003, and 2013	414
16.	Bachelor's degrees conferred by postsecondary institutions in selected fields of study: 2002–03, 2007–08, and 2012–13	414
17.	Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2012–13	415
18.	Percentage distribution of total revenues of private nonprofit degree-granting postsecondary institutions, by source of funds: 2012–13	416
19.	Percentage distribution of total revenues of private for-profit degree-granting postsecondary institutions, by source of funds: 2012–13	417
20.	Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2014	728
21.	Percentage of federal on-budget funds for education, by agency: Fiscal year 2013	728
22.	Unemployment rates of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2014	747
23.	Employment to population ratios of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2014	747
24.	Percentage distribution of 2012–13 high school dropouts and high school completers not enrolled in college, by labor force status: October 2013	748
25.	Median annual earnings of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 2013	748
26.	Median annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009	749
27.	Percentage change in enrollment, by major areas of the world and level of education: 2000 to 2012	799
28.	Percentage of the population 25 to 34 years old with a bachelor's or higher degree, by OECD country: 2012	800
29.	Public direct expenditures on education institutions as a percentage of gross domestic product (GDP), by OECD country: 2011	801

List of Text Tables

Table		Page
A.	Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 through fall 2024	12
B.	Number of public school staff, by selected categories: 1969–70, 1980, and 2012	68
C.	Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007–08 through 2013–14	411
D.	Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2013	719
E.	Median annual earnings of full-time year-round workers 25 years old and over, by selected levels of educational attainment and sex: Selected years, 1995 through 2013	746
F.	Population and enrollment at different levels in major areas of the world: 2000 and 2012	796
G.	Common Core of Data (CCD) file versions used in the current edition of the *Digest of Education Statistics*: 1986–87 through 2012–13	848

List of Reference Tables

Chapter 1. All Levels of Education

Population

101.10. Estimates of resident population, by age group: 1970 through 2013 18

101.20. Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2013 19

101.30. Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity, race/ethnicity, and selected subgroups: 2003, 2008, and 2013 20

101.40. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2013 . . 22

Characteristics of Households With Children

102.10. Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2014 23

102.20. Number and percentage distribution of children under age 18 and under age 6, by living arrangements, race/ethnicity, and selected racial/ethnic subgroups: 2013 24

102.30. Median household income, by state: Selected years, 1990 through 2013 25

102.40. Poverty rates for all persons and poverty status of 5- to 17-year-olds, by region and state: Selected years, 1990 through 2013 26

102.50. Official and supplemental measures of poverty status for all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2013. 27

102.60. Number and percentage of children under age 18 living in poverty, by family structure, race/ethnicity, and selected subgroups: 2008 and 2013 30

Enrollment Rates

103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2013 31

103.20. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2013. 33

Educational Attainment

104.10. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2014 35

104.20. Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2014. 38

104.30. Number of persons age 18 and over, by highest level of educational attainment, sex, race/ethnicity, and age: 2014. 40

104.40. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment, race/ethnicity, and selected subgroups: 2008 and 2013 42

104.50. Persons age 25 and over who hold a bachelor's or higher degree, by sex, race/ethnicity, age group, and field of bachelor's degree: 2013 44

104.60. Number of persons 25 to 34 years old and percentage with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2013 . . 45

104.70. Number and percentage distribution of 6- to 18-year-olds, by parent's highest level of educational attainment, household type, and child's race/ethnicity: 2008 and 2013 46

104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2013 47

104.85. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2013. 48

104.88. Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by sex and state: 2013 49
104.90. Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics: 2012 50
104.91. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, and socioeconomic status and selected student characteristics while in high school: 2012 51
104.92. Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, socioeconomic status and educational expectations while in high school, and college enrollment status 2 years after high school: 2012 52
104.93. Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed and socioeconomic status while in high school: 2012 53
104.95. Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2014 54

Summary of Enrollment, Teachers, and Schools

105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2014 55
105.20. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution, enrollment level, and attendance status and sex of student: Selected years, fall 1990 through fall 2024 56
105.30. Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution: Selected years, 1869–70 through fall 2024 57
105.40. Number of teachers in elementary and secondary schools, and faculty in degree-granting postsecondary institutions, by control of institution: Selected years, fall 1970 through fall 2024 . . . 58
105.50. Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2012–13 59

Summary of Finances

106.10. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2013–14 60
106.20. Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2013–14 61
106.30. Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2011–12 62
106.40. Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2010–11 and 2011–12 63
106.50. Direct general expenditures of state and local governments per capita for all functions and for education, by level of education and state: 2010–11 and 2011–12 64
106.60. Gross domestic product, state and local expenditures, national income, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2014 65
106.70. Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2014 66

Chapter 2. Elementary and Secondary Education

Historical

201.10. Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2011–12 78

201.20. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2014 80

Enrollment Status and Child Care Arrangements of Young Children

202.10. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by age of child, level of program, control of program, and attendance status: Selected years, 1970 through 2013 81

202.20. Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by attendance status, level of program, and selected child and family characteristics: 2013 82

202.30. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2012 83

202.35. Primary child care arrangements of 4- and 5-year-old children who are not yet enrolled in kindergarten, by selected child and family characteristics: Selected years, 1995 through 2012 85

202.40. Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Selected years, 1991 through 2012 86

202.50. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06 87

202.60. Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06 88

202.65. Percentage distribution of first-time kindergartners, by primary type of child care arrangement during the year prior to kindergarten entry and selected child, family, and school characteristics: 2010–11 89

202.70. Number and percentage distribution of 3- to 5-year-olds not enrolled in school and all children enrolled in prekindergarten through second grade, by grade level and selected maternal and household characteristics: 2001, 2005, and 2012 90

Enrollment in Public Schools

203.10. Enrollment in public elementary and secondary schools, by level and grade: Selected years, fall 1980 through fall 2024 91

203.20. Enrollment in public elementary and secondary schools, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2024 92

203.25. Public school enrollment in prekindergarten through grade 8, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2024 94

203.30. Public school enrollment in grades 9 through 12, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2024 96

203.40. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2012. 98

203.45. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2011. 100

203.50. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2024 102

203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2024 103

203.70. Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 2002 and fall 2012 105

203.80. Average daily attendance (ADA) in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2011–12 106

203.90. Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007–08 and 2011–12 107

Participation in Public School Services

204.10. Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000–01 through 2012–13 108

204.20. Number and percentage of public school students participating in programs for English language learners, by state: Selected years, 2002–03 through 2012–13 109

204.25. Public school students participating in programs for English language learners, by race/ethnicity: Fall 2009 through fall 2013 110

204.30. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by type of disability: Selected years, 1976–77 through 2012–13 111

204.40. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and age group: 2000–01 through 2012–13 112

204.50. Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and type of disability: 2011–12 and 2012–13 113

204.60. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2012 114

204.70. Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2012–13 115

204.80. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 116

204.90. Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 117

Private School Education

205.10. Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2011 118

205.20. Enrollment and percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and grade level: Selected years, fall 1995 through fall 2011 119

205.30. Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Fall 2009 and fall 2011 121

205.40. Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2011 . . . 123

205.50. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: Selected years, 1999–2000 through 2011–12 124

205.60. Private elementary and secondary school full-time-equivalent (FTE) staff and student to FTE staff ratios, by orientation of school, school level, and type of staff: 2007–08 and 2011–12 126

205.70. Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2013–14 128

205.80. Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 2001 through 2011 129

Homeschooling and School Choice

206.10. Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 2003, 2007, and 2012 130

206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007 131

206.30. Percentage distribution of students enrolled in grades 1 through 12, by public school type and charter status, private school type, and selected child and household characteristics: 2012 . . . 132

206.40. Percentage of students enrolled in grades 1 through 12 whose parents reported having public school choice, considered other schools, reported current school was their first choice, or moved to their current neighborhood for the public school, by school type and selected child and household characteristics: 2012 133

206.50. Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied with various aspects of their children's schools, by public and private school type: 2003, 2007, and 2012 134

Parent Involvement in Education

207.10. Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 2001, 2007, and 2012 135

207.20. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 2003, 2007, and 2012 136

207.30. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 2003, 2007, and 2012 138

207.40. Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 2003, 2007, and 2012 139

Teachers and Pupil/Teacher Ratios

208.10. Public elementary and secondary pupil/teacher ratios, by selected school characteristics: Selected years, fall 1990 through fall 2012 140

208.20. Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2024 141

208.30. Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2012 142

208.40. Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2012 143

Teacher Characteristics, Class Sizes, and Assignments

209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987–88 through 2011–12 144

209.20. Number, highest degree, and years of full-time teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 through 2011–12 146

209.30. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011–12 148

209.50. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2011–12 149

Teacher Attitudes and Teacher Mobility

210.10. Percentage of teachers indicating that certain issues are serious problems in their schools, by level and control of school: Selected years, 1987–88 through 2011–12 150

210.20. Percentage of teachers agreeing with statements about teaching and school conditions, by control and level of school: Selected years, 1993–94 through 2011–12 151

210.30. Mobility of public elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2012–13 152

210.31. Mobility of private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2008–09 153

Teacher Salaries

211.10. Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2011–12 154
211.20. Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2011–12 156
211.30. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94 through 2011–12 158
211.40. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94 through 2011–12 159
211.50. Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2013–14 160
211.60. Estimated average annual salary of teachers in public elementary and secondary schools, by state: Selected years, 1969–70 through 2013–14 161

School Principals

212.08. Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2011–12 162
212.10. Number, highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2011–12 164
212.20. Mobility of public elementary and secondary principals, by selected principal and school characteristics: 2007–08 to 2008–09 and 2011–12 to 2012–13 165
212.30. Number and percentage distribution of public and private school principals who left the profession during the past year, by total years of experience as a principal and occupational status: 2012–13 166

School Staff

213.10. Staff employed in public elementary and secondary school systems, by type of assignment: Selected years, 1949–50 through fall 2012 167
213.20. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2012. 168
213.30. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2011. 169
213.40. Staff, teachers, and teachers as a percentage of staff in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2012 170
213.50. Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2012 171

Overview of Schools and School Districts

214.10. Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2012–13 172
214.20. Number and percentage distribution of regular public school districts and students, by enrollment size of district: Selected years, 1979–80 through 2012–13 173
214.30. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2011–12 and 2012–13 174
214.40. Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: 2009–10 through 2012–13 175

Large School Districts

215.10. Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: Selected years, 1990 through 2012 177

215.20. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2011–12 and fiscal year 2014 188

215.30. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2012: Selected years, 2011–12 through 2014 200

Public Schools

216.10. Public elementary and secondary schools, by level of school: Selected years, 1967–68 through 2012–13 203

216.20. Number and enrollment of public elementary and secondary schools, by school level, type, and charter and magnet status: Selected years, 1990–91 through 2012–13 204

216.30. Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 1999–2000 through 2012–13 205

216.40. Number and percentage distribution of public elementary and secondary schools and enrollment, by level, type, and enrollment size of school: 2010–11, 2011–12, and 2012–13 206

216.45. Average enrollment and percentage distribution of public elementary and secondary schools, by level, type, and enrollment size: Selected years, 1982–83 through 2012–13 207

216.50. Number and percentage distribution of public elementary and secondary school students, by percentage of minority enrollment in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2012 208

216.55. Number and percentage distribution of public elementary and secondary school students, by percentage of student's racial/ethnic group enrolled in the school and student's racial/ethnic group: Selected years, fall 1995 through fall 2012 209

216.60. Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: 2012–13 210

216.70. Public elementary and secondary schools, by level, type, and state or jurisdiction: 1990–91, 2000–01, 2010–11, and 2012–13 211

216.75. Public elementary schools, by grade span, average school enrollment, and state or jurisdiction: 2012–13 212

216.80. Public secondary schools, by grade span, average school enrollment, and state or jurisdiction: 2012–13 213

216.90. Public elementary and secondary charter schools and enrollment, by state: Selected years, 1999–2000 through 2012–13 214

216.95. Number and enrollment of public elementary and secondary schools that have closed, by school level, type, and charter status: Selected years, 1995–96 through 2012–13 215

School Facilities

217.10. Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings: 2012 216

217.15. Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans: 2012–13 217

217.20. Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 221

Computers and Technology

218.10. Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008 222

218.20. Percentage of public school districts with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002–03, 2004–05, and 2009–10 223

High School Completers and Dropouts

219.10. High school graduates, by sex and control of school: Selected years, 1869–70 through 2024–25 . . . 224

219.20. Public high school graduates, by region, state, and jurisdiction: Selected years, 1980–81 through 2024–25 225

219.30. Public high school graduates, by race/ethnicity: 1998–99 through 2024–25 227

219.35. Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2009–10 228

219.40. Public high school averaged freshman graduation rate (AFGR), by sex, race/ethnicity, and state or jurisdiction: 2010–11 229

219.50. Number and percentage of 9th- to 12th-graders who dropped out of public schools, by race/ethnicity, grade, and state or jurisdiction: 2009–10 230

219.60. Number of people taking the general educational development (GED) test and percentage distribution of those who passed, by age group: 1971 through 2013 231

219.65. Among 18- to 24-year-olds who are not enrolled in high school, percentage who are high school completers (status completion rate), by sex and race/ethnicity: 1972 through 2013 232

219.67. Among 18- to 24-year-olds who are not enrolled in high school, number and percentage who are high school completers (status completers), and percentage distribution, by selected characteristics: 2013 233

219.70. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2013 234

219.71. Population 16 through 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by sex and race/ethnicity: 1970 through 2013 235

219.75. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2013 237

219.80. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: 2011 and 2012 238

219.90. Number and percentage distribution of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: 2010–11 and 2011–12 239

Skills of Young Children

220.10. Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02 240

220.20. Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04 242

220.30. Children's reading, language, mathematics, color knowledge, and fine motor skills at about 4 years of age, by child's age and selected characteristics: 2005–06 244

220.40. Fall 2010 first-time kindergartners' reading, mathematics, and science scale scores, by selected child, family, and school characteristics: Fall 2010, spring 2011, and spring 2012 245

220.45. Fall 2010 first-time kindergartners' cognitive flexibility, approaches to learning, interpersonal skills, and self-control scale scores, by selected child, family, and school characteristics: Fall 2010, spring 2011, and spring 2012 247

220.50. Number and percentage distribution of kindergartners, by fall 2010 kindergarten entry status and selected child, family, and school characteristics: 2010–11 249
220.60. Fall 2010 kindergartners' reading, mathematics, science, cognitive flexibility, and approaches to learning scale scores, by kindergarten entry status and time of assessment: Fall 2010, spring 2011, and spring 2012 250
220.70. Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 . . . 251
220.80. Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 252

Reading Achievement

221.10. Average National Assessment of Educational Progress (NAEP) reading scale score, by sex, race/ethnicity, and grade: Selected years, 1992 through 2013 253
221.12. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of students attaining selected NAEP reading achievement levels, by selected school and student characteristics and grade: Selected years, 1992 through 2013 254
221.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 1998 through 2013 255
221.30. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012. 256
221.40. Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students and percentage attaining reading achievement levels, by state: Selected years, 1992 through 2013 257
221.50. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of 4th-grade public school students, by race/ethnicity and state: 2013. 258
221.60. Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students and percentage attaining reading achievement levels, by locale and state: Selected years, 2003 through 2013 259
221.70. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2013 260
221.75. Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2013 261
221.80. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013. 262
221.85. Average National Assessment of Educational Progress (NAEP) reading scale score, by age and selected student characteristics: Selected years, 1971 through 2012. 263
221.90. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2012 264

Mathematics Achievement

222.10. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by sex, race/ethnicity, and grade: Selected years, 1990 through 2013 265
222.12. Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage of students attaining selected NAEP mathematics achievement levels, by selected school and student characteristics and grade: Selected years, 1990 through 2013 266
222.20. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 1996 through 2013 267

222.30. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student characteristics: 2013 268

222.35. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 12th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student characteristics: 2013 269

222.40. Average National Assessment of Educational Progress (NAEP) mathematics scale score of high school graduates at grade 12, by highest mathematics course taken in high school and selected student and school characteristics: 2009 270

222.50. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1992 through 2013 271

222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1990 through 2013 272

222.70. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, highest level of parental education, and state: 2013 273

222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining achievement levels, by race/ethnicity and jurisdiction or specific urban district: 2009, 2011, and 2013 274

222.85. Average National Assessment of Educational Progress (NAEP) mathematics scale score, by age and selected student characteristics: Selected years, 1973 through 2012 275

222.90. Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics score levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2012 276

222.95. National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012 . . . 277

Science Achievement

223.10. Average National Assessment of Educational Progress (NAEP) science scale score, standard deviation, and percentage of students attaining science achievement levels, by grade level, selected student and school characteristics, and percentile: 2009 and 2011 278

223.20. Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-grade public school students, by race/ethnicity and state: 2009 and 2011 279

223.25. Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2011 280

223.30. Average National Assessment of Educational Progress (NAEP) science scale scores of 12th-graders with various educational goals and attitudes toward science, and percentage reporting these goals and attitudes, by selected student characteristics: 2009 281

Achievement in Other Subjects

224.10. Average National Assessment of Educational Progress (NAEP) arts scale score of 8th-graders, percentage distribution by frequency of instruction, and percentage participating in selected activities, by subject and selected characteristics: 2008 282

224.20. Average National Assessment of Educational Progress (NAEP) civics scale score and percentage of students attaining civics achievement levels, by grade level, selected student characteristics, and percentile: 1998, 2006, 2010, and 2014 283

224.30. Average National Assessment of Educational Progress (NAEP) economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected characteristics: 2006 and 2012. 284

224.40. Average National Assessment of Educational Progress (NAEP) geography scale score, standard deviation, and percentage of students attaining geography achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014. 285

224.50. Average National Assessment of Educational Progress (NAEP) U.S. history scale score, standard deviation, and percentage of students attaining achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014 286

224.60. Average National Assessment of Educational Progress (NAEP) writing scale score of 8th- and 12th-graders, standard deviation, and percentage of students attaining writing achievement levels, by selected student and school characteristics and percentile: 2011 287

Coursetaking and Grades

225.10. Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009 288

225.20. Average number of Carnegie units earned by public high school graduates in career/technical education courses in various occupational fields, by sex and race/ethnicity, and percentage distribution of students, by units earned: Selected years, 2000 through 2009 290

225.30. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009 292

225.40. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by selected student and school characteristics: Selected years, 1990 through 2009 293

225.50. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2009 . . 296

225.60. Number and percentage of public high school graduates taking dual credit, Advanced Placement (AP), and International Baccalaureate (IB) courses in high school and average credits earned, by selected student and school characteristics: 2000, 2005, and 2009 297

225.70. Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits: 2000, 2005, and 2009 299

225.80. Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 2003, 2007, and 2012 300

College Admission Tests

226.10. SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2013–14 301

226.20. SAT mean scores of college-bound seniors, by sex: 1966–67 through 2013–14 302

226.30. SAT mean scores and percentage distribution of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2013–14 303

226.40. Mean SAT scores of college-bound seniors and percentage of graduates taking SAT, by state: Selected years, 1995–96 through 2013–14 305

226.50. ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of postsecondary study: Selected years, 1995 through 2014 306

Student Activities, Homework, and Attendance

227.10. Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity: 2009 307

227.20. Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 308

227.30. Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1992 and 2004 309

227.40. Percentage of elementary and secondary school students who do homework, average time spent, percentage whose parents check that homework is done, and percentage whose parents help with homework, by frequency and selected characteristics: 2007 and 2012 310

227.50. Average National Assessment of Educational Progress (NAEP) reading and mathematics scale scores of 4th-, 8th-, and 12th-graders and percentage absent from school, by selected characteristics and number of days absent in the last month: 2013 313

School Crime Victims

228.10. School-associated violent deaths of all persons, homicides and suicides of youth ages 5–18 at school, and total homicides and suicides of youth ages 5–18, by type of violent death: 1992–93 to 2011–12 315
228.20. Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and year: 1992 through 2013 316
228.25. Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2013 317
228.30. Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2013 318
228.40. Percentage of students in grades 9–12 who reported being threatened or injured with a weapon on school property during the previous 12 months, by selected student characteristics and number of times threatened or injured: Selected years, 1993 through 2013 320
228.50. Percentage of public school students in grades 9–12 who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state: Selected years, 2003 through 2013 321
228.70. Number and percentage of public and private school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher and school characteristics: Selected years, 1993–94 through 2011–12 322
228.80. Percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by state: Selected years, 1993–94 through 2011–12 323

School Crime Incidents

229.10. Percentage of public schools recording incidents of crime at school and reporting incidents to police, number of incidents, and rate per 1,000 students, by type of crime: Selected years, 1999–2000 through 2009–10 324
229.20. Number and percentage of public schools recording at least one crime incident that occurred at school, and number and rate of incidents, by school characteristics and type of incident: 1999–2000 and 2009–10 325
229.30. Percentage of public schools recording incidents of crime at school, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009–10 327
229.40. Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2009–-10 328
229.50. Percentage distribution of public schools, by number of violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009–10 329
229.60. Percentage distribution of public schools, by number of serious violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2009–10 330

School Environment

230.10. Percentage of public schools reporting selected discipline problems that occurred at school, by frequency and selected school characteristics: Selected years, 1999–2000 through 2009–10 331
230.20. Percentage of students ages 12–18 who reported that gangs were present at school during the school year, by selected student and school characteristics and urbanicity: Selected years, 2001 through 2013 332
230.30. Percentage of students ages 12–18 who reported being the target of hate-related words and seeing hate-related graffiti at school during the school year, by selected student and school characteristics: Selected years, 1999 through 2013 333
230.35. Percentage of students ages 12–18 who reported being the target of hate-related words at school, by type of hate-related word and selected student and school characteristics: 2013 334

230.40. Percentage of students ages 12–18 who reported being bullied at school or cyber-bullied anywhere during the school year, by type of bullying at school, reports of injury, and selected student and school characteristics: 2013 335
230.45. Percentage of students ages 12–18 who reported being bullied at school during the school year, by type of bullying and selected student and school characteristics: Selected years, 2005 through 2013 336
230.50. Percentage of students ages 12–18 who reported being bullied at school during the school year and, among bullied students, percentage who reported being bullied in various locations, by selected student and school characteristics: 2013. 338
230.55. Percentage of students ages 12–18 who reported being cyber-bullied anywhere during the school year, by type of cyber-bullying and selected student and school characteristics: 2013 339
230.60. Among students ages 12–18 who reported being bullied at school or cyber-bullied anywhere during the school year, percentage reporting various frequencies of bullying and the notification of an adult at school, by selected student and school characteristics: 2013 340
230.62. Percentage of public school students in grades 9–12 who reported having been bullied on school property or electronically bullied during the previous 12 months, by state: Selected years, 2009 through 2013 341
230.65. Percentage of public schools reporting selected types of cyber-bullying problems occurring at school or away from school at least once a week, by selected school characteristics: 2009–10. 342
230.70. Percentage of students ages 12–18 who reported being afraid of attack or harm, by location and selected student and school characteristics: Selected years, 1995 through 2013. 343
230.80. Percentage of students ages 12–18 who reported avoiding one or more places in school or avoiding school activities or classes because of fear of attack or harm, by selected student and school characteristics: Selected years, 1995 through 2013. 344
230.90. Percentage of public and private school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching, by selected teacher and school characteristics: Selected years, 1987–88 through 2011–12 345
230.92. Percentage of public and private school teachers who agreed that other teachers and the principal enforced school rules, by selected teacher and school characteristics: Selected years, 1987–88 through 2011–12 346
230.95. Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching and that other teachers and the principal enforced school rules, by state: 2011–12 347

Fights and Weapons

231.10. Percentage of students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2013 348
231.20. Percentage distribution of students in grades 9–12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2013 349
231.30. Percentage of public school students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and state: Selected years, 2003 through 2013. 350
231.40. Percentage of students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2013 351
231.50. Percentage distribution of students in grades 9–12, by number of days they reported carrying a weapon anywhere or on school property during the previous 30 days and selected student characteristics: 2013 352
231.60. Percentage of public school students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and state: Selected years, 2003 through 2013 353

231.65. Number of incidents of students bringing firearms to or possessing firearms at a public school and ratio of incidents per 100,000 students, by state: 2008–09 through 2012–13 354
231.70. Percentage of students ages 12–18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: Selected years, 2007 through 2013 355

Alcohol, Illicit Drugs, and Cigarettes

232.10. Percentage of students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2013 356
232.20. Percentage distribution of students in grades 9–12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2013 357
232.30. Percentage of public school students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and state: Selected years, 2003 through 2013 358
232.40. Percentage of students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2013 359
232.50. Percentage distribution of students in grades 9–12, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2013 360
232.60. Percentage of public school students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and state: Selected years, 2003 through 2013. . . 361
232.70. Percentage of students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2013 362
232.80. Percentage of public school students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by state: Selected years, 2003 through 2013 363
232.90. Percentage of high school seniors reporting use of alcohol and illicit drugs, by frequency of use and substance used: Selected years, 1975 through 2013 364
232.95. Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2013 365

Discipline, Safety, and Security Measures

233.10. Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number of serious actions taken, and percentage distribution of actions, by type of offense, school level, and type of action: Selected years, 1999–2000 through 2009–10 366
233.30. Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 367
233.40. Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 369
233.50. Percentage of public and private schools with various safety and security measures, by school level: 2003–04, 2007–08, and 2011–12 370
233.60. Percentage of public and private schools with various safety and security measures, by school control and selected characteristics: 2011–12 371
233.70. Percentage of public schools with one or more full-time or part-time security staff present at least once a week, and percentage of schools with security staff routinely carrying a firearm, by selected school characteristics: 2005–06, 2007–08, and 2009–10 372
233.80. Percentage of students ages 12–18 who reported various security measures at school: Selected years, 1999 through 2013 373

State Regulations

234.10. Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 2000 through 2014 374

234.20. Minimum amount of instructional time per year and policies on textbooks, by state: Selected years, 2000 through 2014 375

234.30. Course credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2013 377

234.40. States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07 378

234.50. Required testing for initial certification of elementary and secondary school teachers, by type of assessment and state: 2013 and 2014 379

Revenues

235.10. Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2011–12 380

235.20. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2011–12 382

235.30. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2010–11 383

235.40. Public elementary and secondary revenues and expenditures, by locale, source of revenue, and purpose of expenditure: 2011–12 384

Expenditures

236.10. Summary of expenditures for public elementary and secondary education and other related programs, by purpose: Selected years, 1919–20 through 2011–12 385

236.15. Current expenditures and current expenditures per pupil in public elementary and secondary schools: 1989–90 through 2024–25 386

236.20. Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990–91 through 2011–12 387

236.25. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2011–12 389

236.30. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2011–12 391

236.40. Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2010–11 393

236.50. Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2010–11 and 2011–12 395

236.55. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2011–12 396

236.60. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction: Selected years, 1990–91 through 2011–12 397

236.65. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2011–12 399

236.70. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2011–12 401

236.75. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2011–12 403

236.80. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2010–11 404

236.90. Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2011–12 405

Chapter 3. Postsecondary Education

Overview and Historical

301.10. Enrollment, staff, and degrees/certificates conferred in degree-granting and non-degree-granting postsecondary institutions, by control and level of institution, sex of student, type of staff, and level of degree: Fall 2013 and 2012–13 418

301.20. Historical summary of faculty, enrollment, degrees conferred, and finances in degree-granting postsecondary institutions: Selected years, 1869–70 through 2012–13 419

Enrollment Rates

302.10. Recent high school completers and their enrollment in 2-year and 4-year colleges, by sex: 1960 through 2013 420

302.20. Percentage of recent high school completers enrolled in 2- and 4-year colleges, by race/ethnicity: 1960 through 2013 421

302.30. Percentage of recent high school completers enrolled in 2-year and 4-year colleges, by income level: 1975 through 2013 422

302.40. Number of high schools with 12th-graders and percentage of high school graduates attending 4-year colleges, by selected high school characteristics: Selected years, 1998–99 through 2011–12 423

302.50. Estimated rate of 2009–10 high school graduates attending degree-granting institutions, by state: 2010 424

302.60. Percentage of 18- to 24-year-olds enrolled in degree-granting institutions, by level of institution and sex and race/ethnicity of student: 1967 through 2013. 425

Total Fall Enrollment—General

303.10. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2024 426

303.20. Total fall enrollment in all postsecondary institutions participating in Title IV programs and annual percentage change in enrollment, by degree-granting status and control of institution: 1995 through 2013 428

303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2013 429

303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2024 430

303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2024 432

303.45. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2009, 2011, and 2013 433

303.50. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2013. 434

303.55. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, attendance status, and age of student: 2013 435

303.60. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2013 436

303.65. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2012 437

303.70. Total undergraduate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control and level of institution: Selected years, 1970 through 2024 438

303.80. Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1967 through 2024 440

303.90. Fall enrollment and number of degree-granting postsecondary institutions, by control and religious affiliation of institution: Selected years, 1980 through 2013. 441

Total Fall Enrollment—State-Level

304.10. Total fall enrollment in degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2013 443

304.15. Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2013 444

304.20. Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2013 445

304.30. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2012 and 2013 446

304.35. Total fall enrollment in public degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2012 and 2013. 447

304.40. Total fall enrollment in private degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2012 and 2013. 448

304.45. Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2012 and 2013 449

304.50. Total fall enrollment in private for-profit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2012 and 2013 450

304.60. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2012 and 2013 451

304.70. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment and state or jurisdiction: Selected years, 2000 through 2013 452

304.80. Total fall enrollment in degree-granting postsecondary institutions, by control, level of enrollment, level of institution, and state or jurisdiction: 2013. 453

First-Time Students and Admissions

305.10. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, and level and control of institution: 1955 through 2024 454

305.20. Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2013 455

305.30. Number and percentage of degree-granting postsecondary institutions with first-year undergraduates using various selection criteria for admission, by control and level of institution: Selected years, 2000–01 through 2013–14 456

305.40. Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2013–14 457

Enrollment of Racial/Ethnic Groups

306.10. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and race/ethnicity of student: Selected years, 1976 through 2013 458

306.20. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2013 461

306.30. Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ethnicity: Selected years, 1976 through 2024 463

306.40. Fall enrollment of males and females and specific racial/ethnic groups in degree-granting postsecondary institutions, by control and level of institution and percentage of U.S. resident enrollment in the same racial/ethnic group: 2013 464

306.50. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, level of enrollment, and race/ethnicity of student: 2013 466

306.60. Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2013 468
306.70. Fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2012 470

Full-Time-Equivalent Fall Enrollment

307.10. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1967 through 2024 472
307.20. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2000, 2010, and 2013 473
307.30. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2013 474

Twelve-Month Enrollment

308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2011–12 and 2012–13 475
308.20. Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004–05 through 2012–13 476

Student Residence and Migration

309.10. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions, by state or jurisdiction: Fall 2012 477
309.20. Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2012 478
309.30. Residence and migration of all first-time degree/certificate-seeking undergraduates in 4-year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2012 479

Study Abroad and Foreign Students

310.10. Number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, and other selected characteristics: Selected years, 2000–01 through 2012–13 480
310.20. Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2013–14 481

Programs and Courses

311.10. Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2007–08 and 2011–12 482
311.15. Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2012 and fall 2013 483
311.20. Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011–12 484
311.22. Number and percentage of undergraduate students taking distance education or online classes and degree programs, by selected characteristics: Selected years, 2003–04 through 2011–12 485
311.30. Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics: 2011–12 486
311.32. Number and percentage of graduate students taking distance education or online classes and degree programs, by selected characteristics: Selected years, 2003–04 through 2011–12 487
311.33. Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics: 2013 488

311.40. Percentage of first-year undergraduate students who reported taking remedial education courses, by selected student and institution characteristics: 2003–04, 2007–08, and 2011–12 489
311.50. Percentage of degree-granting postsecondary institutions with first-year undergraduates offering remedial services, by control and level of institution: 1989–90 through 2013–14 491
311.60. Enrollment in postsecondary education, by level of enrollment, level of institution, student age, and major field of study: 2011–12 492
311.70. Course enrollments in languages other than English compared with total enrollment at degree-granting postsecondary institutions, by enrollment level, institution level, and language: Selected years, 1965 through 2009 494
311.80. Number and percentage distribution of course enrollments in languages other than English at degree-granting postsecondary institutions, by language and enrollment level: 2002, 2006, and 2009 495
311.90. Graduate enrollment in programs in engineering, physical and biological sciences, mathematical and computer sciences, social sciences, and research-based health fields in degree-granting postsecondary institutions, by discipline: Fall 2007 through fall 2013 496

Large Institutions and Institutions Serving Specific Groups

312.10. Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2013 497
312.20. Selected statistics for degree-granting postsecondary institutions enrolling more than 15,000 students in 2013, by selected institution and student characteristics: Selected years, 1990 through 2012–13 498
312.30. Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2013 and 2012–13 508
312.40. Enrollment and degrees conferred in degree-granting postsecondary institutions that serve large proportions of Hispanic undergraduate students, by institution level and control, percentage Hispanic, degree level, and other selected characteristics: Fall 2013 and 2012–13 509
312.50. Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2013, and 2011–12 and 2012–13 . . . 522

Historically Black Colleges and Universities

313.10. Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2012, 2013, and 2012–13 523
313.20. Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2013 525
313.30. Selected statistics on degree-granting historically Black colleges and universities, by control and level of institution: Selected years, 1990 through 2013 526

Staff

314.10. Total and full-time-equivalent (FTE) staff and FTE student/FTE staff ratios in postsecondary institutions participating in Title IV programs, by degree-granting status, control of institution, and primary occupation: Fall 1993, fall 2003, and fall 2013 527
314.20. Employees in degree-granting postsecondary institutions, by sex, employment status, control and level of institution, and primary occupation: Selected years, fall 1991 through fall 2013 528
314.30. Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2013 529
314.40. Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2013 532
314.50. Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2013 . . . 535
314.60. Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2013 . . . 536

Faculty and Instructional Staff

315.10. Number of faculty in degree-granting postsecondary institutions, by employment status, sex, control, and level of institution: Selected years, fall 1970 through fall 2013 537

315.20. Full-time faculty in degree-granting postsecondary institutions, by race/ethnicity, sex, and academic rank: Fall 2009, fall 2011, and fall 2013 538

315.30. Percentage distribution of full-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 539

315.40. Percentage distribution of part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003. 541

315.50. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 . . . 543

315.60. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 545

315.70. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 547

315.80. Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003. 549

Faculty Salaries and Benefits

316.10. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970–71 through 2013–14 551

316.20. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999–2000 through 2013–14 554

316.30. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2013–14 555

316.40. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2012–13 556

316.50. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2013–14 557

316.60. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2012–13 558

316.70. Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2010–11 559

316.80. Percentage of degree-granting postsecondary institutions with a tenure system and of full-time faculty with tenure at these institutions, by control and level of institution and selected characteristics of faculty: Selected years, 1993–94 through 2013–14 561

Institutions

317.10. Degree-granting postsecondary institutions, by control and level of institution: Selected years, 1949–50 through 2013–14 562

317.20. Degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2013–14 563

317.30. Number of non-degree-granting Title IV institutions offering postsecondary education, by control of institution and state or jurisdiction: Selected years, 2000–01 through 2013–14 565

317.40. Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and level of institution: Fall 2013 566
317.50. Degree-granting postsecondary institutions that have closed their doors, by control and level of institution: 1969–70 through 2013–14 568

Summary of Degrees Conferred

318.10. Degrees conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1869–70 through 2024–25 569
318.20. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2012–13 570
318.30. Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2012–13 571
318.40. Degrees/certificates conferred by postsecondary institutions, by control of institution and level of degree: 1969–70 through 2012–13 585
318.50. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and field of study: 2012–13 586
318.60. Number of postsecondary institutions conferring degrees, by control, level of degree, and field of study: 2012–13 587

Degrees Conferred—State-Level

319.10. Degrees conferred by postsecondary institutions, by control of institution, level of degree, and state or jurisdiction: 2012–13 588
319.20. Degrees conferred by postsecondary institutions, by level of degree and state or jurisdiction: 2010–11 through 2012–13 589
319.30. Bachelor's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2012–13 590
319.40. Master's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2012–13 591

Certificates Below the Associate's Degree Level

320.10. Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and discipline division: 2012–13 592
320.20. Certificates below the associate's degree level conferred by postsecondary institutions, by race/ethnicity and sex of student: 1998–99 through 2012–13 594

Associate's Degrees

321.10. Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2002–03 through 2012–13 595
321.20. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2012–13 596
321.30. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 597
321.40. Associate's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 598
321.50. Associate's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 599

Bachelor's Degrees

322.10. Bachelor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2012–13 600
322.20. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2012–13 601

322.30. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 602
322.40. Bachelor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 603
322.50. Bachelor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 604

Master's Degrees

323.10. Master's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2012–13 . . . 605
323.20. Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2012–13 . . . 606
323.30. Master's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 607
323.40. Master's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 608
323.50. Master's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 609

Doctor's Degrees

324.10. Doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2012–13 . . . 610
324.20. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2012–13 . . . 611
324.25. Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 612
324.30. Doctor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 613
324.35. Doctor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2011–12 and 2012–13. . . . 614
324.40. Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949–50 through 2012–13 . . . 615
324.50. Degrees conferred by postsecondary institutions in selected professional fields, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2012–13 . . . 616
324.55. Degrees conferred by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 617
324.60. Degrees conferred to males by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 617
324.70. Degrees conferred to females by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2011–12 and 2012–13 . . . 618
324.80. Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2010–11 and 2011–12 . . . 619
324.90. Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees, by rank order: 2003–04 through 2012–13 . . . 620

Trends in Degrees by Field

325.10. Degrees in agriculture and natural resources conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 . . . 621
325.15. Degrees in architecture and related services conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 . . . 622

325.20. Degrees in the biological and biomedical sciences conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1951–52 through 2012–13 623
325.22. Degrees in biology, microbiology, and zoology conferred by postsecondary institutions, by level of degree: 1970–71 through 2012–13 624
325.25. Degrees in business conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1955–56 through 2012–13 625
325.30. Degrees in communication, journalism, and related programs and in communications technologies conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 626
325.35. Degrees in computer and information sciences conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 627
325.40. Degrees in education conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 628
325.45. Degrees in engineering and engineering technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 629
325.47. Degrees in chemical, civil, electrical, and mechanical engineering conferred by postsecondary institutions, by level of degree: 1970–71 through 2012–13 630
325.50. Degrees in English language and literature/letters conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 631
325.55. Degrees in foreign languages and literatures conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959–60 through 2012–13 632
325.57. Degrees in French, German, Italian, and Spanish language and literature conferred by postsecondary institutions, by level of degree: Selected years, 1949–50 through 2012–13 633
325.59. Degrees in Arabic, Chinese, Korean, and Russian language and literature conferred by postsecondary institutions, by level of degree: 1969–70 through 2012–13 634
325.60. Degrees in the health professions and related programs conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13. 635
325.65. Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 636
325.70. Degrees in the physical sciences and science technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959–60 through 2012–13 . 637
325.72. Degrees in chemistry, geology and earth science, and physics conferred by postsecondary institutions, by level of degree: 1970–71 through 2012–13 638
325.80. Degrees in psychology conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2012–13 639
325.85. Degrees in public administration and social services conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 640
325.90. Degrees in the social sciences and history conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 641
325.92. Degrees in economics, history, political science and government, and sociology conferred by postsecondary institutions, by level of degree: Selected years, 1949–50 through 2012–13 642
325.95. Degrees in visual and performing arts conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2012–13 643

Completion Rates

326.10. Graduation rate from first institution attended for first-time, full-time bachelor's degree-seeking students at 4-year postsecondary institutions, by race/ethnicity, time to completion, sex, control of institution, and acceptance rate: Selected cohort entry years, 1996 through 2007 644
326.20. Graduation rate from first institution attended within 150 percent of normal time for first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2010 650

326.30. Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: 2006 to 2013 652

326.40. Percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2003–04 academic year, by highest degree attained, enrollment status, and selected characteristics: Spring 2009 654

Achievement and Admissions Testing

327.10. Average scores and standard deviations on Graduate Record Examination (GRE) general and subject tests: 1965 through 2013 656

Security and Crime

329.10. On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident: 2001 through 2012 658

329.20. On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: 2001 through 2012 660

329.30. On-campus hate crimes at degree-granting postsecondary institutions, by level and control of institution, type of crime, and category of bias motivating the crime: 2009 through 2012 662

Student Charges

330.10. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by level and control of institution: 1963–64 through 2013–14 663

330.20. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2012–13 and 2013–14 667

330.30. Average undergraduate tuition, fees, room, and board rates for full-time students in degree-granting postsecondary institutions, by percentile of charges and control and level of institution: Selected years, 2000–01 through 2013–14 668

330.40. Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: 2009–10 through 2013–14 669

330.50. Average graduate tuition and required fees in degree-granting postsecondary institutions, by control of institution and percentile of charges: 1989–90 through 2013–14 670

Financial Aid for Undergraduates

331.10. Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2011–12 671

331.20. Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000–01 through 2012–13 672

331.30. Average amount of grant and scholarship aid and average net price for first-time, full-time students receiving Title IV aid, by control and level of institution and income level: 2009–10 through 2012–13 674

331.35. Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics: Selected years, 1999–2000 through 2011–12 676

331.37. Percentage of part-time or part-year undergraduates receiving financial aid, and average annual amount received, by source of aid and selected student characteristics: Selected years, 1999–2000 through 2011–12 678

331.40. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2011–12 680

331.45. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2011–12 681
331.50. Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2007–08 and 2011–12 682
331.60. Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12 683
331.70. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12 684
331.80. Percentage of part-time or part-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2011–12 686
331.90. Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and level of institution: 2007–08 and 2011–12 687
331.95. Percentage of undergraduate students ages 18 to 24 in their 4th (senior) year or above who ever received federal loans, nonfederal loans, or Parent Loans for Undergraduates (PLUS), and average cumulative amount borrowed, by selected student characteristics and control and level of institution: 1989–90, 1999–2000, and 2011–12 688

Financial Aid for Postbaccalaureate Students

332.10. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2011–12 690
332.20. Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2011–12 691
332.30. Percentage of full-time, full-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2011–12 . . 692
332.40. Percentage of part-time or part-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2011–12 693
332.50. Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted, and student loan cohort default rates, by 2-year or 3-year default period and level and control of institution: Fiscal years 2009 through 2011 694

Revenues

333.10. Revenues of public degree-granting postsecondary institutions, by source of revenue and level of institution: 2006–07 through 2012–13 695
333.20. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2012–13 697
333.25. Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2011–12 698
333.30. Appropriations from state and local governments for public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1990–91 through 2012–13 699
333.40. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: 1999–2000 through 2012–13. 700
333.50. Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and classification of institution: 2012–13 702
333.55. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999–2000 through 2012–13. 703
333.60. Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and classification of institution: 2012–13 704
333.70. Revenue received from the federal government by the 120 degree-granting postsecondary institutions receiving the largest amounts, by control and rank order: 2012–13 705

333.80. Voluntary support for degree-granting postsecondary institutions, by source and purpose of support: Selected years, 1949–50 through 2012–13 706
333.90. Endowment funds of the 120 degree-granting postsecondary institutions with the largest endowments, by rank order: Fiscal year 2013 707

Expenditures

334.10. Expenditures of public degree-granting postsecondary institutions, by purpose of expenditure and level of institution: 2006–07 through 2012–13 708
334.20. Expenditures of public degree-granting postsecondary institutions, by level of institution, purpose of expenditure, and state or jurisdiction: 2009–10 through 2012–13 710
334.30. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and level of institution: 1999–2000 through 2012–13. 711
334.40. Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and classification of institution: 2012–13 713
334.50. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: 1999–2000 through 2012–13 714
334.60. Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and classification of institution: 2012–13. 716
334.70. Total expenditures of private nonprofit and for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1999–2000 through 2012–13. 717

Chapter 4. Federal Funds for Education and Related Activities

On-Budget and Off-Budget Support

401.10. Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2014 729
401.20. Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2013 . . . 731
401.30. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2014 733
401.60. U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2013. 740
401.70. Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2013 and 2014. 741

Federal Obligations for Research and Development

402.10. Federal obligations for research, development, and R&D plant, by category of obligation, performers, and fields of science: Fiscal years 2006 through 2014. 742

Chapter 5. Outcomes of Education

Labor Force Status by Educational Attainment

501.10. Labor force participation, employment, and unemployment of persons 25 to 64 years old, by sex, race/ethnicity, age group, and educational attainment: 2011, 2012, and 2013 750
501.20. Labor force participation, employment, and unemployment of persons 16 to 24 years old who are not enrolled in school, by age group, sex, race/ethnicity, and educational attainment: 2011, 2012, and 2013 752
501.30. Number and percentage of persons 16 to 24 years old who were neither enrolled in school nor working, by educational attainment, age group, family poverty status, and race/ethnicity: 2014 754
501.40. Percentage distribution of 25- to 34-year-olds with various levels of educational attainment, by labor force status, sex, race/ethnicity, and U.S. nativity and citizenship status: 2013 755

501.50. Employment to population ratios of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014 756
501.60. Employment to population ratios of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014 757
501.70. Employment to population ratios of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014 758
501.80. Unemployment rates of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014. 759
501.85. Unemployment rates of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014. 760
501.90. Unemployment rates of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2014. 761

Occupation and Earnings by Educational Attainment

502.10. Occupation of employed persons 25 years old and over, by highest level of educational attainment and sex: 2013. 762
502.20. Median annual earnings, number, and percentage of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2013 763
502.30. Median annual earnings of full-time year-round workers 25 to 34 years old and full-time year-round workers as a percentage of the labor force, by sex, race/ethnicity, and educational attainment: Selected years, 1995 through 2013. 767
502.40. Annual earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2013 770

Employment of Students

503.10. Percentage of high school students age 16 and over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week: Selected years, 1970 through 2013 . . . 772
503.20. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and control and level of institution: Selected years, October 1970 through 2013 774
503.30. Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and selected characteristics: October 2011 through 2013 775

Labor Force Status of Recent High School Completers and Dropouts

504.10. Labor force status of 2011, 2012, and 2013 high school completers, by college enrollment status, sex, and race/ethnicity: October 2011, 2012, and 2013. 776
504.20. Labor force status of high school dropouts, by sex and race/ethnicity: Selected years, October 1980 through 2013. 778
504.30. Among special education students out of high school up to 8 years, percentage attending and completing postsecondary education, living independently, and working competitively, by type of disability: 2007 and 2009 779

Labor Market Outcomes for Recent Bachelor's Degree Completers

505.10. Number, percentage distribution, unemployment rates, and median earnings of 25- to 29-year-old bachelor's degree holders and percentage of degree holders among all 25- to 29-year-olds, by field of study: 2009 and 2013. 780
505.20. Unemployment rate of 25- to 34-year-olds with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2013 782
505.30. Among employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, and U.S. nativity and citizenship status: 2013. 783

505.31. Among employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, and U.S. nativity and citizenship status: 2012 784
505.40. Percentage distribution of recipients of bachelor's degrees in various fields of study 1 year after graduation, by time to completion, enrollment and employment status, and occupation: 2001 and 2009 785
505.50. Percentage, selected employment characteristics, and annual salaries of bachelor's degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009 . . 786

Attitudes of Young Adults

506.10. Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004 787

Skills of Adults and Continuing Education

507.10. Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 788
507.20. Participants in state-administered adult basic education, secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 2000 through 2012 789
507.30. Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: 1995, 1999, and 2005 790
507.40. Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 793

Chapter 6. International Comparisons of Education

Population, Enrollment, and Teachers

601.10. Population, school enrollment, and number of teachers, by major areas of the world and level of education: Selected years, 1980 through 2012 802
601.20. Selected population and enrollment statistics for countries with populations of at least 10 million in 2012, by continent and country: Selected years, 1990 through 2012 803
601.30. School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2011 806
601.35. Percentage of 3- and 4-year-olds and 5- to 14-year-olds enrolled in school, by country: 2000 through 2012 807
601.40. Percentage of the population enrolled in secondary and postsecondary education, by age group and country: Selected years, 2002 through 2012 808
601.50. Pupil/teacher ratios in public and private elementary and secondary schools, by level of education and country: Selected years, 2000 through 2012 809
601.60. Teachers' statutory teaching and total working time and average class size in public elementary and secondary schools, by level of education and country: 2012 810

Achievement and Instruction

602.10. Average reading literacy scale scores of fourth-graders and percentage whose schools emphasize reading skills and strategies at or before second grade or at third grade, by sex and country or other education system: 2001, 2006, and 2011 811
602.20. Average fourth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2011 812
602.30. Average eighth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2011 813
602.40. Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by sex and country or other education system: 2009 and 2012 815

602.50. Average reading literacy scores of 15-year-old students and percentage attaining reading literacy proficiency levels, by country or other education system: 2012 816
602.60. Average mathematics literacy scores of 15-year-old students and percentage attaining mathematics literacy proficiency levels, by country or other education system: 2012 818
602.70. Average science literacy scores of 15-year-old students and percentage attaining science literacy proficiency levels, by country or other education system: 2012 820

Attainment, Degrees, and Outcomes

603.10. Percentage of the population 25 to 64 years old who completed high school, by age group and country: Selected years, 2001 through 2012 822
603.20. Percentage of the population 25 to 64 years old who attained selected levels of postsecondary education, by age group and country: 2001 and 2012 823
603.30. Percentage of the population 25 to 64 years old who attained a bachelor's or higher level degree, by age group and country: Selected years, 1999 through 2012 824
603.40. Percentage of the population 25 to 64 years old who attained a postsecondary vocational degree, by age group and country: Selected years, 1999 through 2012 825
603.50. Number of bachelor's degree recipients per 100 persons at the typical minimum age of graduation, by sex and country: Selected years, 2005 through 2012 826
603.60. Percentage of bachelor's and higher degrees awarded to women, by field of study and country: 2012 . . 827
603.70. Percentage of bachelor's degrees awarded in mathematics, science, and engineering, by field of study and country: Selected years, 1990 through 2011 828
603.80. Percentage of graduate degrees awarded in mathematics, science, and engineering, by field of study and country: Selected years, 1990 through 2011 829
603.90. Employment to population ratios of 25- to 64-year-olds, by sex, highest level of educational attainment, and country: 2012 830

Finances

605.10. Gross domestic product per capita and public and private education expenditures per full-time-equivalent (FTE) student, by level of education and country: Selected years, 2005 through 2011 831
605.20. Public and private direct expenditures on education institutions as a percentage of gross domestic product, by level of education and country: Selected years, 1995 through 2011 833

Chapter 7. Libraries and Internet Use

Libraries

701.10. Selected statistics on public school libraries/media centers, by level of school: Selected years, 1999–2000 through 2011–12 836
701.20. Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2011–12 837
701.30. Selected statistics on public school libraries/media centers, by state: 2011–12 838
701.40. Collections, staff, and operating expenditures of degree-granting postsecondary institution libraries: Selected years, 1981–82 through 2011–12 839
701.50. Collections, staff, operating expenditures, public service hours, and reference services of the 60 largest college and university libraries: Fiscal year 2012 840
701.60. Public libraries, books and serial volumes, and per capita usage of selected library services per year, by state: Fiscal years 2011 and 2012 841

Computer and Internet Use

702.10. Number and percentage of persons age 3 and over using the Internet and percentage distribution by means of internet access from home and main reason for not having high-speed access, by selected age groups and other characteristics of all users and of students: 2013 842

READER'S GUIDE

Data Sources

The data in this edition of the *Digest of Education Statistics* were obtained from many different sources—including students and teachers, state education agencies, local elementary and secondary schools, and colleges and universities—using surveys and compilations of administrative records. Users should be cautious when comparing data from different sources. Differences in aspects such as procedures, timing, question phrasing, and interviewer training can affect the comparability of results across data sources.

Most of the tables present data from surveys conducted by the National Center for Education Statistics (NCES) or conducted by other agencies and organizations with support from NCES. Some tables also include other data published by federal and state agencies, private research organizations, or professional organizations. Totals reported in the *Digest* are for the 50 states and the District of Columbia unless otherwise noted. Brief descriptions of the surveys and other data sources used in this volume can be found in Appendix A: Guide to Sources. For each NCES and non-NCES data source, the Guide to Sources also provides information on where to obtain further details about that source.

Data are obtained primarily from two types of surveys: universe surveys and sample surveys. In universe surveys, information is collected from every member of the population. For example, in a survey regarding certain expenditures of public elementary and secondary schools, data would be obtained from each school district in the United States. When data from an entire population are available, estimates of the total population or a subpopulation are made by simply summing the units in the population or subpopulation. As a result, there is no sampling error, and observed differences are reported as true.

Since a universe survey is often expensive and time consuming, many surveys collect data from a sample of the population of interest (sample survey). For example, the National Assessment of Educational Progress (NAEP) assesses a representative sample of students rather than the entire population of students. When a sample survey is used, statistical uncertainty is introduced, because the data come from only a portion of the entire population. This statistical uncertainty must be considered when reporting estimates and making comparisons. For information about how NCES accounts for statistical uncertainty when reporting sample survey results, see "Data Analysis and Interpretation," later in this Reader's Guide.

Common Measures and Indexes

Various types of statistics derived from universe and sample surveys are reported. Many tables report the size of a population or a subpopulation, and often the size of a subpopulation is expressed as a percentage of the total population.

In addition, the average (or *mean*) value of some characteristic of the population or subpopulation may be reported. The average is obtained by summing the values for all members of the population and dividing the sum by the size of the population. An example is the average annual salary of full-time instructional faculty at degree-granting postsecondary institutions. Another measure that is sometimes used is the *median.* The median is the midpoint value of a characteristic at or above which 50 percent of the population is estimated to fall, and at or below which 50 percent of the population is estimated to fall. An example is the median annual earnings of young adults who are full-time year-round workers. Some tables also present an *average per capita,* or per person, which represents an average computed for every person in a specified group or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population. An example is the per capita expenditure on education in each state.

Many tables report financial data in dollar amounts. Unless otherwise noted, all financial data are in *current dollars,* meaning not adjusted for changes in the purchasing power of the dollar over time due to inflation. For example, 1993–94 teacher salaries in current dollars are the amounts that the teachers earned in 1993–94, without any adjustments to account for inflation. *Constant dollar* adjustments attempt to remove the effects of price changes (inflation) from statistical series reported in dollars. For example, if teacher salaries over a 20-year period are adjusted to constant 2013–14 dollars, the salaries for all years are adjusted to the dollar values that presumably would exist if prices in each year were the same as in 2013–14, in other words, as if the dollar had constant purchasing power over the entire period. Any changes in the constant dollar amounts would reflect only changes in real values. Constant dollar amounts are computed using *price indexes.* Price indexes for inflation adjustments can be found in table 106.70. Each table that presents constant dollars includes a note indicating which index was used for the inflation adjustments; in most cases, the Consumer Price Index was used.

When presenting data for a time series, some tables include both *actual* and *projected* data. Actual data are data that have already been collected. Projected data can be used when data for a recent or future year are not yet available. Projections are estimates that are based on recent trends in relevant statistics and patterns associated with correlated variables. Unless otherwise noted, all data in this volume are actual.

Standard Errors

Using estimates calculated from data based on a sample of the population requires consideration of several factors before the estimates become meaningful. When using data from a sample, some margin of error will always be present in estimations of characteristics of the total population or subpopulation because the data are available from only a portion of the total population. Consequently, data from samples can provide only an approximation of the true or actual value. The margin of error of an estimate, or the range of potential true or actual values, depends on several factors such as the amount of variation in the responses, the size and representativeness of the sample, and the size of the subgroup for which the estimate is computed. The magnitude of this margin of error is measured by what statisticians call the "standard error" of an estimate.

When data from sample surveys are reported, the standard error is calculated for each estimate. In the tables, the standard error for each estimate generally appears in parentheses next to the estimate to which it applies. In order to caution the reader when interpreting findings, estimates from sample surveys are flagged with a "!" when the standard error is between 30 and 50 percent of the estimate, and suppressed with a "‡" when the standard error is 50 percent of the estimate or greater. The term "coefficient of variation (CV)" refers to the ratio of the standard error to the estimate; for example, if an estimate has a CV of 30 percent, this means that the standard error is equal to 30 percent of the value of the estimate.

Nonsampling Errors

In addition to standard errors, which apply only to sample surveys, all surveys are subject to nonsampling errors. Nonsampling errors may arise when individual respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond, either totally or partially. Total nonresponse means that people do not respond to the survey at all, while partial nonresponse (or item nonresponse) means that people fail to respond to specific survey items. To compensate for nonresponse, adjustments are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the "average" questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey characteristics. For sample surveys, total nonresponse is handled through nonresponse adjustments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For additional general information about imputations, see the *NCES Statistical Standards* (NCES 2014-097). Appendix A: Guide to Sources includes some information about specific surveys' response rates, nonresponse adjustments, and other efforts to reduce nonsampling error. Although the magnitude of nonsampling error is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

Data Analysis and Interpretation

When estimates are from a sample, caution is warranted when drawing conclusions about one estimate in comparison to another, or about whether a time series of estimates is increasing, decreasing, or staying the same. Although one estimate may appear to be larger than another, a statistical test may find that the apparent difference between them is not reliably measurable due to the uncertainty around the estimates. In this case, the estimates will be described as having no measurable difference, meaning that the difference between them is not statistically significant.

Whether differences in means or percentages are statistically significant can be determined using the standard errors of the estimates. In reports produced by NCES, when differences are statistically significant, the probability that the difference occurred by chance is less than 5 percent, according to NCES standards.

Data presented in the text do not investigate more complex hypotheses, account for interrelationships among variables, or support causal inferences. We encourage readers who are interested in more complex questions and in-depth analysis to explore other NCES resources, including publications, online data tools, and public- and restricted-use datasets at http://nces.ed.gov.

In text that reports estimates based on samples, differences between estimates (including increases and decreases) are stated only when they are statistically significant. To determine whether differences reported are statistically significant, two-tailed *t* tests at the .05 level are typically used. The *t* test formula for determining statistical significance is adjusted when the samples being compared are dependent. The *t* test formula is not adjusted for multiple comparisons, with the exception of statistical tests conducted using the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). When the variables to be tested are postulated to form a trend, the relationship may be tested using linear regression, logistic regression, or ANOVA trend analysis instead of a series of *t* tests. These alternate methods of analysis test for specific relationships (e.g., linear, quadratic, or cubic) among variables. For more information on data analysis, please see the NCES Statistical Standards, Standard 5-1, available at http://nces.ed.gov/statprog/2012/pdf/Chapter5.pdf.

A number of considerations influence the ultimate selection of the data years to include in the tables and to feature in the text. To make analyses as timely as possible, the latest year of available data is shown. The choice of comparison years is often also based on the need to show the earliest available survey year, as in the case of NAEP and the international assessment surveys. The text typically compares the most current year's data with those from the initial year and then with those from a more recent year. In the case of surveys with long time frames, such as surveys measuring enrollment, changes over the course of a decade may be noted in the text. Where applicable, the text may also note years in which the data begin to diverge from previous trends. In figures and tables, intervening years are selected in increments in order to show the general trend.

Rounding and Other Considerations

All calculations are based on unrounded estimates. Therefore, the reader may find that a calculation, such as a difference or a percentage change, cited in the text or a figure may not be identical to the calculation obtained by using the rounded values shown in the accompanying tables. Although values reported in the tables are generally rounded to one decimal place (e.g., 76.5 percent), values reported in the text are generally rounded to whole numbers (with any value of 0.50 or above rounded to the next highest whole number). Due to rounding, cumulative percentages may sometimes equal 99 or 101 percent rather than 100 percent.

Race and Ethnicity

The Office of Management and Budget (OMB) is responsible for the standards that govern the categories used to collect and present federal data on race and ethnicity. The OMB revised the guidelines on racial/ethnic categories used by the federal government in October 1997, with a January 2003 deadline for implementation. The revised standards require a minimum of these five categories for data on race: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White. The standards also require the collection of data on the ethnicity categories Hispanic or Latino and Not Hispanic or Latino. It is important to note that Hispanic origin is an ethnicity rather than a race, and therefore persons of Hispanic origin may be of any race. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. The race categories White, Black, Asian, Native Hawaiian or Other Pacific Islander, and American Indian or Alaska Native exclude persons of Hispanic origin unless otherwise noted.

For a description of each racial/ethnic category, please see the "Racial/ethnic group" entry in Appendix B: Definitions. Some of the category labels are shortened for more concise presentation in text, tables, and figures. American Indian or Alaska Native is denoted as American Indian/Alaska Native (except when separate estimates are available for American Indians alone or Alaska Natives alone); Black or African American is shortened to Black; and Hispanic or Latino is shortened to Hispanic. When discussed separately from Asian estimates, Native Hawaiian or Other Pacific Islander is shortened to Pacific Islander.

Many of the data sources used for this volume are federal surveys that collect data using the OMB standards for racial/ethnic classification described above; however, some sources have not fully adopted the standards, and some tables include historical data collected prior to the adoption of the OMB standards. Asians and Pacific Islanders are combined into a single category for years in which the data were not collected separately for the two groups. The combined category can sometimes mask significant differences between the two subgroups. For example, prior to 2011, NAEP collected data that did not allow for separate reporting of estimates for Asians and Pacific Islanders. The population counts presented in table 101.20, based on the U.S. Census Bureau's Current Population Reports, indicate that 96 percent of all Asian/Pacific Islander 5- to 17-year-olds were Asian in 2013. Thus, the combined category for Asians/Pacific Islanders is more representative of Asians than of Pacific Islanders.

Some surveys give respondents the option of selecting more than one race category, an "other" race category, or a "Two or more races" or "multiracial" category. Where possible, tables present data on the "Two or more races" category; however, in some cases this category may not be separately shown because the information was not collected or due to other data issues. Some tables include the "other" category. Any comparisons made between persons of one racial/ethnic group and persons of "all other racial/ethnic groups" include only the racial/ethnic groups shown in the reference table. In some surveys, respondents are not given the option to select more than one race category and also are not given an option such as "other" or "multiracial." In these surveys, respondents of Two or more races must select a single race category. Any comparisons between data from surveys that give the option to select more than one race and surveys that do not offer such an option should take into account the fact that there is a potential for bias if members of one racial group are more likely than members of the others to identify themselves as "Two or more races."[1] For postsecondary data, foreign students are counted separately and are therefore not included in any racial/ethnic category.

In addition to the major racial/ethnic categories, several tables include Hispanic ancestry subgroups (such as Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, Other Central American, and South American) and Asian ancestry subgroups (such as Asian Indian, Chinese, Filipino, Japanese, Korean, and Vietnamese). In addition, selected tables include "Two or more races" subgroups (such as White and Black, White and Asian, and White and American Indian/Alaska Native).

[1]For discussion of such bias in responses to the 2000 Census, see Parker, J. et al. (2004). Bridging Between Two Standards for Collecting Information on Race and Ethnicity: An Application to Census 2000 and Vital Rates. *Public Health Reports, 119*(2): 192–205. Available at http://www.pubmedcentral.nih.gov/articlerender.fcgi?artid=1497618.

Limitations of the Data

Due to large standard errors, some differences that seem substantial are not statistically significant and, therefore, are not cited in the text. This situation often applies to estimates involving American Indians/Alaska Natives and Pacific Islanders. The relatively small sizes of these populations pose many measurement difficulties when conducting statistical analysis. Even in larger surveys, the numbers of American Indians/Alaska Natives and Pacific Islanders included in a sample are often small. Researchers studying data on these two populations often face small sample sizes that increase the size of standard errors and reduce the reliability of results. Readers should keep these limitations in mind when comparing estimates presented in the tables.

As mentioned, caution should be exercised when comparing data from different sources. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. For example, the racial/ethnic categories presented to a respondent, and the way in which the question is asked, can influence the response, especially for individuals who consider themselves of mixed race or ethnicity. In addition, data on American Indians/Alaska Natives are often subject to inaccuracies that can result from respondents self-identifying their race/ethnicity. Research on the collection of race/ethnicity data suggests that the categorization of American Indian and Alaska Native is the least stable self-identification (for example, the same individual may identify as American Indian when responding to one survey, but may not do so on a subsequent survey).[2]

[2]See U.S. Department of Labor, Bureau of Labor Statistics (1995). *A Test of Methods for Collecting Racial and Ethnic Information* (USDL 95-428). Washington DC: Author.

INTRODUCTION

The Introduction provides a brief overview of current trends in American education, highlighting key data that are presented in more detail later in this volume. Topics outlined include the participation of students, teachers, and faculty in U.S. educational institutions; the performance of U.S. elementary/secondary students overall and in comparison to students in other countries; the numbers of high school graduates and postsecondary degrees; and the amounts of expenditures on education at the elementary/secondary and postsecondary levels.

In fall 2014, about 75.2 million people were enrolled in American schools and colleges (table 105.10). About 4.6 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.3 million. All data for 2014 in this Introduction are projected, except for data on educational attainment. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

Elementary/Secondary Education

Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985, but enrollment stabilized at 49.3 million between 2006 and 2008, before beginning to increase again (table 105.30). Overall, public school enrollment rose 27 percent, from 39.4 million to 50.0 million, between 1985 and 2014. Private school enrollment fluctuated during this period, with the fall 2014 enrollment of 5.0 million being 10 percent lower than the enrollment of 5.6 million in 1985. About 9 percent of elementary and secondary school students were enrolled in private schools in 2014, reflecting a decrease from 12 percent in 1985.

In public schools between 1985 and 2014, there was a 30 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 20 percent increase in secondary enrollment (grades 9 through 12) (table 105.30). Part of the higher growth in public elementary school enrollment resulted from the expansion of prekindergarten enrollment (table 203.10). Between fall 1985 and fall 2012, enrollment in prekindergarten increased 764 percent, while enrollment in other elementary grades (including kindergarten through grade 8 plus ungraded elementary programs) increased 25 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.3 million in 2012, and the number enrolled in other elementary grades increased from 26.9 million to 33.7 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then increased 33 percent from 1990 to 2007, before declining 2 percent from 2007 to 2014 (table 105.30). Between 1990 and 2014, the net increase in public secondary school enrollment was 31 percent, compared with an 18 percent increase in public elementary school enrollment. Over the most recent 10-year period (between 2004 and 2014), public school enrollment rose 2 percent. Elementary enrollment increased 3 percent over this period, while secondary enrollment was 1 percent higher in 2014 than in 2004.

Since the enrollment rates of 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds changed by less than 3 percentage points from 1985 to 2013, increases in public elementary and secondary school enrollment primarily reflect increases in the number of children in the population in these age groups (tables 101.10 and 103.20). For example, the enrollment rate of 7- to 13-year-olds decreased from 99 to 98 percent between 1985 and 2013, but the number of 7- to 13-year-olds increased by 25 percent. Increases in both the enrollment rate of 3- and 4-year-old children (from 39 percent in 1985 to 55 percent in 2013) and the number of children in this age group (from 7.1 million to 8.0 million) also contributed to overall enrollment increases.

The National Center for Education Statistics (NCES) projects record levels of total public elementary and secondary enrollment from 2014 (50.0 million) through at least 2024 (52.9 million) (table 105.30). The total public school enrollment projected for fall 2014 is a record-high number, and new records are expected every year through 2024, the last year for which NCES enrollment projections have been developed. Public elementary school enrollment (prekindergarten through grade 8) is projected to increase 7 percent between 2014 and 2024. Public secondary school enrollment (grades 9 through 12) is expected to increase 3 percent between 2014 and 2024. Overall, total public school enrollment is expected to increase 6 percent between 2014 and 2024.

Teachers

About 3.5 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2014 (table 105.40). This number is less than 1 percent lower than in fall 2004. The 2014 number of FTE teachers includes 3.1 million public school teachers and 0.4 million private school teachers.

Public school enrollment was about 2 percent higher in 2014 than in 2004, while the number of public school teachers was about 1 percent higher (table 208.20). In fall 2014, the number of public school pupils per teacher was 16.0, which was higher than the ratio of 15.8 in 2004.

The average salary for public school teachers in 2013–14 was $56,689 in current dollars (i.e., dollars that are not adjusted for inflation) (table 211.50). In constant (i.e., inflation-adjusted) dollars, the average salary for teachers was 2 percent lower in 2013–14 than in 1990–91.

Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in subjects including reading, mathematics, science, and writing, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only selected results from the national main and state NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the *Digest*) are based on statistical testing of unrounded values.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500. In 2013, the average reading score for 4th-grade students (222) was not measurably different from the 2011 score, but it was higher than the scores on assessments between 1992 (217) and 2009 (221) (table 221.10). At grade 4, only the average reading scores for White students were higher in 2013 (232) than in both 2011 (231) and 1992 (224). The 2013 scores for Black (206), Hispanic (207), and Asian/Pacific Islander (235) 4th-graders were not measurably different from the 2011 scores, but the 2013 scores were higher than the 1992 scores (192, 197, and 216, respectively). For 8th-grade students, the average reading score in 2013 (268) was more than 2 points higher than in 2011 (265), was 8 points higher than in 1992 (260), and was higher than the average scores in all previous years. At grade 8, the average reading scores for White (276), Black (250), Hispanic (256), and Asian/Pacific Islander (280) students were higher in 2013 than in 2011 and 1992. For 12th-grade students, the average reading score in 2013 (288) was not measurably different from the score in 2009 (12th-graders were not assessed in 2011), but was lower than the score in 1992 (292). At grade 12, the 2013 average reading scores for White (297), Hispanic (276), and Asian/Pacific Islander (296) students were not measurably different from either the 2009 scores or the 1992 scores. The 2013 reading score for Black students (268) was not measurably different from the score in 2009, but was lower than the score in 1992 (273).

From 2011 to 2013, there was no measurable change in the average reading score for 4th-grade public school students nationally. However, average scores at grade 4 were higher in 2013 than in 2011 in 7 states (Colorado, Indiana, Iowa, Maine, Minnesota, Tennessee, and Washington) plus the District of Columbia and the Department of Defense dependents schools; scores were lower in 2013 than in 2011 in 3 states (Massachusetts, Montana, and North Dakota) (table 221.40). At grade 8, the average reading score for public school students nationally was 2 points higher in 2013 than in 2011, and 12 states (Arkansas, California, Florida, Hawaii, Iowa, Nevada, New Hampshire, Oregon, Pennsylvania, Tennessee, Utah, and Washington) plus the District of Columbia and the Department of Defense dependents schools had higher scores in 2013 than in 2011 (table 221.60). In the other states, scores did not change measurably from 2011 to 2013.

Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500. In 2013, the average NAEP mathematics scores for 4th-grade and 8th-grade students were higher than the average scores in all previous assessment years (table 222.10). The average 4th-grade NAEP mathematics score increased from 213 in 1990 (the first assessment year) to 242 in 2013, an increase of 28 points (based on unrounded scores). During that same period, the average 8th-grade score increased by 22 points, from 263 to 285. At grade 4, the average mathematics scores in 2013 for White (250) and Hispanic students (231) were higher than the scores in both 2011 and 1990. The 2013 score for Black 4th-graders (224) was not measurably different from the 2011 score, but it was higher than the 1990 score. The 2013 score for Asian 4th-graders (259) was also not measurably different from the 2011 score; prior to 2011, separate data on Asians were not available. At grade 8, the average mathematics scores in 2013 for all racial/ethnic groups were not measurably different from the 2011 scores. However, the 2013 scores for White (294), Black (263), and Hispanic (272) 8th-graders were higher than the scores in 1990. Due to changes in the 12th-grade mathematics assessment framework, a new trend line started in 2005, with data reported on a scale of 0 to 300. The average 12th-grade mathematics score in 2013 (153) was not measurably different from the score in 2009, but was higher than the score in 2005 (150).

NAEP results also permit state-level comparisons of the mathematics achievement of 4th- and 8th-grade students in public schools (tables 222.50 and 222.60). The average mathematics scores for 4th-grade public school students increased from 2011 to 2013 in 14 states (Arizona, Colorado, Delaware, Hawaii, Indiana, Iowa, Minnesota, Nebraska, New York, North Dakota, Tennessee, Washington, West Virginia, and Wyoming) and the District of Columbia and did not decrease for any states. At grade 8, scores were higher in 2013 than in 2011 in five states (Florida, Hawaii, New Hampshire, Pennsylvania, and Tennessee), the District of Columbia, and the Department of Defense dependents schools, and scores decreased in three states (Montana, Oklahoma, and South Dakota).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. The main NAEP science assessment data are reported on a scale of 0 to 300. The average 8th-grade science score increased from 150 in 2009 to 152 in 2011 (table 223.10). Average scores for both male and female students were higher in 2011 than in 2009. Male students scored 5 points higher on average than female students in 2011, which was not significantly different from the 4-point gap in 2009. Score gaps between White and Black students and between White and Hispanic students narrowed from 2009 to 2011. The 5-point gain from 2009 to 2011 for Hispanic students was larger than the 1-point gain for White students, narrowing the score gap from 30 points to 27 points. Black students scored 3 points higher in 2011 than in 2009. The 35-point score gap between White and Black students in 2011 was smaller than the 36-point gap in 2009. The average scores of Asian/Pacific Islander and American Indian/Alaska Native students were not significantly different in 2011 from their scores in 2009.

International Comparisons

The 2011 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grade 4 in 45 countries and at grade 8 in 38 countries. In addition to countries, a number of subnational entities—including the public school systems in several U.S. states—also participated in TIMSS as separate education systems. Results for the participating states are included in the discussion in chapter 6 of the *Digest*, while this Introduction includes only results for the United States and other countries. TIMSS assessments are curriculum based and measure what students have actually learned against the subject matter that is expected to be taught in the participating countries by the end of grades 4 and 8. At both grades, TIMSS scores are reported on a scale of 0 to 1,000, with the scale average set at 500.

On the 2011 TIMSS, the average mathematics scores of U.S. 4th-graders (541) and 8th-graders (509) were higher than the scale average (tables 602.20 and 602.30). U.S. 4th-graders scored higher in mathematics, on average, than their counterparts in 37 countries and lower than those in 3 countries (table 602.20). Average mathematics scores in the other 4 countries were not measurably different from the U.S. average. At grade 8, the average U.S. mathematics score was higher than the average scores of students in 27 countries in 2011 and below the average scores of students in 4 countries (table 602.30). Average 8th-grade mathematics scores in the other 6 countries were not measurably different from the U.S. average. The average science scores of both U.S. 4th-graders (544) and U.S. 8th-graders (525) were higher than the TIMSS scale average of 500 in 2011. The average U.S. 4th-grade science score was higher than the average scores of students in 39 countries and lower than those of students in 5 countries. At grade 8, the average U.S. science score was higher than the average scores of students in 28 countries, lower than those in 6 countries, and not measurably different from those in the other 3 countries.

The Program for International Student Assessment (PISA), coordinated by the Organization for Economic Cooperation and Development (OECD), has measured the performance of 15-year-old students in reading, mathematics, and science literacy every 3 years since 2000. PISA assesses 15-year-old students' application of reading, mathematics, and science literacy to problems within a real-life context. In 2012, PISA assessed students in the 34 OECD countries as well as in a number of other education systems. Some subnational entities participated as separate education systems, including public school systems in the U.S. states of Connecticut, Florida, and Massachusetts. Results for the participating U.S. states are included in the discussion in chapter 6, while this Introduction includes only results for the United States in comparison with other OECD countries. PISA scores are reported on a scale of 0 to 1,000.

On the 2012 PISA assessment, U.S. 15-year-olds' average score in reading literacy was 498, which was not measurably different from the OECD average of 496 (table 602.50). The average reading literacy score in the United States was lower than the average score in 13 of the 33 other OECD countries, higher than the average score in 10 of the other OECD countries, and not measurably different from the average score in 10 of the OECD countries. In all countries, females outperformed males in reading (table 602.40). The U.S. gender gap in reading (31 points) was smaller than the OECD average gap (38 points) and smaller than the gaps in 14 of the OECD countries.

In mathematics literacy, U.S. 15-year-olds' average score of 481 on the 2012 PISA assessment was lower than the OECD average score of 494 (table 602.60). The average mathematics literacy score in the United States was lower than the average in 21 of the 33 other OECD countries, higher than the average in 5 OECD countries, and not measurably different from the average in 7 OECD countries. In 25 of the OECD countries, males outperformed females in mathematics literacy (table 602.40). In the United States, however, the average score of males (484) was not measurably different from that of females (479).

In science literacy, U.S. 15-year-olds' average score of 497 was not measurably different from the OECD average score of 501 (table 602.70). The average science literacy score in the United States was lower than the average in 15 OECD countries, higher than the average in 8 OECD countries, and not measurably different from the average in 10 OECD countries.

The Progress in International Reading Literacy Study (PIRLS) measures the reading knowledge and skills of 4th-graders over time. PIRLS scores are reported on a scale from 0 to 1,000, with the scale average set at 500. On the 2011 PIRLS, U.S. 4th-graders had an average reading literacy score of 556 (table 602.10). The U.S. average score in 2011 was 14 points higher than in 2001 and 16 points higher than in 2006. In all three assessment years, the U.S. average score was higher than the PIRLS scale average. In 2011, PIRLS assessed 4th-grade reading literacy in 40 countries. The average reading literacy score of 4th-graders in the United States was higher than the average score in 33 of the 39 other participating countries, lower than the average score in 3 countries, and not measurably different from the average in the remaining 3 countries.

High School Graduates and Dropouts

About 3,323,000 U.S. high school students are expected to graduate during the 2014–15 school year (table 219.10), including about 3,031,000 public school graduates and 291,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2014–15 is lower than the record high in 2011–12, but exceeds the baby boom era's high point in 1975–76, when 3,142,000 students earned diplomas. In 2011–12, an estimated 80.8 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year.

The number of GED credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service.[1] Between 2003 and 2013, the number of persons passing the GED tests increased by 40 percent, from 387,000 to 541,000.

The percentage of dropouts among 16- to 24-year-olds (known as the status dropout rate) has decreased over the past 20 years (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16- to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts in this measure.) Between 1990 and 2013, the status dropout rate declined from 12.1 percent to 6.8 percent (table 219.70). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates in 2013 (7.3 and 11.7 percent, respectively) remained higher than the rate for Whites (5.1 percent).

[1]Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

Postsecondary Education

College Enrollment

College enrollment was 20.4 million in fall 2013, which was 3 percent lower than the record enrollment in fall 2010 (table 105.30). College enrollment is expected to set new records from fall 2018 through fall 2024, the last year for which NCES enrollment projections have been developed. Between fall 2013 and fall 2024, enrollment is expected to increase by 14 percent. Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 101.10 and 105.30). The traditional college-age population rose 9 percent between 2003 and 2013, and total college enrollment increased 20 percent during the same period. Between 2003 and 2013, the number of full-time students increased by 22 percent, compared with an 18 percent increase in part-time students (table 303.10). During the same time period, the number of males enrolled increased 22 percent, and the number of females enrolled increased 19 percent.

Faculty

In fall 2013, degree-granting institutions—defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs—employed 1.5 million faculty members, including 0.8 million full-time and 0.8 million part-time faculty (table 314.30). In addition, degree-granting institutions employed 0.4 million graduate assistants.

Postsecondary Degrees

During the 2014–15 academic year, postsecondary degrees conferred were projected to number 949,000 associate's degrees, 1,852,000 bachelor's degrees, 778,000 master's degrees, and 178,000 doctor's degrees (table 318.10). The doctor's degree total includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees. Between 2002–03 and 2012–13 (the last year of actual data), the number of degrees conferred increased at all levels. The number of associate's degrees was 59 percent higher in 2012–13 than in 2002–03, the number of bachelor's degrees was 36 percent higher, the number of master's degrees was 45 percent higher, and the number of doctor's degrees was 44 percent higher.

Between 2002–03 and 2012–13, the number of bachelor's degrees awarded to males increased 37 percent, while the number of bachelor's degrees awarded to females increased 36 percent. Females earned 57 percent of all bachelor's degrees in 2012–13, the same percentage as in 2002–03. Between 2002–03 and 2012–13, the number of White students earning bachelor's degrees increased 23 percent, compared with larger increases of 54 percent for Black students, 110 percent for Hispanic students, and 48 percent for Asian/Pacific Islander students (table 322.20). The number of American Indian/Alaska Native students earning bachelor's degrees increased 16 percent over the same period. In 2012–13, White students earned 69 percent of all bachelor's degrees awarded (vs. 76 percent in 2002–03), Black students earned 11 percent (vs. 10 percent in 2002–03), Hispanic students earned 11 percent (vs. 7 percent in 2002–03), and Asian/Pacific Islander students earned about 7 percent (increasing their share of the degrees from 6.7 percent in 2002–03 to 7.3 percent in 2012–13). American Indian/Alaska Native students earned less than 1 percent of the degrees in both years.

Undergraduate Prices

For the 2013–14 academic year, annual prices for undergraduate tuition, fees, room, and board were estimated to be $15,640 at public institutions, $40,614 at private nonprofit institutions, and $23,135 at private for-profit institutions in current dollars (table 330.10). Between 2003–04 and 2013–14, prices for undergraduate tuition, fees, room, and board at public institutions rose 34 percent, and prices at private nonprofit institutions rose 25 percent, after adjustment for inflation. Prices for total tuition, fees, room, and board at private for-profit institutions decreased 16 percent between 2003–04 and 2013–14.

Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 2004 and 2014, the percentage of the adult population 25 years of age and over who had completed high school rose from 85 percent to 88 percent, and the percentage of adults with a bachelor's degree increased from 28 percent to 32 percent (table 104.10). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school increased from 87 percent in 2004 to 91 percent in 2014 (table 104.20). The percentage of young adults who had completed a bachelor's degree increased from 29 percent in 2004 to 34 percent in 2014.

Education Expenditures

Expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), were an estimated $1.2 trillion for 2013–14 (table 106.10). Expenditures of elementary and secondary schools totaled an estimated $682 billion, while those of degree-granting postsecondary institutions totaled an estimated $512 billion. Total expenditures for education were an estimated 7.1 percent of the gross domestic product in 2013–14. The percentage of GDP was higher in 2009–10 (7.6) than in 2003–04 (7.2); however, the percentage has declined since 2009–10.

CHAPTER 1
All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, and population. Economic indicators and price indexes have been added to facilitate analyses.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

The U.S. System of Education

The U.S. system of education can be described as having three levels of formal education (elementary, secondary, and postsecondary) (figure 1). Students may spend 1 to 3 years in preprimary programs (prekindergarten [PK] and kindergarten [K]), which may be offered either in separate schools or in elementary schools that also offer higher grades. (In *Digest of Education Statistics* tables, prekindergarten and kindergarten are generally defined as a part of elementary education.) Following kindergarten, students ordinarily spend from 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students typically complete the entire program through grade 12 by age 18. Education at the elementary and secondary levels is provided in a range of institutional settings—including elementary schools (preprimary schools, middle schools, and schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined elementary/secondary schools—that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a specialized career/technical institution, a 2-year community or junior college, or a 4-year college or university. A 2-year college typically offers the first 2 years of a standard 4-year college curriculum and a selection of terminal career and technical education programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A career/technical institution offers postsecondary technical training programs of varying lengths leading to a specific career.

An associate's degree requires at least 2 years of postsecondary coursework, and a bachelor's degree typically requires 4 years of postsecondary coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs typically involve 3 years of coursework beyond the bachelor's degree level.

Enrollment

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 105.30, and figure 2). This enrollment rise reflected what is known as the "baby boom," a dramatic increase in births following World War II. Between 1971 and 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006. Enrollment in fall 2012 (55.0 million) was slightly higher than in fall 2010 (54.9 million), but was slightly lower than in fall 2006 (55.3 million). However, a pattern of annual enrollment increases is projected to begin with a slight increase in fall 2015 (no substantial change since 2012) and continue at least through fall 2024 (the last year for which NCES has projected school enrollment), when enrollment is expected to reach 57.9 million.

Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 through fall 2024

Trend and year	Number of students (in millions)
"Baby boom" increases	
1949–50 school year	28.5
Fall 1959	40.9
Fall 1969	51.1
Fall 1971 (peak)	51.3
13 years with annual declines	
Fall 1972 (first year of decline)	50.7
Fall 1984 (final year of decline)	44.9
Annual increases from 1985 to 2006	
Fall 1985	45.0
Fall 1996 (new record highs begin)	51.5
Fall 2006 (final year of record highs)	55.3
Slight declines or stable enrollment	
Fall 2007	55.2
Fall 2010	54.9
Fall 2012	55.0
Fall 2014	55.0
Annual increases projected to start again	
Fall 2015	55.0
Fall 2024	57.9

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*, 1949–50; *Statistics of Public Elementary and Secondary School Systems*, 1959 through 1972; Common Core of Data (CCD), 1984 through 2012; Private School Universe Survey (PSS), 1997–98 through 2011–12; and National Elementary and Secondary Enrollment Projection Model, 1972 through 2024.

Between 1985 and 2013, the total public and private school enrollment rate for 5- and 6-year-olds decreased from 96 percent to 94 percent, while the enrollment rate for 7- to 13-year-olds decreased from 99 percent to 98 percent (table 103.20). However, the enrollment rate for 14- to 17-year-olds increased from 95 to 96 percent during this period. Since these enrollment rates changed by 2 or fewer percentage points between 1985 and 2013, increases in public and private elementary and secondary school enrollment primarily reflect increases in the number of children in these age groups. Between 1985 and 2013, the number of 5- and 6-year-olds increased by 19 percent, the number of 7- to 13-year-olds increased by 25 percent, and the number of 14- to 17-year-olds increased by 12 percent (table 101.10). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4) from 39 percent in 1985 to 55 percent in 2013 (table 103.20) and in the number of 3- and 4-year-olds from 7.1 million to 8.0 million (table 101.10) also contributed to overall prekindergarten through grade 12 enrollment increases.

Public school enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in fall 2003 (table 105.30). Elementary enrollment was less than 1 percent lower in fall 2004 than in fall 2003 and then generally increased to a projected total of 35.2 million for fall 2014. Public elementary enrollment is projected to increase 7 percent between 2014 and 2024. Public school enrollment at the secondary level (grades 9 through 12) rose from 11.3 million in 1990 to 15.1 million in 2007, but then declined 2 percent to a projected enrollment of 14.8 million in 2014. Public secondary enrollment is projected to increase 3 percent between 2014 and 2024. Total public elementary and secondary enrollment is projected to increase every year from 2014 to 2024.

The percentage of students in private elementary and secondary schools declined from 11.7 percent in fall 2001 to 9.6 percent in fall 2011 (table 105.30). In fall 2014, an estimated 5.0 million students were enrolled in private schools at the elementary and secondary levels.

Total enrollment in public and private degree-granting postsecondary institutions reached 14.5 million in fall 1992, but decreased every year through fall 1995 (table 105.30). Total enrollment increased 47 percent between 1995 and 2010 (to 21.0 million), but declined 3 percent between 2010 and 2013 (to 20.4 million). Total enrollment is expected to increase 14 percent between fall 2013 and fall 2024, reaching 23.1 million. The percentage of students who attended private institutions rose from 24 to 28 percent between 2003 and 2013. In fall 2013, about 5.6 million students attended private institutions, with about 4.0 million in nonprofit institutions and 1.7 million in for-profit institutions (table 303.10). Enrollment increases in degree-granting postsecondary institutions have been driven by increases in population, as well as by increases in enrollment rates for some age groups. The percentage of 18- and 19-year-olds enrolled in degree-granting postsecondary institutions was 47 percent in both 2003 and 2013; however, the number of 18- and 19-year-olds rose 4 percent (tables 101.10 and 103.20). The enrollment rate of 20- to 24-year-olds rose from 36 to 39 percent, and the number of 20- to 24-year-olds rose 11 percent during the same period.

Educational Attainment

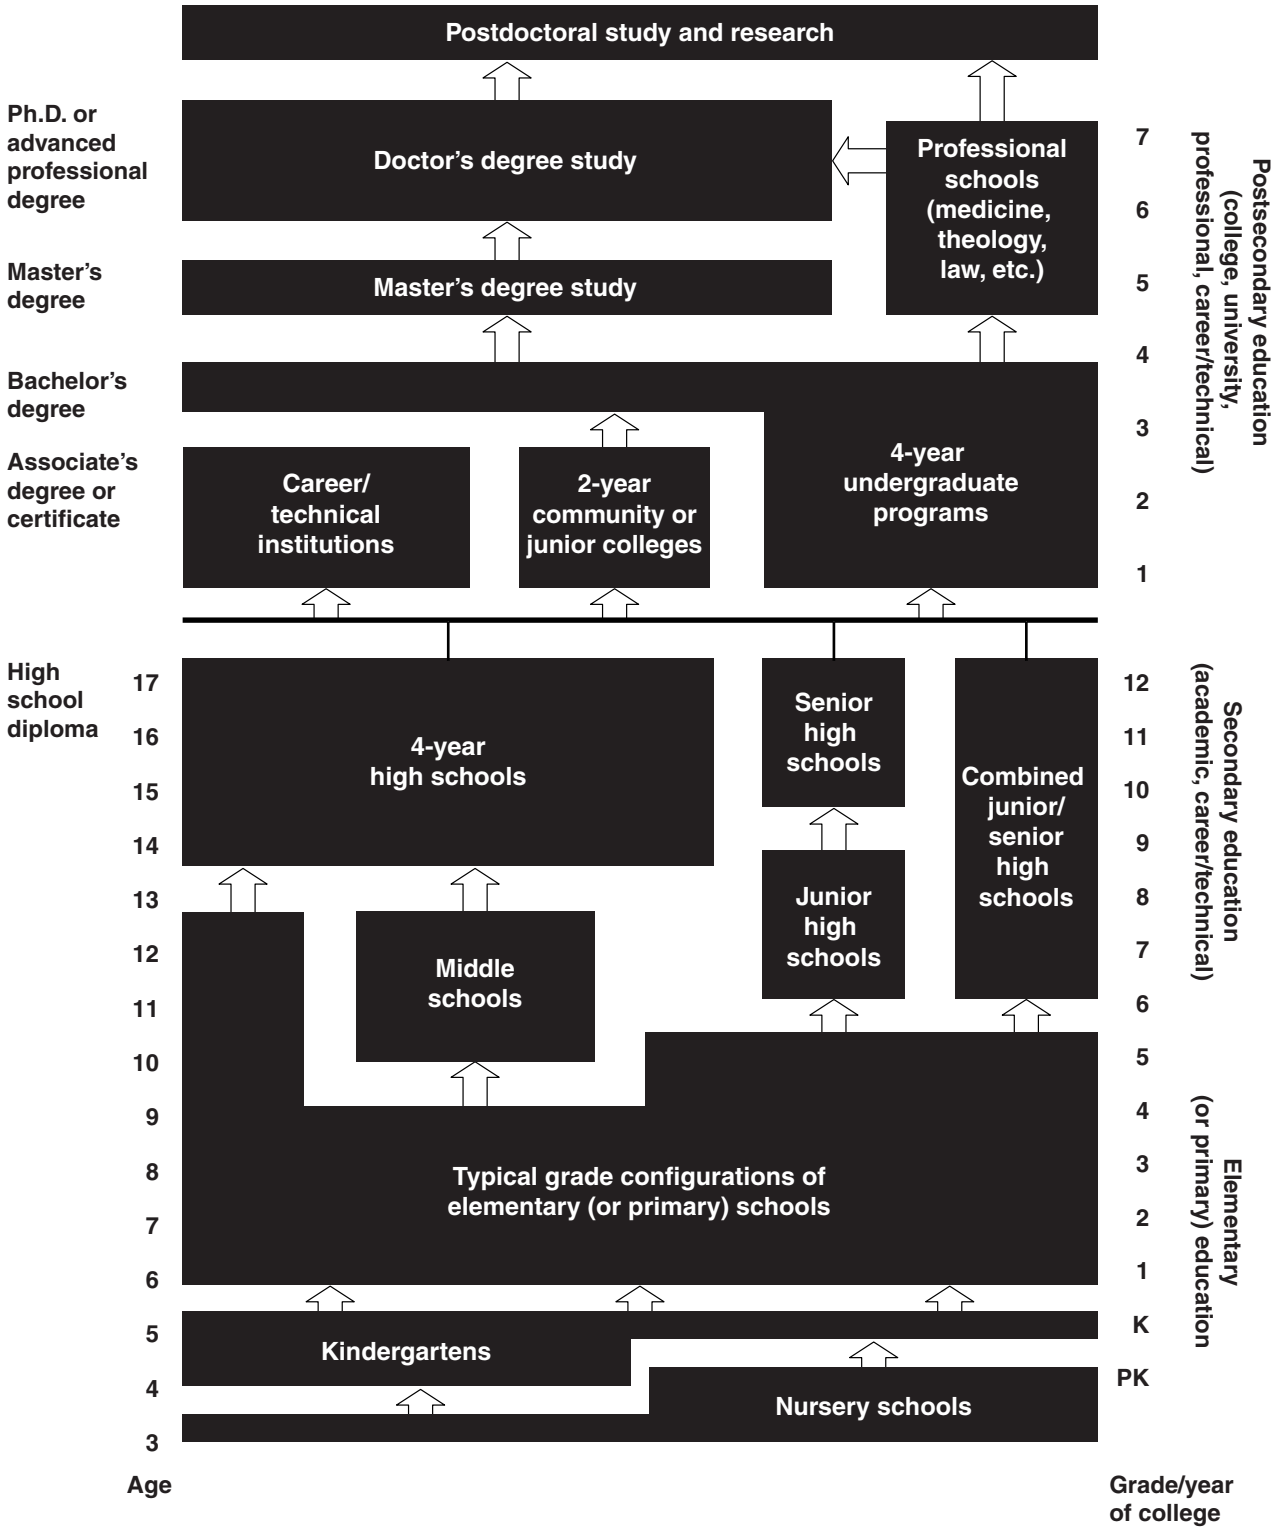
The percentages of adults 25 years old and over completing high school and higher education have been rising. Between 2004 and 2014, the percentage of the population 25 years old and over who had completed at least high school increased from 85 to 88 percent, and the percentage who had completed a bachelor's or higher degree increased from 28 to 32 percent (table 104.10 and figure 3). In 2014, about 8 percent of people 25 years old or over held a master's degree as their highest degree and 3 percent held a doctor's or first-professional degree (table 104.30).

Among young adults (25- to 29-year-olds), the percentage who had completed at least high school increased from 87 percent in 2004 to 91 percent in 2014 (table 104.20 and figure 4). The percentage of young adults who had completed a bachelor's or higher degree increased from 29 percent in 2004 to 34 percent in 2014. In 2014, about 6 percent of young adults held a master's degree as their highest degree and 2 percent held a doctor's or first-professional degree (table 104.30 and figure 5). Overall, the percentage of young adults who had a master's or higher degree rose from 6 percent in 2004 to 8 percent in 2014.

Between 2004 and 2014, changes occurred in the educational attainment of young adults (25- to 29-year-olds) by race/ethnicity. During this period, the percentages who had

completed at least high school increased for Hispanic, White, and Black young adults, but there was no measurable change in the percentage for Asian young adults (97 percent in both years) (table 104.20 and figure 6). The percentage of Hispanic young adults who had completed at least high school rose from 62 percent in 2004 to 75 percent in 2014, an increase of 12 percentage points. During the same period, the percentage of White young adults who had completed at least high school rose from 93 to 96 percent, an increase of 2 percentage points (based on unrounded data). Since the increase for White young adults was smaller than the increase for Hispanic young adults, the gap between the high school completion percentages for these two groups decreased from 31 percentage points in 2004 to 21 percentage points in 2014. Between 2004 and 2014, the percentage of Black young adults who had completed high school increased from 89 percent to 92 percent, but there was no measurable change in the gap between the White and Black high school completion percentages. In 2014, the percentage of young adults who had completed at least high school was higher for Whites and Asians than for Blacks, and the percentage for Hispanics was lower than for Whites, Asians, and Blacks.

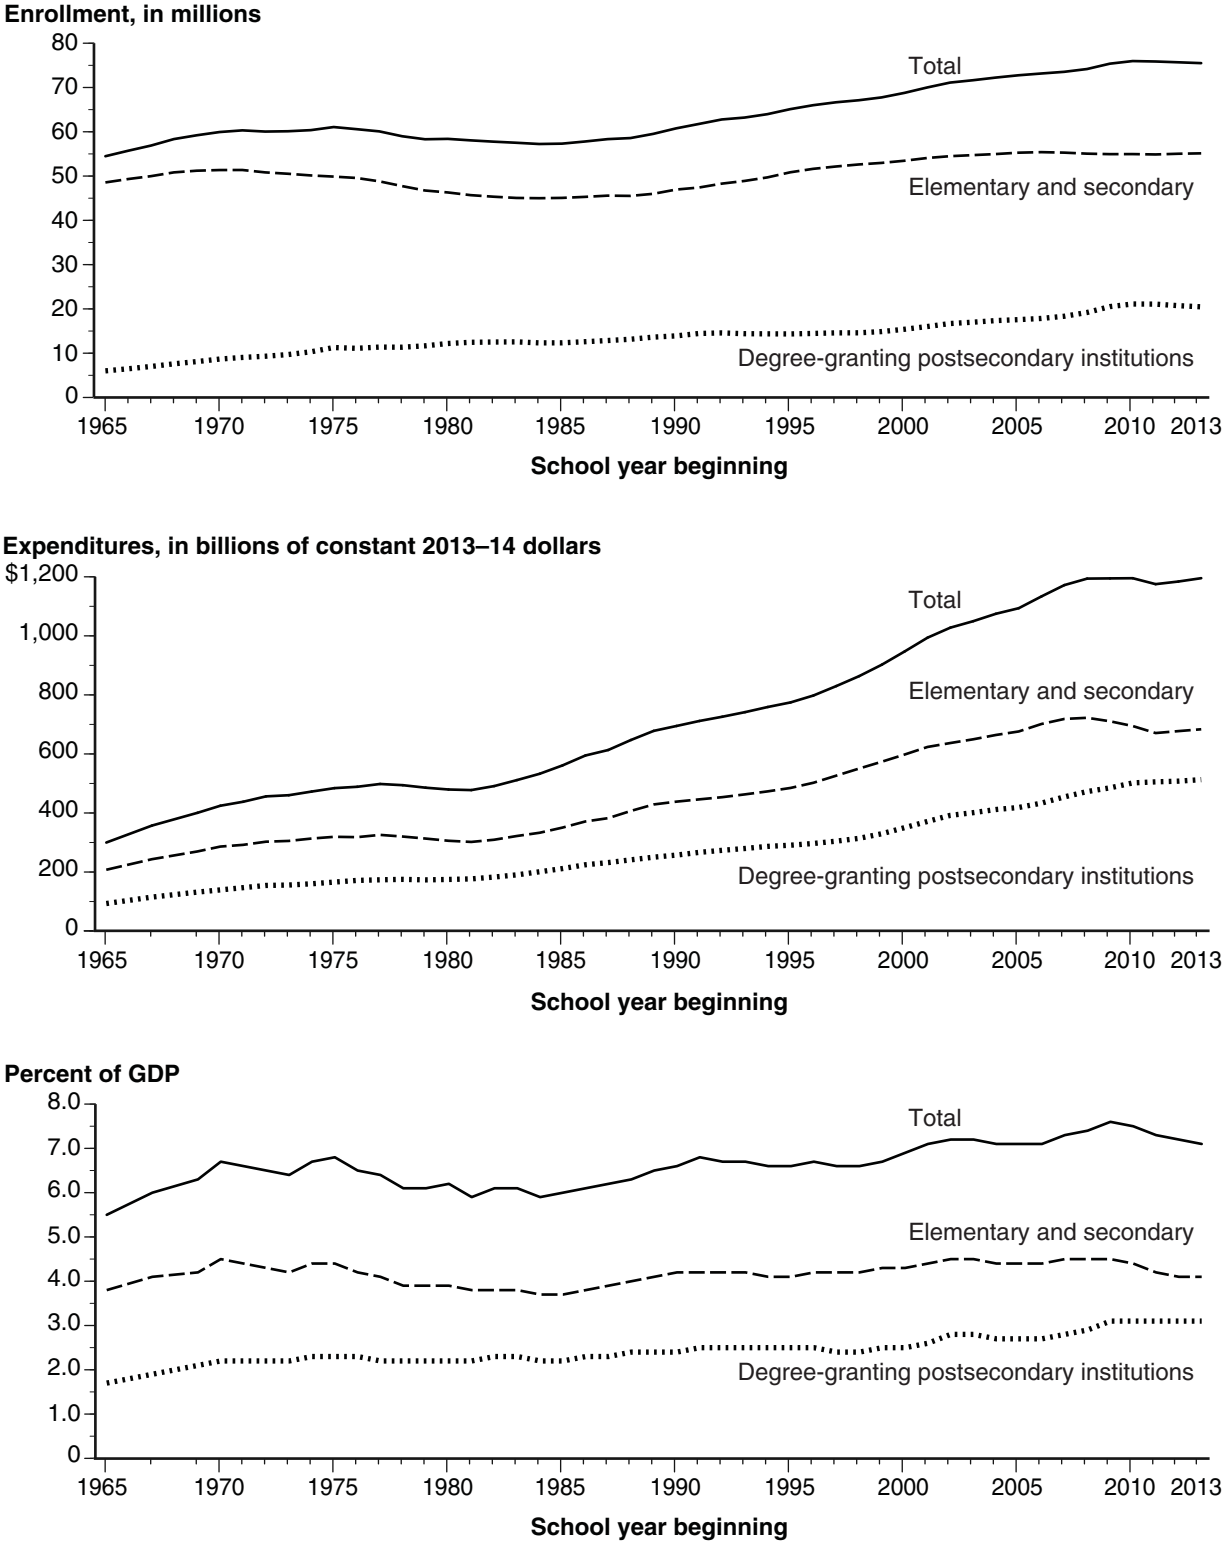
The percentage of bachelor's degree holders also varied among young adults of different racial/ethnic groups, with 63 percent of Asians in the 25- to 29-year-old age group holding a bachelor's or higher degree in 2014, compared with 41 percent of Whites, 22 percent of Blacks, and 15 percent of Hispanics. Between 2004 and 2014, the percentages who had completed a bachelor's or higher degree increased for White, Black, and Hispanic young adults, but showed no measurable change for Asian young adults. During this period, the percentage of young adults who held a bachelor's or higher degree increased from 34 to 41 percent among Whites, from 17 to 22 percent among Blacks, and from 11 to 15 percent among Hispanics. With these increases for all three groups, the gaps in bachelor's degree attainment percentages between Whites and Blacks and between Whites and Hispanics did not change measurably from 2004 to 2014.



Teachers and Faculty

A projected 3.5 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2014 (table 105.40), which was not substantially different from the number in 2004. The number of FTE public school teachers in 2014 was 3.1 million, and the number of FTE private school teachers was 0.4 million. FTE faculty at degree-granting postsecondary institutions totaled a projected 1.0 million in 2014, including 0.7 million at public institutions and 0.4 million at private institutions (table 105.10).

Expenditures



Expenditures of educational institutions were an estimated $1.2 trillion for the 2013–14 school year (table 106.20 and figure 2). Elementary and secondary schools spent 57 percent of this total ($682 billion), and colleges and universities spent the remaining 43 percent ($512 billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 14 percent between 2003–04 and 2013–14. Inflation-adjusted expenditures of degree-granting postsecondary institutions rose by an estimated 28 percent. Expenditures of elementary and secondary schools were about 5 percent higher in 2013–14 than in 2003–04. In 2013–14, expenditures of educational institutions were an estimated 7.1 percent of the gross domestic product (table 106.10).

Figure 1. The structure of education in the United States

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels.

[1]Included under Asian.
[2]Data on persons of two or more races were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Population estimates as of July 1 of the indicated reference year.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.
[2]Total includes other racial/ethnic groups not shown separately.
[3]Respondents who wrote in some other race that was not included as an option on the questionnaire.
[4]In 2008 only, includes Taiwanese. As of 2013, excludes Taiwanese, which is included in "Other Asian."
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Data are from the American Community Survey and may differ from data shown in other tables obtained from the Current Population Survey. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
NOTE: A family household consists of two or more people who are related by birth, marriage, or adoption and are residing together. Own children are never-married sons and daughters, including stepchildren and adopted children, of the householder or married couple. Detail may not sum to totals because of rounding.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes all children who live either with their parent(s) or with a householder to whom they are related by birth, marriage, or adoption (except a child who is the spouse of the householder). Children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children. Living arrangements with only a "female parent" or "male parent" are those in which the parent or the householder who is related to the child does not have a spouse living in the household. The householder is the person (or one of the people) who owns or rents (maintains) the housing unit.
[2]Includes foster children, children in unrelated subfamilies, children living in group quarters, and children who were reported as the householder or spouse of the householder.
[3]Excludes Taiwanese. Taiwanese is included in "Other Asian."
[4]Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

[1]Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit.

[2]Based on 1989 incomes and family sizes collected in the 1990 census. May differ from Current Population Survey data that are shown in other tables.

[3]Based on 1999 incomes and family sizes collected in the 2000 census. May differ from Current Population Survey data that are shown in other tables.

[4]Based on income and family size data from the American Community Survey (ACS). May differ from Current Population Survey data that are shown in other tables. ACS respondents were interviewed throughout the given year and reported the income they received during the previous 12 months.

NOTE: For information about how the Census Bureau determines who is in poverty, see http://www.census.gov/hhes/www/poverty/about/overview/measure.html. Detail may not sum to totals because of rounding.

[1]All data for 2008 and earlier years are based on the official poverty measure. Supplemental Poverty Measure (SPM) data are available only for 2009 and later years.
[2]Refers to the person who owns or rents (maintains) the housing unit.
[3]Refers to all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). For 1960 and 1965 only, the data exclude related children who have ever been married.
[4]The official poverty measure consists of a set of thresholds for families of different sizes and compositions that are compared to before-tax cash income to determine a family's poverty status. For more information about how the Census Bureau determines who is in poverty, see http://www.census.gov/hhes/www/poverty/about/overview/measure.html.
[5]The Supplemental Poverty Measure (SPM) extends the information provided by the official poverty measure by adding to family income the value of benefits from many government programs designed to assist low-income families, subtracting taxes and necessary expenses such as child care costs (for working families) and medical expenses, and adjusting poverty thresholds for differences in housing costs. To match the population included in the current official poverty measure, SPM estimates presented in this table exclude unrelated children under age 15. For more information about the SPM, see http://www.census.gov/hhes/povmeas/methodology/supplemental/research/Short_ResearchSPM2011.pdf.
[6]Includes persons of Hispanic ethnicity, because data for the White, non-Hispanic and Black, non-Hispanic populations are not available for the indicated years.
[7]Includes Pacific Islanders as well as Asians.
NOTE: Data are from the Current Population Survey and may differ from data shown in other tables obtained from the Decennial Census and the American Community Survey. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Reports, Series P-60, *Poverty in the United States*, selected years, 1960 through 2002; Current Population Survey (CPS), Annual Social and Economic Supplement, 1991 through 2014; and Supplemental Poverty Measure (SPM) Research Files, 2009 through 2013. (This table was prepared November 2014.)

Table 102.60. Number and percentage of children under age 18 living in poverty, by family structure, race/ethnicity, and selected subgroups: 2008 and 2013

[Standard errors appear in parentheses]

Year and race/ethnicity	Number of related children[1] living in poverty (in thousands)		Percent of related children[1] living in poverty, by family structure							
			Total, all families		Married-couple household[2]		Mother-only household, no spouse present[2]		Father-only household, no spouse present[2]

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table includes only children related to the householder. It excludes unrelated children and householders who are themselves under the age of 18.
[2]To determine family structure, children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children. Mother-only households are those that have only a female householder, and father-only households are those that have only a male householder.
[3]In 2008 only, includes Taiwanese. As of 2013, excludes Taiwanese, which is included in "Other Asian."
[4]Respondents who wrote in some other race that was not included as an option on the questionnaire.
NOTE: Data may differ from Current Population Survey data that are shown in other tables. American Community Survey respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. For information about how the Census Bureau determines who is in poverty, see http://www.census.gov/hhes/www/poverty/about/overview/measure.html. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey, 2008 and 2013. (This table was prepared October 2014.)

Table 103.10. Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2013

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
[2]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, preschools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
[1]Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
[2]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night.

—Not available.
†Not applicable.
[1]Includes persons of Hispanic ethnicity for years prior to 1980.
[2]Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.
[3]Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
[4]Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For all other years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

†Not applicable.
#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes persons of Hispanic ethnicity for years prior to 1980.
[2]Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.
[3]Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
[4]Data for years prior to 1993 are for persons with 4 or more years of college.
NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For all other years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

†Not applicable.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Total includes other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors were computed using replicate weights.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
[1]High school completers include diploma recipients and those completing high school through alternative credentials, such as a GED.
[2]Total includes other racial/ethnic groups not shown separately.
[3]In 2008 only, includes Taiwanese. As of 2013, excludes Taiwanese, which is included in "Other Asian."

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Total includes other racial/ethnic groups not shown separately.
[2]Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.
[3]Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.

NOTE: Estimates are for the entire population in the indicated age range, including persons living in households and persons living in group quarters (such as college residence halls, residential treatment centers, military barracks, and correctional facilities). The first bachelor's degree major reported by respondents was used to classify their field of study, even though they were able to report a second bachelor's degree major and may possess advanced degrees in other fields. STEM fields, as defined here, consist of the fields specified in columns 6 through 13. Data were assembled based on major field aggregations, except that management of STEM activities was counted as a STEM field instead of a business field. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes adoptive and stepparents, but excludes parents not residing in the same household as their children.
[2]Includes parents who completed high school through equivalency programs, such as a GED program.

NOTE: Table includes only 6- to 18-year-olds who resided with at least one of their parents (including an adoptive or stepparent). The 6- to 18-year-olds in single-parent households resided with only one parent, while those in two-parent households resided with two parents. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey, 2008 and 2013. (This table was prepared January 2015.)

Table 104.80. Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2013

[Standard errors appear in parentheses]

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

[1]Total includes racial/ethnic groups not shown separately.
NOTE: Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Commerce, Census Bureau, 2013 American Community Survey (ACS) 1-Year Public Use Microdata Sample (PUMS) data. (This table was prepared March 2015.)

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income in 2002. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.
NOTE: Detail may not sum to totals because of rounding and survey item nonresponse.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Education Longitudinal Study of 2002 (ELS:2002), Base Year, First Follow-up, Second Follow-up, and Third Follow-up. (This table was prepared January 2015.)

Table 104.93. Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed and socioeconomic status while in high school: 2012

[Standard errors appear in parentheses]

Socioeconomic status (SES) and sources of college information	Percent of students obtaining college information from each source															
			Highest level of education completed through 2012													
	All students who expected to attend a postsecondary institution		Less than high school completion		High school completion		Some postsecondary education (no credential)		Postsecondary certificate		Associate's degree		Bachelor's or higher degree	
1	2		3		4		5		6		7		8

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income in 2002. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

NOTE: Students who reported that they planned to attend postsecondary education were asked, "Where have you gone for information about the entrance requirements of various colleges?" Because each student could indicate multiple sources, percentages do not sum to 100.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Education Longitudinal Study of 2002 (ELS:2002), Base Year, First Follow-up, and Third Follow-up. (This table was prepared January 2015.)

Table 104.95. Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2014

[Standard errors appear in parentheses]

Metropolitan area	Number of persons 25 years old and over (in thousands)						Percent with high school completion or higher						Percent with bachelor's or higher degree

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
[1]Information on metropolitan status was suppressed for a small portion of sample observations. As a result, population estimates for these areas may be slightly underestimated.
NOTE: A Core Based Statistical Area (CBSA) consists of one or more counties associated with at least one population core of at least 10,000 people, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties. A Combined Statistical Area (CSA) consists of two or more adjacent CBSAs that have social and economic ties as measured by commuting, but at lower levels than are found within each component CBSA. Detail may not sum to totals because of rounding. Standard errors were computed using replicate weights.

Table 105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2014

[In millions]

Participants	All levels (elementary, secondary, and degree-granting postsecondary)	Elementary and secondary schools			Degree-granting postsecondary institutions		
		Total	Public	Private	Total	Public	Private
1	2	3	4	5	6	7	8
Total	**85.1**	**61.9**	**56.2**	**5.7**	**23.2**	**16.6**	**6.7**
Enrollment	75.2	55.0	50.0	5.0	20.3	14.7	5.6
Teachers and faculty	4.6	3.5	3.1	0.4	1.0	0.7	0.4
Other professional, administrative, and support staff	5.3	3.4	3.1	0.3	1.9	1.2	0.7

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal Bureau of Indian Education schools and Department of Defense schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

[1]Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
[2]Estimated.
[3]Projected.
[4]Includes prorated proportion of students classified as ungraded.
[5]Data are actual.
NOTE: Postsecondary data for 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.
[1]Beginning in fall 1985, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.
[2]Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.
[3]Estimated.
[4]Projected data. Fall 2013 data for degree-granting institutions are actual.
NOTE: Data for 1869–70 through 1949–50 reflect enrollment for the entire school year. Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.
[2]Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.
[3]Estimated.
[4]Inclusion of institutions is not consistent with surveys for 1987 and later years.
[5]Projected.
[6]Data for elementary and secondary teachers are projected and data for degree-granting institutions faculty are actual.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions faculty.

†Not applicable.
[1]Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.
[2]Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for 1997–98 and later years include schools with kindergarten or higher grades.
[3]Included in the elementary, secondary, and combined categories.
NOTE: Postsecondary data for 1980–81 and 1990–91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

—Not available.
[1]Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.
[2]Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.
[3]Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Postsecondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

[1]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

[2]Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.

[3]Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Expenditures for public and private colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Postsecondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

[1]Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.

[2]Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. In 2011–12, a census of state and local governments was conducted; therefore, standard errors are not applicable. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

[1]Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

[2]Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output. More information is available at https://www.bea.gov/scb/account_articles/national/0597od/maintext.htm.

[3]Data adjusted by the CPU-RS, which is a price index of inflation that incorporates most of the improvements in methodology made to the current CPI-U since 1978 into a single, uniform series. See Census Bureau, *Money Income in the United States: 1999* (www.census.gov/prod/2000pubs/p60-209.pdf).

[4]Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.

[5]Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census. Excludes overseas armed forces personnel.

NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

CHAPTER 2
Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

Enrollments

Public elementary and secondary school enrollment rose from 49.3 million in 2007 to 49.8 million in 2012, an increase of 1 percent (table 203.10 and figure 7). Public elementary enrollment (prekindergarten through grade 8) was 2 percent higher in 2012 (35.0 million) than in 2007 (34.2 million), while public secondary enrollment (grades 9 through 12) was 2 percent lower in 2012 (14.8 million) than in 2007 (15.1 million). Although public school enrollment increased slightly overall between 2007 and 2012, there were increases in enrollment for some racial/ethnic groups and decreases for other groups (table 203.50). Between 2007 and 2012, the enrollment of Hispanic students increased 16 percent and the enrollment of Asian/Pacific Islander students increased 6 percent. In contrast, the enrollment of White students decreased 8 percent, the enrollment of Black students decreased 7 percent, and the enrollment of American Indian/Alaska Native students decreased 10 percent.

From 2007 to 2012, changes in public school enrollment varied from state to state. Thirty-four states had higher enrollment in 2012 than in 2007, while 16 states and the District of Columbia had lower enrollment in 2012 than in 2007 (table 203.20 and figure 8). The largest public school enrollment increases occurred in Texas (9 percent) and Colorado (8 percent), and 5 other states had increases of at least 5 percent. The largest decrease in public school enrollment occurred in Michigan (a decrease of 8 percent), and 3 other states had decreases of at least 5 percent.

Enrollment in private elementary and secondary schools decreased by an estimated 12 percent between 2007 and 2012, from 5.9 million to 5.2 million (table 208.20). In 2012, private school students made up 9.4 percent of all elementary and secondary school students.

In 2013, about 65 percent of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten), the same as the percentage in 2003 (table 202.10 and figure 9). However, the percentage of children in full-day programs increased from 2003 to 2013. In 2013, about 60 percent of the children enrolled in preprimary education attended a full-day preprimary program, compared with 56 percent in 2003.

A higher percentage of 4-year-old children (57 percent) were cared for primarily in center-based programs during the day in 2005–06 than had no regular nonparental care (20 percent) or were cared for primarily in home-based settings by relatives (13 percent) or by nonrelatives (8 percent) (table 202.50). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (table 202.60).

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3–21 with disabilities be provided a free and appropriate public school education. The percentage of total public school enrollment that represents children served by federally supported special education programs increased from 8.3 percent to 13.8 percent between 1976–77 and 2004–05 (table 204.30). Much of this overall increase can be attributed to a rise in the percentage of students identified as having specific learning disabilities from 1976–77 (1.8 percent) to 2004–05 (5.7 percent). The overall percentage of students being served in programs for those with disabilities decreased between 2004–05 (13.8 percent) and 2012–13 (12.9 percent). However, there were different patterns of change in the percentages served with some specific conditions between 2004–05 and 2012–13. The percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes) rose from 1.1 to 1.6 percent of total public school enrollment, the percentage with autism rose from 0.4 to 1.0 percent, and the percentage with developmental delay rose from 0.7 to 0.8 percent. The percentage of children with specific learning disabilities declined from 5.7 percent to 4.6 percent of total public school enrollment during this period. In fall 2012,

some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: in a separate residential facility, homebound or in a hospital, or in a correctional facility (table 204.60).

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. For public schools, the number of pupils per teacher—that is, the pupil/teacher ratio[1]—declined from 22.3 in 1970 to 17.9 in 1985 (table 208.20 and figure 7). After enrollment started increasing in 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability during the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 15.3 in 2008. The public school pupil/teacher ratio increased from 15.3 in 2008 to 16.0 in 2012. By comparison, the pupil/teacher ratio for private schools was estimated at 12.5 in 2012. The average class size in 2011–12 was 21.2 pupils for public elementary schools and 26.8 pupils for public secondary schools (table 209.30).

In 2011–12, some 76 percent of public school teachers were female, 44 percent were under age 40, and 56 percent had a master's or higher degree (table 209.10). Compared with public school teachers, a lower percentage of private school teachers had a master's or higher degree (43 percent).

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2011–12, some 20 percent of public school principals were under age 40, and 98 percent of public school principals had a master's or higher degree (table 212.10). Compared with public school principals, a lower percentage of private school principals had a master's or higher degree (69 percent). A lower percentage of principals than of teachers were female: About 52 percent of public school principals were female, compared with 76 percent of teachers. At private schools, 55 percent of principals were female in 2011–12, compared with 75 percent of teachers.

From 1969–70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff [2] (table B and table 213.10). Consequently, the percentage of staff who were teachers declined from 60 percent in 1969–70 to 52 percent in 1980. From 1980 to 2012, the number of teachers and the number of all other staff grew at more similar rates (42 and 55 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 2 percentage points lower in 2012 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased more than 100 percent between 1980 and 2012—instructional aides, which rose 124 percent, and instruction coordinators, which rose 245 percent. Taken together, the percentage of staff with direct instructional responsibilities (teachers and instructional aides) increased from 60 to 62 percent between 1980 and 2012. In 2012, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980 (table 213.10). At private schools in 2011–12, the number of pupils per staff member was 6 (table 205.60).

Table B. Number of public school staff, by selected categories: 1969–70, 1980, and 2012

[In thousands]

Selected staff category	1969–70	1980	2012
Total	**3,361**	**4,168**	**6,181**
Teachers	2,016	2,184	3,109
Instructional aides	57	326	730
Instruction coordinators	32	21	71

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Statistics of Public Elementary and Secondary Schools, 1980;* and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2012–13.

Schools

During most of the last century, the trend to consolidate small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 98,000 in 2012–13 (table 214.10). However, the number of public schools has increased in recent decades: between 1988–89 and 2006–07, there was an increase of approximately 15,600 schools. Since 2006–07, the number of public schools has remained relatively stable, varying by about 500 schools or less from year to year.

While the total number of public schools in the country has remained between 98,000 and 99,000 in recent years, new schools have opened and some schools have closed. In 2012–13, there were 1,493 school closures (table 216.95). The schools that closed had enrolled about 241,000 students in the prior school year (2011–12). Of the schools that closed, 1,075 were regular schools, 83 were special education schools, 66 were vocational schools, and 269 were alternative schools. The number of schools that closed in 2012–13 was higher than the number in 2000–01 (1,193); however, the number of annual school closures has fluctuated during this period, ranging from around 1,200 to 2,200. School closures do not necessarily reflect the number of school buildings that have been closed, since a school may share a building with another school, or one school may have multiple buildings.

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades 7 to 9) and moving toward

[1]The pupil/teacher ratio is based on all teachers—including teachers for students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

[2]"All other public school staff" includes administrative staff, principals, librarians, guidance counselors, secretaries, custodial staff, food service workers, school bus drivers, and other professional and nonprofessional staff.

middle schools (a subset of elementary schools beginning with grade 4, 5, or 6 and ending with grade 6, 7, or 8) (table 216.10). Although the number of all elementary schools (schools beginning with grade 6 or below and having no grade higher than 8) was similar in 1970–71 and 2000–01 (64,000 in 1970–71 and 64,600 in 2000–01), the number of middle schools was 462 percent higher in 2000–01 than in 1970–71 (11,700 vs. 2,100). During the same period, the number of junior high schools declined by 57 percent (from 7,800 in 1970–71 to 3,300 in 2000–01). Between 2002–03 and 2012–13, the number of all elementary schools rose by 2 percent to 66,700, while the subset of middle schools rose by 7 percent to 13,100. During the same period, the number of junior high schools declined by 14 percent to 2,800.

The average number of students in public elementary schools in 2012–13 (481) was higher than in 2002–03 (476) (table 216.45). The average enrollment size of public secondary schools decreased from 720 in 2002–03 to an average of 689 students in 2012–13. The average size of regular public secondary schools—which exclude alternative, special education, and vocational education schools—decreased from 813 in 2002–03 to 785 in 2012–13.

School Choice

Over the past 2 decades, the range of options that parents have for the education of their children has expanded. Private schools have been a traditional alternative to public school education, but there are now more options for parents to choose public charter schools, and more parents are also homeschooling their children. Between 1999–2000 and 2012–13, enrollment in private schools decreased from 6.0 million to an estimated 5.2 million, a decline of 0.8 million or 14 percent (table 105.30). During the same period, the percentage of elementary and secondary students who were enrolled in private schools declined from 11.4 percent to 9.4 percent. In contrast, enrollment in public charter schools increased between 1999–2000 and 2012–13, rising from 0.3 million to 2.3 million, an increase of 1.9 million students (table 216.30). During this period, the percentage of public elementary and secondary school children who were in charter schools increased from 0.7 percent to 4.6 percent. In addition, there has been an increase in the number and percentage of 5- to 17-year-olds who are homeschooled (tables 206.10 and 206.20). About 1.8 million children were homeschooled in 2012, compared to 0.9 million in 1999.[3] Also, the percentage of 5- to 17-year-olds who were homeschooled in 2012 (3.4 percent) was higher than in 1999 (1.7 percent).

[3]The number of homeschooled children in 1999 is from *Homeschooling in the United States: 1999* (NCES 2001-033), available at http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001033. While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 1999 and 2012 could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail.

Charter schools are the typical form of choice within the public education sector; however, some parental selection also can be found among traditional public schools. In 2012, the parents of 37 percent of all 1st- through 12th-grade students indicated that public school choice was available to them (table 206.40). Also in 2012, 13 percent of the students in traditional public schools were in a school chosen by their parents rather than an assigned school (table 206.30). There were differences in the characteristics of students attending their local assigned public schools in 2012 compared to those in public schools chosen by their parents. For example, White students made up a higher percentage of those in assigned schools (53 percent) than of those in chosen schools (40 percent). In contrast, Black students made up a higher percentage of those in chosen schools (22 percent) than of those in assigned schools (14 percent). Hispanic students also made up a higher percentage of those in chosen schools (27 percent) than of those in assigned schools (23 percent). Students in cities made up a higher percentage of those in chosen schools (46 percent) than of those in assigned schools (25 percent). In contrast, students in rural areas made up a higher percentage of those in assigned schools (26 percent) than of those in chosen schools (14 percent).

Compared with students in assigned public schools, a higher percentage of students in chosen public schools had parents who were very satisfied with some elements of their children's education in 2012 (table 206.50). Among students in grades 3 through 12, the percentage of students whose parents were very satisfied with their school was higher for students in chosen schools (56 percent) than for students in assigned schools (52 percent). Similarly, the percentage of students whose parents were very satisfied with academic standards was higher for students in chosen schools (59 percent) than for students in assigned schools (53 percent). Also, higher percentages of students in chosen schools had parents who were very satisfied with school order and discipline as well as with staff interaction with parents. However, there was no measurable difference between the percentages of students in chosen and assigned public schools whose parents were highly satisfied with the teachers in their school (52 percent each).

High School Graduates and Dropouts

About 3,323,000 high school students are expected to graduate during the 2015–16 school year (table 219.10), including about 3,048,000 public school graduates and 275,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2015–16 projection of high school graduates is lower than the record high of 3,452,000 graduates for 2011–12, but exceeds the baby boom era's high point in 1975–76, when 3,142,000 students earned diplomas. In 2011–12, an estimated 80.8 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman (9th-grade) year.

The number of GED credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service.[4] In 2013, some 541,000 people passed the GED tests, up from 387,000 in 2003.

The percentage of dropouts among 16- to 24-year-olds (known as the status dropout rate) has decreased over the past 20 years (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16- to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1990 and 2013, the status dropout rate declined from 12.1 to 6.8 percent. Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (7.3 and 11.7 percent, respectively) remained higher than the rate for Whites (5.1 percent) in 2013.

Achievement

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP (which includes the Trial Urban District Assessment), and national long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. For mathematics, reading, science, and writing assessments since 2002, a combined sample of public schools has been selected for 4th- and 8th-grade national NAEP and state NAEP (including the Trial Urban District Assessment).

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance in reading and mathematics at ages 9, 13, and 17. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

The following paragraphs discuss results for the national main NAEP, state NAEP, and long-term trend NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the *Digest*) are based on statistical testing of unrounded values.

Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500 (table 221.10). In 2013, the average reading score for 4th-grade students (222) was not measurably different from the 2011 score, but it was higher than the scores on assessments between 1992 (217) and 2009 (221). At grade 4, only the average reading scores for White students were higher in 2013 (232) than in both 2011 (231) and 1992 (224). The 2013 scores for Black (206), Hispanic (207), and Asian/Pacific Islander (235) 4th-graders were not measurably different from the 2011 scores, but the 2013 scores were higher than the 1992 scores (192, 197, and 216, respectively). The difference in the reading scale scores of White and Black 4th- graders decreased from 32 points in 1992 to 26 points in 2013. For 8th-grade students, the average reading score in 2013 (268) was more than 2 points higher than in 2011 (265), was 8 points higher than in 1992 (260), and was higher than the average scores in all previous years. At grade 8, the average reading scores for White (276), Black (250), Hispanic (256), and Asian/Pacific Islander (280) students were higher in 2013 than in 2011 and 1992. The difference in the reading scale scores of White and Hispanic 8th- graders decreased from 26 points in 1992 to 21 points in 2013. For 12th-grade students, the average reading score in 2013 (288) was not measurably different from the score in 2009 (12th-graders were not assessed in 2011), but was lower than the score in 1992 (292). At grade 12, the 2013 average reading scores for White (297), Hispanic (276), and Asian/Pacific Islander (296) students were not measurably different from either the 2009 scores or the

[4]Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

1992 scores. The 2013 reading score for Black students (268) was not measurably different from the score in 2009, but was lower than the score in 1992 (273). The difference in the reading scale scores of White and Black 12th- graders increased from 24 points in 1992 to 30 points in 2013.

While there was no measurable change from 2011 to 2013 in the average score for 4th-grade public school students nationally, average scores were higher in 2013 than in 2011 in Colorado, the Department of Defense dependents schools, Indiana, Iowa, Maine, Minnesota, Tennessee, Washington, and the District of Columbia; scores were lower in 2013 than in 2011 in Massachusetts, Montana, and North Dakota (table 221.40). At grade 8, the average reading score for public school students nationally was 2 points higher in 2013 than in 2011, and 12 states (Arkansas, California, Florida, Hawaii, Iowa, Nevada, New Hampshire, Oregon, Pennsylvania, Tennessee, Utah, and Washington) plus the District of Columbia and the Department of Defense dependents schools had higher scores in 2013 than in 2011 (table 221.60). In the other states, scores did not change measurably from 2011 to 2013.

Reported on a scale of 0 to 500, NAEP long-term trend results in reading are available for 13 assessment years going back to the first in 1971. The average reading score for 9-year-olds was higher in 2012 (221) than in assessment years prior to 2008, increasing 5 points since 2004 and 13 points in comparison to 1971 (table 221.85). The average score for 13-year-olds in 2012 (263) was higher than in all previous assessment years, except for 1992. The average reading score for 17-year-olds was higher in 2012 (287) than in 2004 (283), but was not significantly different from the score in 1971 (285).

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average reading scores in 2012 than they did in the first assessment year (which is 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). Average reading scores were higher in 2012 than in 2004 for White, Black, and Hispanic students at all three ages (table 221.85). Reading results for 2012 continued to show gaps in scores between White and Black students (ranging from 23 to 26 points, depending on age) and between White and Hispanic students (about 21 points at all three ages). The White-Black and the White-Hispanic reading gaps were smaller in 2012 than in 1971 (1975 for Hispanic students) at all three ages. For example, the White-Black reading gap for 17-year-olds was 53 points in 1971 compared with 26 points in 2012. Similarly the White-Hispanic reading gap for 17-year-olds narrowed from 41 points in 1975 to 21 points in 2012.

In 2012, female 9-, 13-, and 17-year-old students continued to have higher average reading scores than male students at all three ages (table 221.85). The gap between male and female 9-year-olds was 5 points in 2012; this was narrower than the gap in 1971 (13 points). The 8-point gender gap for 13-year-olds in 2012 was not significantly different from the gap in 1971. At age 17, the 8-point gap between males and females in 2012 was not significantly different from the gap in 1971.

Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500. In 2013, the average NAEP mathematics scores for 4th-grade and 8th-grade students were higher than the average scores in all previous assessment years (table 222.10). From 1990 (the first assessment year) to 2013, the average 4th-grade NAEP mathematics score increased by 28 points, from 213 to 242. During that same period, the average 8th-grade score increased by 22 points, from 263 to 285. At grade 4, the average mathematics scores in 2013 for White (250) and Hispanic students (231) were higher than the scores in both 2011 and 1990. The 2013 score for Black 4th-graders (224) was not measurably different from the 2011 score, but it was higher than the 1990 score. Prior to 2011, separate data on Asians were not available; the 2013 score for Asian 4th-graders (259) was also not measurably different from the 2011 score. The difference in the mathematics scale scores of White and Black 4th-graders decreased from 32 points in 1990 to 26 points in 2013. At grade 8, the mathematics scores of White (294), Black (263), and Hispanic (272) students were higher in 2013 than in 1990. However, the 31-point gap between the mathematics scores of White and Black 8th-graders in 2013 was not significantly different from the 33-point gap in 1990. Due to changes in the 12th-grade mathematics assessment framework, a new trend line started in 2005, with data reported on a scale of 0 to 300. The average 12th-grade mathematics score in 2013 (153) was not measurably different from the score in 2009, but was higher than the score in 2005 (150). Scores were higher in 2013 than in 2005 for White, Black, Hispanic, and Asian/Pacific Islander 12th-graders, as well as for those of Two or more races. The 2013 mathematics score for American Indian/Alaska Native 12th-graders was not measurably different from the 2005 score. The mathematics score gap in favor of Asian/Pacific Islander 12th-graders compared with White 12th-graders was higher in 2013 (11 points) than in 2005 (5 points). There were no other measurable changes in the size of gaps between 12th-grade mathematics scores for White students compared with scores for students of other racial/ethnic groups.

NAEP results also permit state-level comparisons of the mathematics achievement of 4th- and 8th-grade students in public schools (tables 222.50 and 222.60). The average mathematics scores for 4th-grade public school students increased from 2011 to 2013 in 14 states (Arizona, Colorado, Delaware, Hawaii, Indiana, Iowa, Minnesota, Nebraska, New York, North Dakota, Tennessee, Washington, West Virginia, and Wyoming), the District of Columbia, and the Department of Defense dependents schools, and scores did not decrease for any states. At grade 8, scores were higher in 2013 than in 2011 in five states (Florida, Hawaii, New Hampshire, Pennsylvania, and Tennessee), the District of Columbia, and the Department of Defense dependents schools, and scores decreased in three states (Montana, Oklahoma, and South Dakota).

NAEP long-term trend mathematics results, reported on a scale of 0 to 500, are available for 12 assessment years, going back to the first in 1973. In 2012, the average mathematics score for 9-year-olds (244) was higher than in all previous assessment years prior to 2008 (table 222.85). The average score for 9-year-olds in 2012 was 5 points higher than in 2004 and 25 points higher than in 1973. The average mathematics score for 13-year-olds in 2012 (285) was higher than in all previous assessment years. For 13-year-olds, the average score in 2012 was 6 points higher than in 2004 and 19 points higher than in 1973. In contrast, the average score for 17-year-olds in 2012 (306) was not significantly different from the scores in 2004 and 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2012 than in 1973 (table 222.85). In comparison to 2004, average mathematics scores were higher in 2012 for White 9-, 13-, and 17-year-olds, Hispanic 9- and 13-year-olds, and Black 13-year-olds. Mathematics results for 2012 continued to show score gaps between White and Hispanic students (ranging from 17 to 21 points [based on unrounded scores], depending on age) and between White and Black students (ranging from 25 to 28 points). Across all three age groups, both the White-Black and White-Hispanic gaps in mathematics scores were lower in 2012 than in 1973. For example, among 17-year-olds, the White-Black gap was 40 points in 1973 compared to 26 points in 2012, and the White-Hispanic gap was 33 points in 1973 compared to 19 points in 2012.

While there was no significant difference between the average mathematics scores of male and female 9- and 13-year-olds in 2012, male students did score higher than female students at age 17 (table 222.85). At both age 9 and age 13, the gap between males and females in 2012 was not significantly different from the gap in 1973. At age 17, the 4-point gender score gap in 2012 was smaller than the gap in 1973 (8 points).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to 300. In 2009, White 4th-graders had a higher average science score (163) than did Black (127), Hispanic (131), Asian/Pacific Islander (160), and American Indian/Alaska Native (135) 4th-graders (table 223.10). The average science score was higher for male 4th-graders (151) than for female 4th-graders (149). In 2009, the pattern of differences in average science scores by students' race/ethnicity at grade 8 was similar to the pattern at grade 4. The average science score also was higher for male 8th-graders (152) than for female 8th-graders (148). At grade 12, average scores for White (159) and Asian/Pacific Islander (164) students were higher than the scores for Black (125), Hispanic (134), and American Indian/Alaska Native (144) students. The average science score in 2009 for male 12th-graders (153) was higher than the score for female 12th-graders (147). In 2011, a science assessment was conducted at grade 8 only. The average 8th-grade science score increased from 150 in 2009 to 152 in 2011. While there were no significant changes from 2009 to 2011 in the average scores for Asian/Pacific Islander or American Indian/Alaska Native 8th-graders, average scores increased 1 point for White 8th-graders, 3 points for Black 8th-graders, and 5 points for Hispanic 8th-graders. The average science score of White 8th-graders continued to be higher than the average scores of 8th-graders in all other racial/ethnic groups in 2011, but score gaps between White and Black 8th-graders and between White and Hispanic 8th-graders narrowed from 2009 to 2011. Average scores for both male and female 8th-graders were higher in 2011 than in 2009. In 2011, the average score was 5 points higher for male 8th-graders than for female 8th-graders, which was not significantly different from the 4-point gap in 2009.

Skills of Young Children

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of cognitive skills have been demonstrated at relatively early ages in the Early Childhood Longitudinal Survey's Birth Cohort (ECLS-B) study as well as its Kindergarten Class (ECLS-K) studies.

In 2003–04, about 64 percent of 2-year-olds demonstrated proficiency in expressive vocabulary, which measured toddlers' ability to communicate using gestures, words, and sentences (table 220.20). The percentage of 2-year-olds demonstrating expressive vocabulary was higher for females (69 percent) than for males (59 percent). Also, a higher percentage of White (71 percent) and Asian (62 percent) 2-year-olds demonstrated expressive vocabulary than of Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families who did so (52 percent).

Patterns of differences were also observed by race/ethnicity and SES for children at about 4 years of age (48 to 57 months old). In 2005–06, average early reading scores were higher for White (27) and Asian (31) 48- to 57-month-old children than for Black (23), Hispanic (21), and American Indian/Alaska Native (20) children (table 220.30). Also, high-SES children (33) had higher average early reading scores than low-SES children (19) at this age. These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores. White (32) and Asian (35) 48- to 57-month-old children had higher mathematics scores than Black (27), Hispanic (26), and American Indian/Alaska Native children (23). High-SES 48- to 57-month-old children (36) had higher average mathematics scores than low-SES children (24).

Children who enrolled in kindergarten for the first time in 2010–11 showed similar patterns of score differences by race/ethnicity and SES. In fall 2010, average mathematics scores were higher for first-time kindergartners from high-SES families (37) than for those from low-SES families (24) (table 220.40). White (33) and Asian (36) first-time kindergartners had higher mathematics scores than their Black (27), Hispanic (26), and American Indian/Alaska Native (27) counterparts. Similarly, reading scores in fall 2010 were higher for White (39) and Asian (42) first-time kindergartners than for their Black (36), Hispanic (35), and American Indian/Alaska Native (34) counterparts. High-SES children (43) had higher average early reading scores than low-SES children (32). These same patterns were observed among these children during 1st grade in spring 2012. White (67) and Asian (68) 1st-graders had higher mathematics scores than their Black (57), Hispanic (58), and American Indian/Alaska Native (61) counterparts. Average mathematics scores were higher for 1st-graders from high-SES families (70) than for those from low-SES families (55). Average reading scores were also higher for White (72) and Asian (74) 1st-graders than for their Black (67), Hispanic (66), and American Indian/Alaska Native (67) counterparts; and 1st-graders from high-SES families (77) had higher average reading scores than those from low-SES families (62).

SAT Scores of College-Bound Seniors

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1998–99 and 2004–05, the mathematics SAT average score increased by 9 points, but it decreased 7 points between 2004–05 (520) and 2013–14 (513) (table 226.20). The critical reading average score decreased 11 points between 2004–05 (508) and 2013–14 (497). The writing average score in 2013–14 (487) was 10 points lower than in 2005–06 (497), the year in which the SAT writing section was introduced.

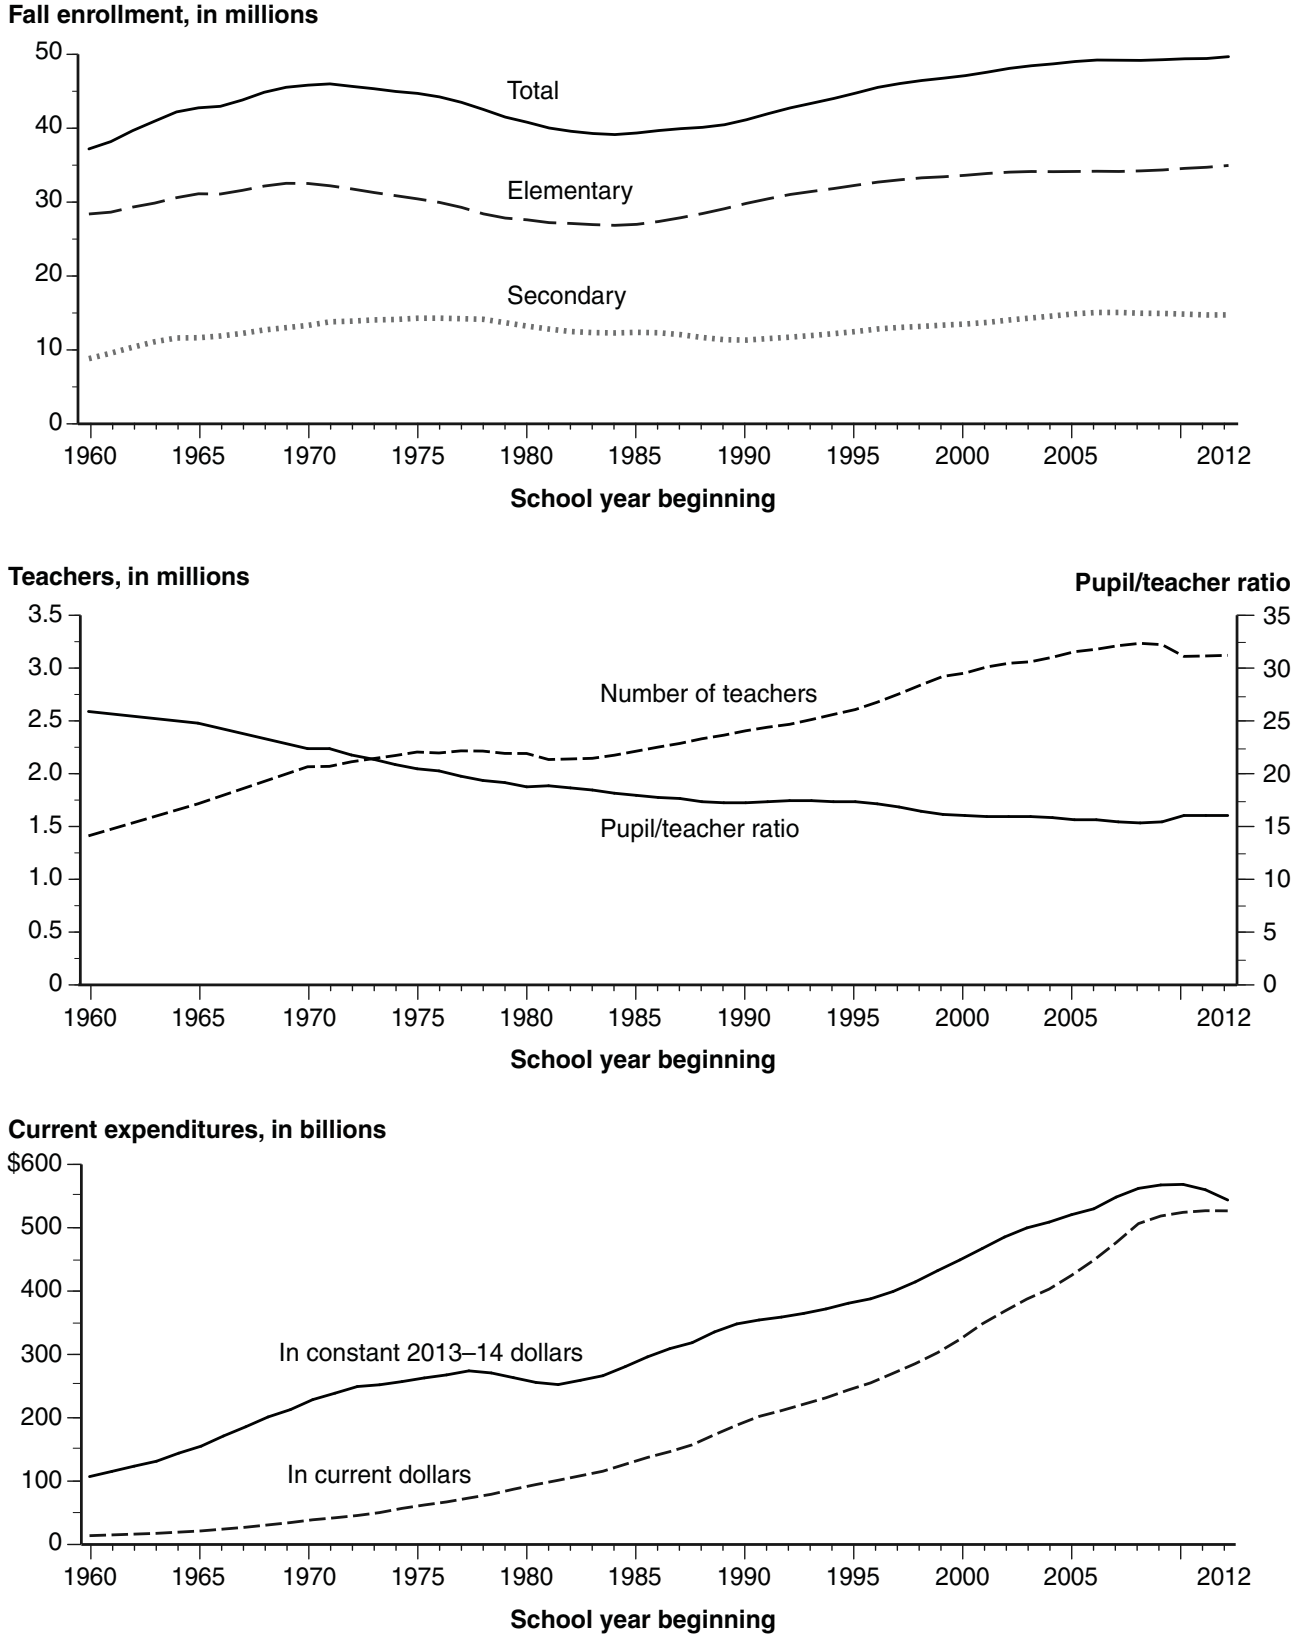
Coursetaking in High School

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2009. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.9 in 2009, and the number of science courses rose from 2.2 to 3.5 (table 225.10). The average number of courses in career/technical areas completed by public high school graduates was lower in 2009 (2.5 units) than in 2000 (2.9 units). As a result of the increased academic course load, the percentage of public and private high school graduates completing the 1983 National Commission on Excellence recommendations (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, and 2 units of foreign language) rose from 10 percent in 1982 to 62 percent in 2009 (table 225.50).

School Violence

In 2009–10, about 85 percent of public schools had a criminal incident, which is defined as theft, vandalism, drug possession, weapons possession, a serious violent crime, or a less serious violent crime such as a fight without weapons (table 229.20). In 2009–10, some 74 percent of schools reported one or more violent incidents, 44 percent of schools reported one or more thefts/larcenies, and 46 percent reported vandalism. The percentage of schools reporting a serious violent crime in 2009–10 (16 percent) was lower than the percentage of schools reporting a serious violent crime in 1999–2000 (20 percent). Also, the percentage of schools reporting an incident of vandalism was lower in 2009–10 (46 percent) than in 1999–2000 (51 percent). Overall, there were 4 criminal incidents reported per 100 students in 2009–10, which was lower than the 5 criminal incidents per 100 students reported in 1999–2000.

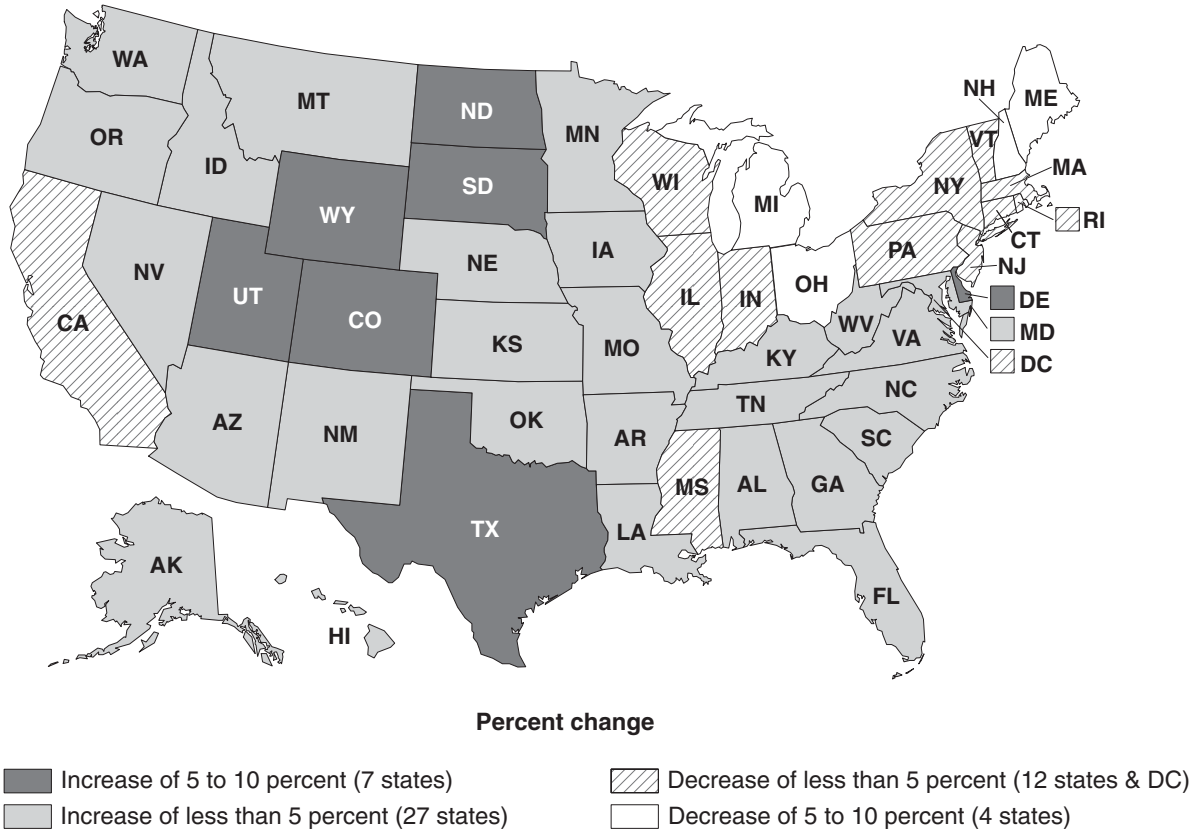
In 2013, data from the National Crime Victimization Survey showed that students ages 12–18 experienced more nonfatal victimizations at school than away from school. Nonfatal victimizations consist of theft and violent victimizations, which include serious violent crimes as well as simple assault. Students ages 12–18 experienced 1,420,900 nonfatal victimizations at school, compared with 778,500 away from school (table 228.20). These figures represent total victimization rates of 55 nonfatal victimizations per 1,000 students at school, compared with 30 per 1,000 students away from school. Between 1992 and 2013, the total victimization rates for students ages 12–18 generally declined both at and away from school. At school, the total victimization rate declined 70 percent, from 181 victimizations per 1,000 students in 1992 to 55 victimizations per 1,000 students in 2013. Away from school, the total rate declined 83 percent, from 173 victimizations per 1,000 students in 1992 to 30 victimizations per 1,000 students in 2013. This pattern of decline also held for thefts, all violent victimizations, and serious violent victimizations between 1992 and 2013. Thefts at school declined from a rate of 114 per 1,000 students to 18 per 1,000 students, and thefts away from school declined from 79 per 1,000 students to 16 per 1,000 students. The rate of violent victimization at school declined overall from 1992 (68 per 1,000 students) to 2013 (37 per 1,000 students); however, this rate increased between 2010 and 2013 (from 17 to 37 per 1,000 students). Away from school, the rate of violent victimization declined from 94 victimizations per 1,000 students in 1992 to 15 victimizations per 1,000 students in 2013. Serious violent victimization is a subcategory of violent victimization that includes the crimes of rape, sexual assault, robbery, and aggravated assault. Serious violent victimizations at school declined from 8 per 1,000 students in 1992 to 5 per 1,000 in 2013. The rate of serious violent victimization away from school declined from 43 victimizations per 1,000 students in 1992 to 6 per 1,000 in 2013.



Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 235.10 and figure 10).[5] However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986–87, but declined every school year thereafter until 2005–06, when the state share was 46.5 percent. Overall, between 2001–02 and 2011–12, the federal share increased from 7.9 percent to 10.2 percent, while the state share decreased from 49.2 to 45.2 percent. The local share in 2011–12 (44.6) was higher than the percentage in 2001–02 (42.9).

After adjustment for inflation, current expenditures per student in fall enrollment at public schools rose during the 1980s, remained stable during the first part of the 1990s, and then rose again until 2011 (table 236.55 and figure 11). There was an increase of 37 percent from 1980–81 to 1990–91, followed by minor fluctuations from 1990–91 to 1994–95. Although there was an overall increase of 28 percent from 1994–95 to 2011–12; the expenditure per student in 2011–12 was 5 percent lower than in 2008–09. In 2011–12, current expenditures per student in fall enrollment were $10,667 in unadjusted dollars. The expenditure for public school student transportation was $904 per student transported in 2011–12 (also in unadjusted dollars), and 55 percent of students were transported at public expense in 2007–08 (table 236.90).



[5]For data on individual years from 1980–81 through 1988–89, see *Digest of Education Statistics 2011* (NCES 2012-001), table 180.

—Not available.
[1]Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.
[2]Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports.
[3]Data for 1870–71.
[4]Estimated by the National Center for Education Statistics.
[5]Prior to 1919–20, data are for the number of different persons employed rather than number of positions.
[6]Prior to 1919–20, includes interest on school debt.
[7]Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.
[8]Beginning in 1969–70, includes capital outlay by state and local school building authorities.
[9]Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."
[10]Excludes community colleges and adult education.
[11]Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.
[12]Excludes current expenditures not allocable to pupil costs.
[13]"ADA" means average daily attendance in elementary and secondary schools.
[14]Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.
[15]Per-day rates derived by dividing annual rates by average length of term.
[16]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes a relatively small number of secondary ungraded students.
[2]Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.
[3]Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.
[4]Data are for 1927–28.
[5]Data are for 1940–41.
[6]Estimated.
[7]Projected.
NOTE: Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. The enrollment for ungraded public school students was estimated based on the secondary proportion of ungraded students in prior years. The enrollment of ungraded private school students was estimated based on the secondary proportion of ungraded students in individual high schools. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.
[2]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
[3]Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs.

NOTE: Preprimary programs include kindergarten and preschool (or nursery school) programs. "Preschool," which was referred to as "nursery school" in previous versions of this table, is defined as a group or class that is organized to provide educational experiences for children during the year or years preceding kindergarten. Data are based on sample surveys of the civilian noninstitutional population. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Data pertain only to parents or guardians who live in the household with the child.

NOTE: Preprimary programs provide educational experiences for children and include kindergarten, preschool, and nursery school programs. Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs. Race categories exclude persons of Hispanic ethnicity. Data are based on sample surveys of the civilian noninstitutional population. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.
[2]Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs.
[3]Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.
[4]Children who spent an equal number of hours per week in multiple nonparental care arrangements.
[5]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and non-poor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
[6]Includes persons of all other races and Two or more races.
[7]Excludes children living apart from their parents.
[8]Excludes children living in households with no mother or female guardian present.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
[2]Excludes children living in households with no mother or female guardian present.
[3]Includes persons of all other races and Two or more races.
[4]A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.
[5]Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs.
[6]Refers to children who spent an equal number of hours per week in multiple nonparental care arrangements.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECPP-NHES:1995, 2001, 2005, and 2012). (This table was prepared November 2014.)

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]Includes persons of all other races and Two or more races.
[2]The total percentage of children who participated in nonparental arrangements. Counts each child only once, even if the child participated in more than one type of nonparental care.
[3]Center-based programs include day care centers, nursery schools, prekindergartens, preschools, and Head Start programs.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Education Survey, Parent Survey, and Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECE-NHES:1991; Parent-NHES:1999; ECPP-NHES:1995, 2001, 2005, and 2012). (This table was prepared September 2014.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population with data on primary care arrangements.
[2]Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.
[3]Care provided in the child's home or in another private home by a relative (excluding parents).
[4]Care provided in the child's home or in another private home by a person unrelated to the child.
[5]Care provided in places such as early learning centers, nursery schools, and preschools.
[6]Children who spent an equal amount of time in each of two or more arrangements.
[7]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 44 and 65 months of age with data on primary care arrangements.
[8]Mothers who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.
[9]Poverty status based on Census Bureau guidelines from 2002 (for 2-year-olds in 2003–04) and 2005 (for 4-year-olds in 2005–06), which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392 (in current dollars).
[10]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.
NOTE: Data are based on a representative sample of children born in 2001. Estimates for children at about 2 years of age weighted by W2R0. Estimates for children at about 4 years of age weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Some data have been revised from previously published figures.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.
[2]Care provided in the child's home or in another private home by a relative (excluding parents) or by a person unrelated to the child.
[3]Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.
[4]Quality rating based on the Early Childhood Environment Rating Scale (ECERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.
[5]Care provided in places such as early learning centers, nursery schools, and preschools, not classified as Head Start.
[6]Mothers who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.
[7]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392 (in current dollars).
[8]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.
NOTE: Estimates weighted by W33P0. Estimates pertain to children assessed between 44 months and 65 months of age. Rating is for child's primary type of care arrangement, which was the type of nonparental care in which the child spent the most hours. Children who were primarily cared for by parents or in multiple arrangements are not included in this table. Ratings of care arrangement quality using both the FDCRS and ECERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ECERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]The type of nonparental care in which the child spent the most hours. Multiple arrangements refers to children who spent an equal amount of time in each of two or more types of arrangements.
[2]Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.
[3]Parents highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
[4]Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its annual income was less than $17,552 in 2010.
[5]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.
NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

†Not applicable.
#Rounds to zero.
[1]Excludes children living in households with no mother or female guardian present.
[2]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Enrollment data include homeschooled students and ungraded students if a grade equivalent was available. For 2001 and 2005, excludes students for whom no grade equivalent was available. For 2012, all students had a known grade level and were included. While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Detail may not sum to totals because of rounding.

NOTE: Due to changes in reporting and imputation practices, prekindergarten enrollment for years prior to 1992 represent an undercount compared to later years. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior reports. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]For this year, data on students of two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.
[2]Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of two or more races were not collected. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 1995–96 through 2012–13; and National Elementary and Secondary Enrollment by Race/Ethnicity Projection Model, 1972 through 2024. (This table was prepared March 2015.)

Table 203.60. Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2024

—Not available.
†Not applicable.
[1]For this year, data on students of two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.
[2]Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of two or more races were not collected separately. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Data for California for 1989–90 and earlier years are not strictly comparable with those for other states because California's attendance figures included excused absences.
[2]Excludes average daily attendance for regional occupational programs and summer school programs that were reported in prior years.

NOTE: Some data have been revised from previously published figures.

[1]U.S. total includes imputation for nonreporting states.
[2]Imputation for survey nonresponse. State-level imputations for 2000–01 were based on the reported percentages for 2001–02 applied to the 2000–01 enrollments. State-level imputations for 2011–12 were based on the reported percentages for 2010–11 applied to the 2011–12 enrollments.

NOTE: Table reflects counts of students enrolled in all schools for which both enrollment data and free/reduced-price lunch eligibility data were reported. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000–01, 2010–11, 2011–12, and 2012–13. (This table was prepared December 2014.)

Table 204.20. Number and percentage of public school students participating in programs for English language learners, by state: Selected years, 2002–03 through 2012–13

[1]U.S. total includes imputation for nonreporting states.
[2]Imputation for survey nonresponse. State-level imputations were based on the percentages reported by the state for other years applied to the enrollment for the given year.
[3]Based on data reported by the California Education Agency (http://www.cde.ca.gov/ds/sd/cb/cefelfacts.asp).
NOTE: Includes students served in regular school districts, excluding regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools.

—Not available.
[1]National totals do not include data for Bureau of Indian Education (BIE) schools. In fall 2010, the most recent year for which BIE data are available, there were 12,130 American Indian/Alaska Native ELL program participants in BIE schools.
[2]Projected.
[3]For 2009, data on students of Two or more races are included in the totals but are not shown separately. Only a small number of states reported these data, and they are not comparable to data for 2010 and later years.
[4]Includes imputations for missing data.
[5]Enrollment base for percentage of enrollment is projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because racial/ethnic categories were not reported for some students and because of rounding.

†Not applicable.
#Rounds to zero.
[1]Data do not include Vermont, for which 2007–08 and 2008–09 data were not available. In 2006–07, the total number of 3- to 21-year-olds served in Vermont was 14,010.
[2]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
[3]For 1990–91, preschool children are not included in the counts by disability condition but are separately reported. For other years, preschool children are included in the counts by disability condition.
[4]Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.20.
NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Data are for the 50 states and the District of Columbia only. Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old children with disabilities. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]For years prior to 2010–11, Asian data include Pacific Islanders.
[2]Data do not include Vermont, for which 2007–08 and 2008–09 data were not available.
[3]For 2008–09 and 2009–10, data on children of two or more races were reported by only a small number of states. Therefore, these data are not comparable to figures for later years.
[4]For 2012–13, the total column shows the overall counts of children as reported by the 50 states and the District of Columbia rather than the sum of counts reported for individual racial/ethnic groups. (Due to data limitations, summing the data for the racial/ethnic groups results in a total overcount of 56 children in the 3- to 5-year-old age group and 844 children in the 6- to 21-year-old age group.)
[5]Based on the total enrollment in public schools, prekindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50.
NOTE: Data include only those children served for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.

[1]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

[2]Based on the total enrollment in public schools, prekindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50.

NOTE: Data include only those children served for whom race/ethnicity and type of disability were reported. Although data are for the 50 states and the District of Columbia, data limitations result in inclusion of a small (but unknown) number of students from Bureau of Indian Education and Puerto Rican schools. For these reasons, totals may differ from those shown in other tables. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.
[1]Students who are enrolled by their parents or guardians in regular private schools and have their basic education paid through private resources, but receive special education services at public expense. These students are not included under "Regular school, time inside general class" (columns 3 through 5).
[2]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

NOTE: Data are for the 50 United States, the District of Columbia, and the Bureau of Indian Education schools. Detail may not sum to totals because of rounding.

[1]Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.10.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for 1990–91 include children ages 0–21 served under Chapter 1.

†Not applicable.
#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

[1]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
[2]Data for 2006 are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection: 2004 and 2006. (This table was revised May 2008.)

Table 204.90. Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006

†Not applicable.
#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

[1]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
[2]Data for 2006 are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
NOTE: Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection: 2004 and 2006. (This table was prepared June 2008.)

Table 205.10. Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2011

[Standard errors appear in parentheses]

Grade level and year	Total private enrollment				Private enrollment, by region											
					Northeast				Midwest				South			
	In thousands		Percent of total enrollment		In thousands		Percent of total enrollment in Northeast		In thousands		Percent of total enrollment in Midwest		In thousands		Percent of total enrollment in South

#Rounds to zero.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding.

†Not applicable.
[1]Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding.

†Not applicable.
#Rounds to zero.
[1]Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.
[2]Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.
[3]Race/ethnicity was not collected for prekindergarten students (788,370 out of 5,488,490 students in 2009 and 773,240 out of 5,268,090 students in 2011). Percentage distribution is based on the students for whom race/ethnicity was reported.
NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2009–10 and 2011–12. (This table was prepared April 2013.)

—Not available.
†Not applicable.
#Rounds to zero.
[1]Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.
[2]Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.
[3]Race/ethnicity was not collected for prekindergarten students (773,000 in fall 2011). Percentage distribution is based on the students for whom race/ethnicity was reported.
[4]For 1999, Pacific Islander students are included under Asian. Prior to 2009, data were not collected on Pacific Islander students as a separate category.
[5]Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.
NOTE: Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1999–2000, 2009–10, and 2011–12. (This table was prepared April 2013.)

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Only includes kindergarten students who attend schools that offer first or higher grade.
[2]Each school reports the highest annual tuition charged for a full-time student; this amount does not take into account discounts that individual students may receive. This amount is weighted by the number of students enrolled in each school and averaged.

NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level. Excludes prekindergarten students. Includes a small percentage of schools reporting tuition of 0; these private schools are often under contract to public school districts to provide special education services. Detail may not sum to totals because of rounding and cell suppression. Some data have been revised from previously published figures.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[2]Schools with no grade lower than 7.
[3]Schools with grades lower than 7 and higher than 8, as well as schools that do not classify students by grade level.
[4]Includes student support services professional staff, such as school psychologists, social workers, and speech therapists or pathologists.
[5]Includes other employees not identified by function.
NOTE: FTE staff consists of the total number of full-time staff, plus 48 percent of the part-time staff; this percentage was estimated based on the number of hours that part-time staff reported working. Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

[1]Elementary enrollment is for kindergarten through grade 8, and secondary enrollment is for grades 9 through 12.
[2]From 1919–20 through fall 1960, includes part-time teachers. From 1969–70 through 1993–94, excludes part-time teachers. Beginning in 1994–95, reported in full-time equivalents (FTE). Prekindergarten teachers not counted separately but may be included with elementary teachers.
[3]Includes middle schools.
[4]Prekindergarten enrollment was not reported separately, but may be included in elementary enrollment.
[5]Includes estimates for the nonreporting schools.
[6]Excludes the Archdiocese of New Orleans.
NOTE: Data collected by the National Catholic Educational Association and data collected by the National Center for Education Statistics are not directly comparable because survey procedures and definitions differ.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CVV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2001–02 through 2011–12. (This table was prepared May 2013.)

Table 206.10. Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 2003, 2007, and 2012

[Standard errors appear in parentheses]

#Rounds to zero.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Refers to all students in public and private schools and homeschooled students.
[2]Numbers and percentages of homeschoolers exclude students who were enrolled in school for more than 25 hours a week or who were homeschooled only due to a temporary illness.
[3]The National Center for Education Statistics uses a statistical adjustment for estimates of total homeschoolers in 2012. For more information about this adjustment, please see *Homeschooling in the United States: 2012* (NCES 2015-019, forthcoming). All other estimates about homeschoolers do not use a statistical adjustment.
[4]Students whose grade equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.02 percent in 2003 and 2007. There were no students with an "ungraded" grade equivalent in 2012.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2007, and 2012). (This table was prepared November 2014.)

Table 206.20. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]In 160 cases, questions about whether the school was assigned were not asked because parents reported the school as a private school, and it was only later found to be a public school. These cases were excluded from the analysis of assigned versus chosen public schools, but were included in the charter school analysis as well as in the public school and overall totals.
[2]Includes all types of public noncharter schools.
[3]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
[4]Includes only students enrolled in public schools.
NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2012). (This table was prepared September 2014.)

†Not applicable.
[1]This column shows percentages of public school students only. Private school students are excluded from the analysis.
[2]There were 160 cases excluded from the school type analysis because parents reported the school as a private school when it was later found to be a public school, and therefore questions about whether the school was assigned were not asked.
[3]Students who attended chosen public schools were automatically coded as yes for whether or not their district allowed public school choice.
[4]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
NOTE: Data exclude homeschooled children. While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2007, and 2012). (This table was prepared September 2014.)

Table 207.10. Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 2001, 2007, and 2012

[Standard errors appear in parentheses]

Selected child or family characteristic	Number of children (in thousands)			Percent of children participating in activity with family member[1]																	
				Read to by family member three or more times in past week			At least once in past week												Visited a library at least once in past month		
							Told a story by family member			Taught letters, words, or numbers			Did arts and crafts

[1]The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.
[2]Excludes children living in households with no mother or female guardian present.
[3]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]In 2007 and 2012, a single item asked parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.
[2]Excludes children who were not able to speak.
[3]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.
NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey (PFI:2003, 2007, and 2012) of the National Household Education Surveys Program. (This table was prepared September 2014.)

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Excludes children who were not able to speak.
[2]Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2011, for example, the poverty threshold for a family of four with two children was $22,811. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 2012 and prior years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

—Not available.
[1]Includes imputations for California and Wyoming.
NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1990–91 through 2012–13. (This table was prepared March 2015.)

[1]A teacher is considered to be a new hire for a public or private school if the teacher had not taught in that control of school in the previous year. A teacher who moves from a public to private or a private to public school is considered a new teacher hire, but a teacher who moves from one public school to another public school or one private school to another private school is not considered a new teacher hire.
[2]Estimated.
[3]Projected.
NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Includes imputed values for states.
[2]Includes imputations to correct for underreporting of prekindergarten teachers/enrollment.
[3]Includes imputations to correct for underreporting of prekindergarten, kindergarten, and secondary teachers.
[4]Includes imputations to correct for underreporting of kindergarten teachers.
NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios reflect totals reported by states and differ from totals reported for schools or school districts.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2012–13. (This table was prepared October 2014.)

Table 209.10. Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987–88 through 2011–12

[Standard errors appear in parentheses]

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Data for years 1987–88 through 1999–2000 are only roughly comparable to data for later years, because the new category of two or more races was introduced in 2003–04.
[2]Includes Pacific Islander for years 1987–88 through 1999–2000.
[3]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding, missing data, and cell suppression. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 1987–88 through 2011–12; "Private School Teacher Data File," 1987–88 through 2011–12; and "Charter School Teacher Data File," 1999–2000. (This table was prepared July 2013.)

Table 209.20. Number, highest degree, and years of full-time teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 through 2011–12

[Standard error appears in parentheses]

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
[2]Data for 1999–2000 are only roughly comparable to data for later years, because the new category of two or more races was introduced in 2003–04.
[3]Includes Pacific Islander.
[4]Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.
[5]Included under Other elementary.
[6]Included under Other secondary.
NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
[1]Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.
[2]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Detail may not sum to totals because of rounding and cell suppression.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Data File," 2011–12. (This table was prepared May 2013.)

Table 209.50. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2011–12

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.
[2]Data may sum to more than 100 percent because (1) a teacher who reported more than one major is represented in more than one field of study and (2) a teacher with multiple degrees in different fields of study is represented in more than one field of study.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
[1]For 2003–04, combined schools are included in the total but not shown separately.

NOTE: Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12, and none of grades kindergarten through grade 6. Combined schools have both elementary and secondary grades, or have all students in ungraded classrooms.

†Not applicable.
[1]Data for combined private schools in 2011–12 are included in the total, but not shown separately due to low response rates (under 50 percent).

NOTE: Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12, and none of grades kindergarten through grade 6. Combined schools have both elementary and secondary grades, or have all students in ungraded classrooms.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes retirement pension funds paid during the school year.
[2]Includes compensation for extracurricular or additional activities such as coaching, student activity sponsorship, or teaching evening classes.
[3]Includes teaching summer sessions and other non-teaching jobs at any school.
[4]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.
[5]Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and missing values in cells with too few cases to report.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
[2]Includes teachers with levels of education below the bachelor's degree (not shown separately).
[3]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
[2]The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

—Not available.
†Not applicable.
#Rounds to zero.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Data for 1993–94 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003–04.
[2]Includes Pacific Islander for 1993–94.
[3]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
[4]Excludes data for 4,930 public and 2,690 private school principals whose school level could not be determined.
NOTE: Data are based on a head count of full-time and part-time principals rather than on the number of full-time-equivalent principals reported in other tables. Detail may not sum to totals because of rounding, missing data, and cell suppression. Race categories exclude persons of Hispanic ethnicity.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Principal Data File" and "Private School Principal Data File," 1993–94, 2003–04, 2007–08, and 2011–12. (This table was prepared October 2014.)

Table 212.10. Number, highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2011–12

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. Excludes principals reporting a salary of $0.
[2]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.
[3]Data include Pacific Islanders.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes retired, on leave (e.g., maternity/paternity or disability), deceased, and "other."
[2]Includes principals who moved from a public school to a private school, a category that is not shown separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

—Not available.

[1]Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.

[2]Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.

[3]Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*, various years; *Statistics of Public Elementary and Secondary Schools*, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2012–13. (This table was prepared October 2014.)

Table 213.20. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2012

[In full-time equivalents]

State or jurisdiction	Total	School district staff			School staff						Student support staff	Other support services staff
		Officials and administrators	Administrative support staff	Instruction coordinators	Principals and assistant principals	School and library support staff	Teachers	Instructional aides	Guidance counselors	Librarians

—Not available.
[1]Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools.
[2]Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.
[3]Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.
[4]Includes regular schools and special schools not classified by grade span.
[5]Includes elementary, secondary, and combined elementary/secondary schools.
[6]These data cannot be compared directly with the data for years after 1980–81.
[7]Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.

†Not applicable.
NOTE: Size not reported (column 11) includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals differ from other tables because this table represents data reported by regular school districts rather than states or schools. Detail may not sum to totals because of rounding.

[1]Regular school districts include both independent districts and those that are a dependent segment of a local government. Also includes components of supervisory unions that operate schools, but share superintendent services with other districts.
[2]New York City counted as one school district.

NOTE: DoD = Department of Defense.

†Not applicable.
#Rounds to zero.
[1]Located inside an urbanized area and inside a principal city with a population of at least 250,000.
[2]Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.
[3]Located inside an urbanized area and inside a principal city with a population less than 100,000.
[4]Located inside an urbanized area and outside a principal city with a population of 250,000 or more.
[5]Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.
[6]Located inside an urbanized area and outside a principal city with a population less than 100,000.
[7]Located inside an urban cluster that is 10 miles or less from an urbanized area.
[8]Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.
[9]Located inside an urban cluster that is more than 35 miles from an urbanized area.
[10]Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.
[11]Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
[12]Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.
[13]Average for schools reporting enrollment. Enrollment data were available for 95,222 out of 98,817 schools in 2009–10, 95,111 out of 98,817 schools in 2010–11, 94,743 out of 98,328 schools in 2011–12, and 94,771 out of 98,454 schools in 2012–13.
[14] Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.
[15]Data are based on locales of school districts. rather than locales of schools as in the rest of the table. Includes imputed data for California and Vermont.
NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Enrollment and ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states. Some data have been revised from previously published figures.

—Not available.
†Not applicable.
#Rounds to zero.
[1]Percentages are for those schools that reported on free and reduced-price lunch eligibility.
[2]The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.
[3]Includes regular diplomas only.
[4]Total for districts reporting data.
[5]Reported data indicated an averaged freshman graduation rate of greater than 100.0 percent.
NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. ISD = independent school district. CISD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds, see http://www.census.gov/hhes/www/poverty/data/threshld.
[2]Current expenditure per pupil based on fall enrollment collected through the "Local Education Agency (School District) Finance Survey (F33)."
[3]Includes other expenditures not shown separately.
[4]Fiscal year 2014 Department of Education funds available for spending by school districts beginning with the 2014–15 school year.
[5]Fiscal year 2014 Department of Education funds available for spending by school districts beginning with the 2014–15 school year divided by number of poverty children in 2013.
[6]Includes data for both Modesto City Elementary and Modesto City High.
NOTE: Detail may not sum to totals because of rounding. ISD = independent school district. CISD = consolidated independent school district.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2012–13; "Local Education Agency (School District) Finance Survey (F33)," 2011–12; and unpublished Department of Education budget data. (This table was prepared May 2015.)

Table 215.30. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2012: Selected years, 2011–12 through 2014

Name of district	State	Rank order	Enrollment, fall 2012	5- to 17-year-old population, 2013	5- to 17-year-olds in poverty, 2013[1]	Poverty rate of 5- to 17-year-olds, 2013[1]	Revenues by source of funds, 2011–12				Revenue from selected federal programs (in thousands), 2011–12						Federal Title I allocations (in thousands), federal fiscal year 2014[2]				
							Total (in thousands)	Federal (in thousands)	Federal as a percent of total	Federal revenue per student[3]	Title I basic and concentration grants	School lunch	Individuals with Disabilities Education Act (IDEA)	Eisenhower math and science	Vocational education	Drug-free schools	Total	Basic grants	Concentration grants	Targeted grants	Education finance incentive grants

[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds, see http://www.census.gov/hhes/www/poverty/data/threshld/.

[2]Fiscal year 2014 Department of Education funds available for spending by school districts in the 2014–15 school year.

[3]Federal revenue per student is based on fall enrollment collected through the "Local Education Agency (School District) Finance Survey (F33)."

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district.

—Not available.
[1]Includes schools that provide nontraditional education, address needs of students that typically cannot be met in regular schools, serve as adjuncts to regular schools, or fall outside the categories of regular, special education, or vocational education.
[2]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[3]Includes schools with no grade lower than 7.
[4]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
[5]Magnet and charter schools are also included under regular, special education, vocational, or alternative schools as appropriate.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1990–91 through 2012–13. (This table was prepared January 2015.)

Table 216.30. Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 1999–2000 through 2012–13

[1]The National School Lunch Program is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a student must be from a household with an income between 130 percent and 185 percent of the poverty threshold.
[2]Pupil/teacher ratio based on schools that reported both enrollment and teacher data. Data for 2010 include imputations for teachers in California and Vermont.
[3]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[4]Includes schools with no grade lower than 7.
[5]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.
[1]Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.
[2]Includes elementary, secondary, combined elementary/secondary, and other schools.
[3]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[4]Includes schools with no grade lower than 7.
[5]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
[6]Includes special education, alternative, and other schools not reported by grade span.
[7]Excludes special education schools, vocational schools, and alternative schools.
[8]Data are for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 95,111 out of 98,817 schools in 2010–11, 94,743 out of 98,328 in 2011–12, and 94,771 out of 98,454 in 2012–13.
NOTE: Detail may not sum to totals because of rounding.

[1]Includes data for Two or more races reported by 14 states.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1995–96 through 2012–13. (This table was prepared March 2015.)

Table 216.60. Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: 2012–13

[1]Includes students enrolled in schools that did not report free or reduced-price lunch eligibility.
[2]Excludes 13,630 students whose race/ethnicity was not available. Includes students who attended combined elementary/secondary schools and schools not reported by grade span, which are not shown separately.
[3]Combined elementary/secondary schools and schools not reported by grade span are not shown separately.
[4]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[5]Includes schools with no grade lower than 7.
NOTE: Students with household incomes under 185 percent of the poverty threshold are eligible for free or reduced price lunch under the National School Lunch Program (NSLP). In addition, some groups of children—such as foster children, children participating in the Head Start and Migrant Education programs, and children receiving services under the Runaway and Homeless Youth Act—are assumed to be categorically eligible to participate in the NSLP. Also, under the Community Eligibility option, some nonpoor children who attend school in a low-income area may participate if the district decides that it would be more efficient to provide free lunch to all children in the school. For more information, see http://www.fns.usda.gov/nslp/national-school-lunch-program-nslp. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.
[1]Excludes vocational, special education, and alternative schools.
[2]Vocational schools are also included under appropriate grade span. Includes vocational schools not classified as secondary schools.
[3]Average for schools reporting enrollment data. Enrollment data were available for 22,710 out of 24,280 public secondary schools in 2012–13.

NOTE: Includes schools with no grade lower than 7. Excludes schools not reported by grade level, such as some special education schools for the disabled. DoD = Department of Defense.

—Not available.
[1]Includes schools that provide nontraditional education, address needs of students that typically cannot be met in regular schools, serve as adjuncts to regular schools, or fall outside the categories of regular, special education, or vocational education.
[2]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[3]Includes schools with no grade lower than 7.
[4]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
[5]Charter schools are also included under the school level and type categories, as appropriate.

NOTE: This table indicates the school year by which the school no longer operated (generally it closed between that school year and the prior school year). The closure of a school does not necessarily mean that a building is no longer used for educational purposes. A single school may share a building with another school, or one school may be housed in several buildings.

#Rounds to zero.
!Interpret data with caution.The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) for this estimate is 50 percent or greater.
[1]Excludes special education, vocational, and alternative schools; schools without enrollment data; and schools offering only preprimary education.
[2]The functional age of the main instructional building is the number of years since its most recent major renovation or since its construction if no major renovation has ever occurred.
[3]Based on schools whose main instructional building has undergone a major renovation.
[4]Based on the 99 percent of public schools with permanent buildings.
[5]Based on schools with the specified environmental factor in their permanent buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."
[6]Based on the 31 percent of public schools with portable (temporary) buildings.
[7]Based on schools with the specified environmental factor in their portable (temporary) buildings. Includes ratings of "unsatisfactory" and "very unsatisfactory."
NOTE: Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
[1]Data for combined schools are included in the totals and in analyses by other school characteristics, but are not shown separately.
[2]Due to definitional changes for community type, estimates for years prior to 2005 may not be directly comparable with estimates for later years.
[3]Free or reduced-price lunch information was obtained on the questionnaire and supplemented, if necessary, with data from the Common Core of Data (CCD).
[4]Includes computers used for instructional or administrative purposes.
[5]In 2008, instructional rooms included classrooms only and excluded computer labs and library/media centers. Prior to 2008, instructional rooms included classrooms, computer labs and other labs, library/media centers, and other rooms used for instructional purposes.
[6]Some data differ slightly (e.g., by 1 percent) from previously published figures.
NOTE: Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Based on students regularly enrolled in the districts. Enrollments may include duplicated counts of students, since districts were instructed to count a student enrolled in multiple courses for each course in which he or she was enrolled.
[2]Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.

NOTE: Percentages are based on unrounded numbers. For the 2002–03 FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. For the 2004–05 FRSS study sample, there were 7 cases for which district enrollment size was missing and 103 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data.

—Not available.
[1]Includes graduates of public and private schools.
[2]Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education. Includes estimates for jurisdictions not reporting counts of graduates by sex.
[3]The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.
[4]Derived from Current Population Reports, Series P-25. For years 1869–70 through 1989–90, 17-year-old population is an estimate of the October 17-year-old population based on July data. Data for 1990–91 and later years are October resident population estimates prepared by the Census Bureau.
[5]Estimated.
[6]Includes imputations for nonreporting states.
[7]Projected by private schools responding to the Private School Universe Survey.
[8]Includes estimates for public schools in New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.
[9]Includes estimate for Connecticut, which did not report graduates by sex.
[10]Projected by NCES.
NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.
[1]U.S. total includes estimates for nonreporting states.
[2]Estimated high school graduates from NCES 2011-312, *Public School Graduates and Dropouts from the Common Core of Data: School Year 2008–09*.
[3]Beginning in 1989–90, graduates from adult programs are excluded.
[4]Projected data from NCES 2009-062, *Projections of Education Statistics to 2018*.
[5]Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.
[6]Projected data from NCES 91-490, *Projections of Education Statistics to 2002*.
NOTE: Data include regular diploma recipients, but exclude students receiving a certificate of attendance and persons receiving high school equivalency certificates. DoD = Department of Defense. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]Data on students of Two or more races were not reported by all states; therefore, the data are not comparable to figures for 2010–11 and later years.
[2]Projected.
NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2007–08, data on students of Two or more races were not collected separately. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.
[2]U.S. total includes estimates for nonreporting states.
[3]Estimated high school graduates from NCES 2011-312, *Public School Graduates and Dropouts From the Common Core of Data: School Year 2008–09*.
[4]Projected high school graduates from NCES 2009-062, *Projections of Education Statistics to 2018*.
[5]Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.
[6]Includes 1,419 fall 2006 9th-graders who attended publicly funded private schools that were not reported in the 2006–07 Common Core of Data, but were reported in data for later years.
[7]Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity. Some data have been revised from previously published figures.

—Not available.
‡Reporting standards not met (too few cases).
[1]Total averaged freshman graduation rate (AFGR) is based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.
[2]AFGR is based on an estimate of 30 to 99 students entering ninth grade and may show large variation from year to year.
[3]AFGR by sex is based on an estimated distribution of male and female graduates.
NOTE: The AFGR provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. The enrollment data used in computing the AFGR for race/ethnicity categories include only students for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Dropout and Completion Data File," 2010–11. (This table was prepared January 2016.)

Table 219.50. Number and percentage of 9th- to 12th-graders who dropped out of public schools, by race/ethnicity, grade, and state or jurisdiction: 2009–10

State or jurisdiction	Percent of 9th- to 12th-graders who dropped out (event dropout rate), by race/ethnicity							Number and percent of 9th- to 12th-graders who dropped out (event dropout rate), by grade							
								Grade 9		Grade 10		Grade 11		Grade 12	
	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races	Number of dropouts	Event dropout rate	Number of dropouts	Event dropout rate	Number of dropouts	Event dropout rate	Number of dropouts	Event dropout rate

#Rounds to zero.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Data were imputed based on prior year rates.
NOTE: Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school between one October and the next. Enrollment and dropout data for ungraded students were prorated into grades 9 through 12 based on the counts for graded students. DoD stands for Department of Defense.

—Not available.
[1]Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years. For 1989 and later years, age data are only for test passers. The less than 1 percent of people who failed to report their date of birth—2,948 of the 540,535 test passers in 2013—were excluded from the calculation.
[2]All people taking the GED tests (one or more subtests).
[3]People completing the entire GED battery of five tests.
[4]Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states, GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).
[5]Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.
[6]For 1988 and prior years, 19-year-olds are included with the 16- to 18-year-olds instead of the 19- to 24-year-olds.
[7]A revised GED test was introduced in 2002. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002.
NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding.

†Not applicable.
[1]The status completion rate is the number of 18- to 24-year-olds who are high school completers as a percentage of the total number of 18- to 24-year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED.
[2]Race categories exclude persons of Hispanic ethnicity. Prior to 2003, Asian data include Pacific Islanders, because Asian and Pacific Islander data were collected as a single, combined race category. Beginning in 2003, Asians and Pacific Islanders have been separately categorized. Also beginning in 2003, respondents have been able to select more than one race category and can therefore be categorized as of Two or more races. As of 2003, the Pacific Islander and Two or more races categories are included in the totals but are not separately shown due to small sample sizes. The American Indian/Alaska Native category is included in the totals for all years.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Because of changes in data collection procedures, data for 1992 and later years may not be comparable with figures for prior years. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Includes all 18- to 24-year-olds who are not enrolled in high school or a lower level of education.
[2]Status completers are 18- to 24-year-olds who are not enrolled in high school or a lower level of education and who also are high school completers—that is, have either a high school diploma or an alternative credential, such as a GED.
[3]The status completion rate is the number of 18- to 24-year-olds who are high school completers as a percentage of the total number of 18- to 24-year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED.
[4]The United States includes the 50 states and the District of Columbia. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.
[5]Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 2013. (This table was prepared February 2015.)

Table 219.70. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2013

[Standard errors appear in parentheses]

Year	Total status dropout rate				Male status dropout rate				Female status dropout rate

—Not available.
†Not applicable.
[1]Includes other racial/ethnic categories not separately shown.
[2]Based on the April 1960 decennial census.
[3]For 1967 through 1971, White and Black include persons of Hispanic ethnicity.
[4]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
[5]White and Black exclude persons identifying themselves as two or more races.
[6]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2013. (This table was prepared July 2014.)

Table 219.71. Population 16 through 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by sex and race/ethnicity: 1970 through 2013

[Standard errors appear in parentheses]

—Not available.
†Not applicable.
#Rounds to zero.
[1]Includes other racial/ethnic categories not separately shown.
[2]For 1970 and 1971, White and Black include persons of Hispanic ethnicity.
[3]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
[4]White and Black exclude persons who selected more than one race category. These persons are classified as Two or more races and included only in the "All races" columns. Prior to 2003, respondents could select only a single race category.
[5]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.
NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2013. (This table was prepared March 2015.)

Table 219.75. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: 1970 through 2013

[Standard errors appear in parentheses]

Year	Status dropout rate		Status dropout rate, by family income quartile								Percentage distribution of status dropouts, by labor force status								Percentage distribution of status dropouts, by years of school completed									
			Lowest quartile		Middle low quartile		Middle high quartile		Highest quartile		Total		Employed[1]		Unemployed		Not in labor force		Total		Less than 9 years		9 years		10 years		11 or 12 years

†Not applicable.
[1]Includes persons who were employed but not at work during the survey week.
[2]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
[3]Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2013. (This table was prepared July 2014.)

Table 219.80. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: 2011 and 2012

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Persons living in households as well as persons living in noninstitutionalized group quarters. Noninstitutionalized group quarters include college and university housing, military quarters, facilities for workers and religious groups, and temporary shelters for the homeless.
[2]Persons living in institutionalized group quarters, including adult and juvenile correctional facilities, nursing facilities, and other health care facilities.
[3]United States refers to the 50 states and the District of Columbia.
NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school and whether they ever attended school in the United States. People who have received GED credentials are counted as high school completers. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Status dropout rates in this table may differ from those in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations.

[1]Students may exit special education services due to maximum age beginning at age 18, depending on state law or practice or order of any court.
[2]"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit for any of the other reasons described. Includes students previously categorized as "moved, not known to continue."
[3]"Transferred to regular education" was previously labeled "no longer receives special education."
[4]"Moved, known to be continuing" is the total number of students who moved out of the administrative area or transferred to another district and are known to be continuing in an educational program.
[5]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
NOTE: Data are for the 50 states, the District of Columbia, and the Bureau of Indian Education schools. Detail may not sum to totals because of rounding.

†Not applicable.
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
[1]Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II; for more information, see NCES's *Early Childhood Longitudinal Study, Birth Cohort (ECLS-B) Psychometric Report for the 2-year Data Collection*. The proficiency probabilities indicate mastery of a specific skill or ability within cognitive or physical domains.
[2]Ability to explore objects, for example, reaching for and holding objects. The child may have no specific purpose except to play or discover.
[3]Ability to explore objects with a purpose, such as to explore a bell to understand the source of the sound.
[4]Measures proficiency in communication through diverse nonverbal sounds and gestures, such as vowel and vowel-consonant sounds.
[5]Measures proficiency in engaging in early problem solving, such as using a tool to reach an out-of-reach toy or locating a hidden toy.
[6]Measures proficiency in early communication skills, such as saying simple words like "mama" and "dada."
[7]Measures proficiency in being able to use visual tracking to guide hand movements to pick up a small object.
[8]Measures proficiency in ability to maintain control of the muscles used in sitting with and without support.
[9]Measures proficiency in ability to engage in various prewalking types of mobility, with and without support, such as shifting weight from one foot to the other.
[10]Measures proficiency in ability to walk with help and to stand independently.
[11]Measures proficiency in being able to walk independently.
[12]Measures proficiency in ability to maintain balance while changing position.
[13]The type of nonparental care in which the child spent the most hours.
[14]Care provided in the child's home or in another private home by a relative (excluding parents).
[15]Care provided in the child's home or in another private home by a person unrelated to the child.
[16]Care provided in places such as early learning centers, nursery schools, and preschools.
[17]Children who spent an equal amount of time in each of two or more types of arrangements.
[18]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.
[19]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.
NOTE: Estimates weighted by W1C0. This table is based on a survey that sampled children born in 2001 and was designed to collect information about them for the first time when the children were about 9 months of age (i.e., 8 to 10 months). As shown in the table, some children were older than this at the time data were collected, although only 6.5 percent were over 13 months of age. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month–Kindergarten 2007 Restricted-Use Data File and Electronic Codebook. (This table was prepared December 2010.)

Table 220.20. Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04

†Not applicable.
[1]Reflects performance on language and literacy items (e.g., conventions of print, letter recognition, understanding of letter-sound relationships, phonological awareness, sight word recognition, and understanding words in the context of simple sentences). Potential score ranges from 0 to 85.
[2]Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.
[3]Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 71.
[4]Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).
[5]Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.
[6]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.
[7]The type of nonparental care in which the child spent the most hours.
[8]Care provided in the child's home or in another private home by a relative (excluding parents).
[9]Care provided in the child's home or in another private home by a person unrelated to the child.
[10]Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.
[11]Children who spent an equal amount of time in each of two or more types of arrangements.
[12]Poverty status based on Census Bureau guidelines from 2005, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2005, a family of four was considered to live below the poverty threshold if its income was less than or equal to $19,971.
NOTE: Estimates weighted by W3R0. Estimates pertain to a sample of children who were born in 2001. This table was designed to present data collected when the children were about 4 years of age (i.e., 48 to 57 months old). As shown in the table, some children were younger or older than this at the time data were collected, although 75 percent were within the target age range. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort (ECLS-B), Longitudinal 9-Month–Kindergarten 2007 Restricted-Use Data File. (This table was prepared December 2010.)

Table 220.40. Fall 2010 first-time kindergartners' reading, mathematics, and science scale scores, by selected child, family, and school characteristics: Fall 2010, spring 2011, and spring 2012

[Standard errors appear in parentheses]

Selected child, family, or school characteristic	Number of children (in thousands)		Percentage distribution of children		Mean reading score[1]						Mean mathematics score[2]						Mean science score[3]			
					Kindergarten				First grade, spring 2012		Kindergarten				First grade, spring 2012		Kindergarten, spring 2011		First grade, spring 2012	
					Fall 2010		Spring 2011				Fall 2010		Spring 2011

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

[1]Reflects performance on questions measuring basic skills (print familiarity, letter recognition, beginning and ending sounds, rhyming words, and word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessment range from 0 to 100.

[2]Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Possible scores for the mathematics assessment range from 0 to 96.

[3]Science was not assessed in the fall of kindergarten. Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Possible scores for the science assessment range from 0 to 47.

[4]Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale—1 (never), 2 (sometimes), 3 (often), and 4 (very often)—by rounding the mean score to the nearest whole number.

[5]The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.

[6]Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.

[7]Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

[8]Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than $17,552 in 2010.

[9]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.

NOTE: Estimates weighted by W4C4P_2T0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Most of the children were in first grade in 2011–12, but 4 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms). Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Estimates differ from previously published figures because scores were recalibrated to represent the kindergarten through first-grade assessment item pools and weights were adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 2010–11 (ECLS-K:2011), Kindergarten–First Grade Restricted-Use Data File. (This table was prepared September 2014.)

Table 220.45. Fall 2010 first-time kindergartners' cognitive flexibility, approaches to learning, interpersonal skills, and self-control scale scores, by selected child, family, and school characteristics: Fall 2010, spring 2011, and spring 2012

[1]To measure cognitive flexibility, children were administered the Dimensional Change Card Sort (DCCS) (developed by Philip Zelazo in 2006). Children were asked to sort a series of picture cards into one of two trays according to different rules (e.g., by color, by shape). Possible scores range from 0 to 18.

[2]The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often.

[3]The interpersonal skills scale is based on teachers' reports on the student's skill in forming and maintaining friendships; getting along with people who are different; comforting or helping other children; expressing feelings, ideas, and opinions in positive ways; and showing sensitivity to the feelings of others. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child interacted with others in a positive way more often.

[4]The self-control scale is based on teachers' reports on the student's ability to control behavior by respecting the property rights of others, controlling temper, accepting peer ideas for group activities, and responding appropriately to pressure from peers. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child exhibited behaviors indicative of self-control more often.

[5]Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4. Fall 2010 scores were categorized into the four anchor points on the original scale—1 (never), 2 (sometimes), 3 (often), and 4 (very often)—by rounding the mean score to the nearest whole number.

[6]The type of nonparental care in which the child spent the most hours. Multiple arrangements refers to children who spent an equal amount of time in each of two or more arrangements.

[7]Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.

[8]Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

[9]Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than $17,552 in 2010.

[10]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.

NOTE: Estimates weighted by W4C4P_2T0. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Most of the children were in first grade in 2011–12, but 4 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms). Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.
[1]Includes students with missing kindergarten entry status information.
[2]A child who enrolled in kindergarten for the first time in 2010–11 is classified as an early, on-time, or delayed kindergarten entrant depending on whether the parent reported enrolling the child early, enrolling the child when he or she was old enough, or waiting until the child was older relative to school guidelines about when children can start school based on their birth date. A child is classified as a kindergarten repeater if the parent reported that 2010–11 was the child's second (or third or more) year of kindergarten.
[3]Most of the children first entered kindergarten in 2010–11, but the children who were repeating kindergarten in 2010–11—that is, the "Kindergarten repeaters" shown in column 8—had first entered kindergarten in an earlier school year.
[4]The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.
[5]Parents who reported working at least 35 hours per week are defined as employed full time, while those who reported working less than 35 hours per week are defined as employed part time. Those neither employed nor looking for work are not in the labor force.
[6]Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.
[7]Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than $17,552 in 2010.
[8]Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income at the time of data collection.
NOTE: Estimates weighted by W1_2P0. Estimates pertain to a sample of children who were enrolled in kindergarten in the 2010–11 school year. Two parents may refer to two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. Single parent refers to one biological or adoptive parent only. In households without parents, the guardian or guardians may be related or unrelated to the child. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

[2]A child who enrolled in kindergarten for the first time in 2010–11 is classified as an early, on-time, or delayed kindergarten entrant depending on whether the parent reported enrolling the child early, enrolling the child when he or she was old enough, or waiting until the child was older relative to school guidelines about when children can start school based on their birth date. A child is classified as a kindergarten repeater if the parent reported that 2010–11 was the child's second (or third or more) year of kindergarten.
[3]Reflects performance on questions measuring basic skills (print familiarity, letter recognition, beginning and ending sounds, rhyming words, and word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessment range from 0 to 100.
[4]Reflects performance on questions on number sense, properties, and operations; measurement; geometry and spatial sense; data analysis, statistics, and probability (measured with a set of simple questions assessing children's ability to read a graph); and prealgebra skills such as identification of patterns. Possible scores for the mathematics assessment range from 0 to 96.
[5]Science was not assessed in the fall of kindergarten. Reflects performance on questions on physical sciences, life sciences, environmental sciences, and scientific inquiry. Possible scores for the science assessment range from 0 to 47.
[6]To measure cognitive flexibility, children were administered the Dimensional Change Card Sort (DCCS) (developed by Philip Zelazo in 2006). Children were asked to sort a series of picture cards into one of two trays according to different rules (e.g., by color, by shape). Possible scores range from 0 to 18.
[7]The approaches to learning scale is based on teachers' reports on how students rate in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores on the scale range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often.
NOTE: Estimates weighted by W4C4P_20. Estimates pertain to a sample of children who were enrolled in kindergarten in the 2010–11 school year. Estimates differ from previously published figures because reading, mathematics, and science scores were recalibrated to represent the kindergarten through first-grade assessment item pools and because weights were adjusted to account for survey nonresponse at each data collection wave, including the latest round of data collection (spring 2012).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.
[1]Includes persons of all other races and two or more races.
[2]Status during kindergarten year.
NOTE: Reading scale ranges from 0 to 209. Estimates for each assessment round include all children assessed in English in that round, even if they were not assessed in English in a previous round. In fall 1998, 8 percent of the kindergarten sample was not administered the English battery because of nonpassing scores on the OLDS (Oral Language Development Scale) English proficiency assessment. By spring of first grade, this percentage had decreased to 2 percent. In the third grade and subsequent years, the OLDS was not administered and all children were assessed in English. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade reading assessment item pool. Race categories exclude persons of Hispanic ethnicity.

[1]Includes persons of all other races and two or more races.
[2]Status during kindergarten year.
NOTE: Mathematics scale ranges from 0 to 172, and science scale ranges from 0 to 108. Estimates for each assessment round include all children assessed in that round, including children assessed in Spanish. In kindergarten and first grade, the mathematics assessment was administered in Spanish for Spanish-speaking children who did not pass the English OLDS (Oral Language Development Scale). All assessments were administered in English in third grade through eighth grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade mathematics assessment item pool and the third-grade through eighth-grade science assessment item pool. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Prior to 2011, separate data for Asians, Pacific Islanders, and those of Two or more races were not collected.
[2]Accommodations were not permitted for this assessment.
NOTE: Scale ranges from 0 to 500. Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). Data on race/ethnicity are based on school reports. Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
[2]Scale ranges from 0 to 500.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[4]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[5]Accommodations were not permitted for this assessment.
NOTE: Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students).

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[2]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to 2011, separate data for Asians, Pacific Islanders, and those of two or more races were not collected.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2000, 2003, 2005, 2007, 2009, 2011, and 2013 Reading Assessments, retrieved June 9, 2014, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared June 2014.)

Table 221.30. Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012

[Standard errors appear in parentheses]

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material.
NOTE: Includes public and private schools. For 1984, 1994, and 1999, accommodations were not permitted. For 2008 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 4 percent of all students, depending on age and assessment year). Detail may not sum to totals because of rounding.

‡Reporting standards not met. Participation rates fell below the required standards for reporting.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.
[3]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[4]*Advanced* signifies superior performance.
[5]Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
[6]Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
[7]Did not satisfy one or more of the guidelines for school participation in 1992. Data are subject to appreciable nonresponse bias.
[8]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: With the exception of 1992, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.
‡Reporting standards not met. Either there are too few cases for a reliable estimate or item response rates fell below the required standards for reporting.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[3]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[4]Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.
[5]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for 2003 were recalculated for comparability.
NOTE: Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2003, 2005, 2007, 2009, 2011, and 2013 Reading Assessments, retrieved November 8, 2013, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2013.)

Table 221.70. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2013

[Standard errors appear in parentheses]

State	4th-graders							8th-graders						
	English language learners				Not English language learners			English language learners				Not English language learners		
	Percent of all students assessed	Average scale score[1]	Percent		Average scale score[1]	Percent		Percent of all students assessed	Average scale score[1]	Percent		Average scale score[1]	Percent

†Not applicable.
#Rounds to zero.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: The results for English language learners are based on students who were assessed and cannot be generalized to the total population of such students. Although testing accommodations were permitted, some English language learners did not have a sufficient level of English proficiency to participate in the 2013 Reading Assessment.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2013 Reading Assessment, retrieved November 8, 2013, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreport card/naepdata/). (This table was prepared November 2013.)

Table 221.75. Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2013

[Standard errors appear in parentheses]

Selected student characteristic, percentile, and grade	1992[1]	1998	2000	2002	2003	2005	2007	2009	2011	2013 Total	2013 Male	2013 Female

—Not available.
†Not applicable.
[1]Accommodations were not permitted for this assessment.
[2]Scale ranges from 0 to 500.
[3]The percentile represents a specific point on the percentage distribution of all students ranked by their reading score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[4]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders in 2013 was 222, and the standard deviation was 37. This means that we would expect about two-thirds of the students to have scores between 259 (one standard deviation above the average) and 185 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.

NOTE: Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). On the student questionnaire, the format of the question about reading for fun on your own time changed slightly beginning with the 2002 assessment year. In 1992 through 2000, reading for fun was one of several activities included in the same question ("How often do you do each of the following?"), and the response options were listed in order from most frequent to least frequent (that is, "Almost every day" was listed first, and "Never or hardly ever" was listed last); starting in 2002, reading for fun was the only activity in the question, and the order of the response options was reversed.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include racial/ethnic groups not shown separately.

[1]In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 12 are for the format that was used in previous assessment years, while the 2004 data in column 13 are for the revised format. In subsequent years, only the revised format was used.
[2]Data for 1971 include persons of Hispanic ethnicity.
[3]Test scores of Hispanics were not tabulated separately.
NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

†Not applicable.
[1]Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks.
[2]Students scoring 200 (or higher) are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information.
[3]Students scoring 250 (or higher) are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials.
[4]Students scoring 300 (or higher) are able to find, understand, summarize, and explain relatively complicated literary and informational material.
[5]Data for 1971 include persons of Hispanic ethnicity.
[6]Test scores of Hispanics were not tabulated separately.

NOTE: The NAEP reading scores have been evaluated at certain performance levels, as outlined in footnotes 1 through 4. Scale ranges from 0 to 500. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

†Not applicable.
#Rounds to zero.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Prior to 2011, separate data for Asians, Pacific Islanders, and those of Two or more races were not collected.
[2]Accommodations were not permitted for this assessment.
[3]Because of major changes to the framework and content of the grade 12 assessment, scores from 2005 and later assessment years cannot be compared with scores from earlier assessment years. Therefore, this table does not include scores from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to scale score comparisons between earlier years, see the *Digest of Education Statistics 2009*, table 138 (http://nces.ed.gov/programs/digest/d09/tables/dt09_138.asp).

NOTE: For the grade 4 and grade 8 assessments, scale ranges from 0 to 500. For the grade 12 assessment, scale ranges from 0 to 300. Includes public and private schools. For 1996 and later years, includes students tested with accommodations (1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
[1]The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).
[2]For the grade 4 and grade 8 assessments, scale ranges from 0 to 500. For the grade 12 assessment, scale ranges from 0 to 300.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[4]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[5]Accommodations were not permitted for this assessment.
[6]Because of major changes to the framework and content of the grade 12 assessment, results from 2005 and later assessment years cannot be compared with results from earlier assessment years. Therefore, this table does not include results from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to comparisons between earlier years, see the *Digest of Education Statistics 2009*, table 138 (http://nces.ed.gov/programs/digest/d09/tables/dt09_138.asp).
NOTE: Includes public and private schools. For 1996 and later years, includes students tested with accommodations (1 to 12 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students).

—Not available.
†Not applicable.
[1]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[2]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[3]Because of major changes to the framework and content of the grade 12 assessment, results from 2005 and later assessment years cannot be compared with results from earlier assessment years. Therefore, this table excludes grade 12 results from 1996 and 2000.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 6 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to 2011, separate data for Asians, Pacific Islanders, and those of two or more races were not collected.

[1]Scale ranges from 0 to 500.
[2]Based on student reports. The category of students whose parents have an unknown level of education is not shown, although data for these students is included in table totals.
NOTE: Includes public and private schools. Includes students tested with accommodations (12 percent of all 8th-grade students); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 percent of all 8th-grade students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 300.
[2]Based on student reports. The category of students whose parents have an unknown level of education is not shown, although data for these students is included in table totals.
NOTE: Includes public and private schools. Includes students tested with accommodations (9 percent of all 12th-grade students); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all 12th-grade students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Includes basic math, general math, applied math, prealgebra, and algebra I.
[2]Includes courses such as actuarial sciences, pure mathematics, discrete math, and advanced functions and modeling.
[3]Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.
[4]SD estimates include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a "504 plan"). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: Scale ranges from 0 to 300. Includes students tested with accommodations (6 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.
[3]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[4]*Advanced* signifies superior performance.
[5]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[6]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: With the exception of 1992, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 2000, 2003, 2005, 2007, 2009, 2011, and 2013 Mathematics Assessments, retrieved November 21, 2013, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2013.)

Table 222.60. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by state: Selected years, 1990 through 2013

[Standard errors appear in parentheses]

—Not available.
†Not applicable.
[1]Scale ranges from 0 to 500.
[2]Accommodations were not permitted for this assessment.
[3]The 1996 data in this table do not include students who were tested with accommodations. Data for students tested with accommodations are not available at the state level for 1996.
[4]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[5]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[6]*Advanced* signifies superior performance.
[7]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[8]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1996, 2000, 2003, 2005, 2007, 2009, 2011, and 2013 Mathematics Assessments, retrieved November 7, 2013, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared November 2013.)

Table 222.70. Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, highest level of parental education, and state: 2013

[Standard errors appear in parentheses]

State	Race/ethnicity[1]												Highest level of education attained by parents[2]							
	White		Black		Hispanic		Asian		Pacific Islander		American Indian/ Alaska Native		Did not finish high school		Graduated high school		Some education after high school		Graduated college

‡Reporting standards not met. Either there are too few cases for a reliable estimate or item response rates fell below the required standards for reporting.
[1]Data for students of two or more races are not separately shown.
[2]Excludes students who responded "I don't know" to the question about educational level of parents.
NOTE: Scale ranges from 0 to 500. Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Totals include racial/ethnic groups not shown separately.

#Rounds to zero.
[1]In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 11 are for the format that was used in previous assessment years, while the 2004 data in column 12 are for the revised format. In subsequent years, only the revised format was used.
NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) know some basic addition and subtraction facts. Students scoring 200 have a considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

—Not available.
[1]Students scoring 150 (or higher) know some basic addition and subtraction facts.
[2]Students scoring 200 (or higher) have a considerable understanding of two-digit numbers and know some basic multiplication and division facts.
[3]Students scoring 250 (or higher) have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations.
[4]Students scoring 300 (or higher) can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra.
[5]Students scoring 350 (or above) can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability.
NOTE: The NAEP mathematics scores have been evaluated at certain performance levels, as outlined in footnotes 1 through 5. Scale ranges from 0 to 500. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), *NAEP Trends in Academic Progress*, 1996 and 1999; and 2004, 2008, and 2012 Long-Term Trend Mathematics Assessments, retrieved May 4, 2009, and July 20, 2013, from the Long-Term Trend NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata/). (This table was prepared July 2013.)

Table 222.95. National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012

[Standard errors appear in parentheses]

Year, sex, and race/ethnicity	Percent of students		Average scale score by highest mathematics course taken												Percent of students at or above score levels

†Not applicable.
#Rounds to zero.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Includes Asians/Pacific Islanders and American Indians/Alaska Natives.
NOTE: Scale ranges from 0 to 500. Students scoring 200 (or higher) have a considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 163 for White 4th-graders does not denote higher performance than the score of 159 for White 12th-graders.
[2]The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[3]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 4th-graders was 150, and the standard deviation was 35. This means that we would expect about two-thirds of the students to have scores between 185 (one standard deviation above the average) and 115 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges. For a discussion of standard errors, see Appendix A: Guide to Sources.
[4]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[5]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[6]*Advanced* signifies superior performance.
NOTE: In 2011, only 8th-grade students were assessed in science. Includes students tested with accommodations (7 to 11 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
NOTE: Scale ranges from 0 to 300. Includes students tested with accommodations (10 percent of all students in 2009 and 9 percent of all students in 2011); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students in both years). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

[1]Scale ranges from 0 to 300.

NOTE: Includes public and private schools. Includes students tested with accommodations (11 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all 8th-graders). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

‡Reporting standards not met (too few cases for a reliable estimate).
[1]The educational goals columns exclude the 1 percent of students who reported that they would not finish high school and the 2 percent who reported that they did not know how much education they would complete.
[2]Scale ranges from 0 to 300.

NOTE: Includes students tested with accommodations (7 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.
[1]Students were asked to analyze and describe aspects of music they heard, critique instrumental and vocal performances, and demonstrate their knowledge of standard musical notation and music's role in society.
[2]The visual arts assessment measured students' ability to respond to and create visual arts. Responding questions asked students to analyze and describe works of art and design, while creating questions required students to create works of art and design of their own.

NOTE: Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' music or visual arts proficiency). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 167 for White 4th-graders in 2010 does not denote higher performance than the score of 160 for White 8th-graders in 2010.
[2]In civics assessments prior to 2014, separate data for Asians, Pacific Islanders, and students of Two or more races were not collected.
[3]These data are based on students' responses to questions about their parents' education level. Because the wording of the questions was different in 1998 than in the later assessment years, data from 1998 are not directly comparable to data from 2006, 2010, and 2014. For all assessment years, data for students whose parents have an unknown level of education are included in table totals, but not shown separately.
[4]The percentile represents a specific point on the percentage distribution of all students ranked by their civics score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[5]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 8th-graders in 2014 was 154, and the standard deviation was 33. This means that about two-thirds of the students would be expected to have scores between 187 (one standard deviation above the average) and 121 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.
[6]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[7]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[8]*Advanced* signifies superior performance.
NOTE: In 2014, only 8th-grade students were assessed in civics. Includes public and private schools. Includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 5 percent of all students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Accommodations were not permitted for this assessment.
[2]Scale ranges from 0 to 500.
[3]In geography assessments prior to 2014, separate data for Asians, Pacific Islanders, and students of Two or more races were not collected.
[4]Based on student reports. Data for students whose parents have an unknown level of education are included in table totals, but not shown separately.
[5]The percentile represents a specific point on the percentage distribution of all students ranked by their geography score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[6]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 8th-graders in 2014 was 261, and the standard deviation was 31. This means that about two-thirds of the students would be expected to have scores between 292 (one standard deviation above the average) and 230 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.
[7]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[8]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[9]*Advanced* signifies superior performance.
NOTE: In 2014, only 8th-grade students were assessed in geography. Includes public and private schools. For 2001 and later years, includes students tested with accommodations (3 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Accommodations were not permitted for this assessment.
[2]Scale ranges from 0 to 500.
[3]In U.S. history assessments prior to 2014, separate data for Asians, Pacific Islanders, and students of Two or more races were not collected.
[4]Based on student reports. Data for students whose parents have an unknown level of education are included in table totals, but not shown separately.
[5]The percentile represents a specific point on the percentage distribution of all students ranked by their U.S. history score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[6]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 8th-graders in 2014 was 267, and the standard deviation was 29. This means that about two-thirds of the students would be expected to have scores between 296 (one standard deviation above the average) and 238 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.
[7]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[8]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[9]*Advanced* signifies superior performance.
NOTE: In 2014, only 8th-grade students were assessed in U.S. history. Includes public and private schools. For 2001 and later years, includes students tested with accommodations (3 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.
‡Reporting standards not met (too few cases for a reliable estimate).
[1]Scale ranges from 0 to 300.
[2]The percentile represents a specific point on the percentage distribution of all students ranked by their writing score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[3]The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. For example, the average score for all 12th-graders was 150 and the standard deviation was 35. This means that we would expect about two-thirds of the students to have scores between 185 (one standard deviation above the average) and 115 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.
[4]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[5]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[6]*Advanced* signifies superior performance.
NOTE: Writing scores from 2011 cannot be compared with writing scores from earlier assessment years. The 2011 writing assessment was developed under a new framework and is NAEP's first computer-based writing assessment. Includes public and private schools. Includes students tested with accommodations (8 percent of all 8th-graders and 7 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.
